Pharmaceuticals, Corporate Crime and Public Health -

Graham Dukes 2014-06-27

The pharmaceutical industry exists to serve the community, but over the years it has engaged massively in corporate crime, with the public footing the bill. This readable study by experts in medicine, law, criminology and public health documents the pr

Is This Legal? - Art Davie

2014-07

With the very first UFC, the new sport of mixed martial arts (MMA) was launched-although it wasn't even called that yet-and fighting would never again be the same. Now, for the first time, the true story of how the Ultimate Fighting Championship came into existence is told by the man

who started it all. In this vivid and fast-moving, first-person account, Davie explains how his idea to crown the World's Best Fighter painstakingly evolved into the UFC, which now stands as a billion-dollar sports franchise.

Ecology - Michael Begon

2020-11-11

A definitive guide to the depth and breadth of the ecological sciences, revised and updated The revised and updated fifth edition of Ecology: From Individuals to Ecosystems - now in full colour - offers students and practitioners a review of the ecological sciences. The previous editions of this book earned the authors the prestigious 'Exceptional Life-time Achievement Award' of the British Ecological

Society – the aim for the fifth edition is not only to maintain standards but indeed to enhance its coverage of Ecology. In the first edition, 34 years ago, it seemed acceptable for ecologists to hold a comfortable, objective, not to say aloof position, from which the ecological communities around us were simply material for which we sought a scientific understanding. Now, we must accept the immediacy of the many environmental problems that threaten us and the responsibility of ecologists to play their full part in addressing these problems. This fifth edition addresses this challenge, with several chapters devoted entirely to applied topics, and examples of how ecological principles have been applied to problems facing us highlighted throughout the remaining nineteen chapters. Nonetheless, the authors remain wedded to the belief that environmental action can only ever be as sound as the ecological principles on which

it is based. Hence, while trying harder than ever to help improve preparedness for addressing the environmental problems of the years ahead, the book remains, in its essence, an exposition of the science of ecology. This new edition incorporates the results from more than a thousand recent studies into a fully up-to-date text. Written for students of ecology, researchers and practitioners, the fifth edition of Ecology: From Individuals to Ecosystems is an essential reference to all aspects of ecology and addresses environmental problems of the future.

The Leadership Challenge -

James M. Kouzes 2017-04-17

The most trusted source of leadership wisdom, updated to address today's realities The Leadership Challenge is the gold-standard manual for effective leadership, grounded in research and written by the premier authorities in the field. With deep insight into the complex interpersonal dynamics of the workplace, this

book positions leadership both as a skill to be learned, and as a relationship that must be nurtured to reach its full potential. This new seventh edition has been revised to address current challenges, and includes more international examples and a laser focus on business issues; you'll learn how extraordinary leaders accomplish extraordinary things, and how to develop your leadership skills and style to deliver quality results every time. Engaging stories delve into the fundamental roles that great leaders fulfill, and simple frameworks provide a primer for those who seek continuous improvement; by internalizing key insights and putting concepts into action, you'll become a more effective, more impactful leader. A good leader gets things done; a great leader aspires, inspires, and achieves more. This book highlights the differences between good and great, and shows you how to bridge the chasm between getting things done and making things

happen. Gain deep insight into leadership's critical role in organizational health Navigate the shift toward team-oriented work relationships Motivate and inspire to break through the pervasive new cynicism Leverage the electronic global village to deliver better results Business is evolving at an increasingly rapid rate, and leaders must keep pace with the changes or risk stagnation. People work differently, are motivated differently, and have different expectations today—business as usual is quickly losing its effectiveness. The Leadership Challenge helps you stay current, relevant, and effective in the modern workplace. *What Do Science, Technology, and Innovation Mean from Africa?* - Clapperton Chakanetsa Mavhunga 2017-06-16 Explorations of science, technology, and innovation in Africa not as the product of "technology transfer" from elsewhere but as the working of African knowledge. In the STI literature, Africa has often

been regarded as a recipient of science, technology, and innovation rather than a maker of them. In this book, scholars from a range of disciplines show that STI in Africa is not merely the product of "technology transfer" from elsewhere but the working of African knowledge. Their contributions focus on African ways of looking, meaning-making, and creating. The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and whose strategic deployment of both endogenous and inbound things represents an African-centered notion of STI. "Things do not (always) mean the same from everywhere," observes Clapperton Chakanetsa Mavhunga, the volume's editor. Western, colonialist definitions of STI are not universalizable. The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism; the creative labor of chimurenga, the transformation of everyday surroundings into military

infrastructure; the role of enslaved Africans in America as innovators and synthesizers; the African ethos of "fixing"; the constitutive appropriation that makes mobile technologies African; and an African innovation strategy that builds on domestic capacities. The contributions describe an Africa that is creative, technological, and scientific, showing that African STI is the latest iteration of a long process of accumulative, multicultural knowledge production. Contributors Geri Augusto, Shadreck Chirikure, Chux Daniels, Ron Eglash, Ellen Foster, Garrick E. Louis, D. A. Masolo, Clapperton Chakanetsa Mavhunga, Neda Nazemi, Toluwalogo Odumosu, Katrien Pype, Scott Remer

e-Learning by Design - William Horton 2011-01-20
From William Horton -- a world renowned expert with more than thirty-five years of hands-on experience creating networked-based educational systems -- comes the next-step resource for e-learning training professionals. Like his best-

selling book *Designing Web-Based Training*, this book is a comprehensive resource that provides practical guidance for making the thousand and one decisions needed to design effective e-learning. *e-Learning by Design* includes a systematic, flexible, and rapid design process covering every phase of designing e-learning. Free of academic jargon and confusing theory, this down-to-earth, hands-on book is filled with hundreds of real-world examples and case studies from dozens of fields. "Like the book's predecessor (*Designing Web-based Training*), it deserves four stars and is a must read for anyone not selling an expensive solution. -- From *Training Media Review*, by Jon Aleckson, www.tmreview.com, 2007

Tourism in Africa - Iain Christie 2014-06-19
This book presents how tourism initiates economic development and how constraints to the growth of tourism in Sub-Saharan Africa can be addressed. With 24 case studies that illustrate tourism

development, it reveals that despite destination challenges, the basic elements needed to initialize or intensify success are applicable across the region.

On the Prowl - Rupert Fawcett 2016-09-27
With a hugely popular following on Facebook, *On the Prowl* has developed a regular daily following of more than 100,000 cat lovers from around the world. In *On the Prowl* the best of Rupert Fawcett's brilliantly observed, touchingly true cartoons come together in book form for the first time.

Cognitive Capitalism - Heiner Rindermann 2018-02-15
This book studies cross-country differences in cognitive capital, exploring how levels of education are linked to a nation's economic development. It is for graduates and research in a wide range of fields, including economics, psychology, sociology and political science.

With a Little Help - Cory Doctorow 2015-07-16
With a Little Help is my first serious experiment in self-

publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. With a Little Help consists of 12 stories, all reprints except for "Epoch" (commissioned by Mark Shuttleworth).

Curriculum for Excellence Through Outdoor Learning - Learning and Teaching Scotland 2010

London's Environment - Julian Hunt 2005-05-06

This comprehensive volume opens with an introductory editorial giving a general review of London's environment and its prospects for a sustainable future. The subsequent chapters are written by experts on architecture, planning, air pollution, biodiversity, transport, rivers, parks, aesthetic aspects of London's landscape, politics, health, and economics. The highly topical material authoritatively

describes the major recent developments that have greatly affected London's environment and in some ways have set the city on a path towards a more sustainable future. This progress includes changes in the law (GLA act), politics (adopting sustainability as a political goal), policies on waste disposal (no more landfills), housing areas, building development (e.g. Canary Wharf), traffic management (congestion charges), policies for enhancing biodiversity, transport infrastructure (cars, railways), and managing the risk of floods and other disasters (in response to climate change). The book shows how these policies and practical developments interact, and therefore need to be understood by considering them as a whole. A postscript by the Deputy Mayor of London, Nicky Gavron, is included summarising London's environmental policies that have been developed since the conference on "London Environment and Future" was

held on September 18-19, 2002. Contents:World Contexts:London's Urban Renaissance (R Rogers)Sustainability of London's Environment and the World Context (M Meacher)Environmental Developments and Perceptions:Environmental Strategies for London (D Goode)The Air Over London (H ApSimon)London's Water Supplies (R S Wotton & H Evans)The Royal Parks and Their Role in a Sustainable City (W Weston)Planning and Politics:Dealing with Disasters (D J Parker & E C Penning-Rowsell)Civilising Transport (D Banister & E Duxbury)A London Fit for Pirates (J Glancey)London's Governance and Sustainability (T Travers)and other papers Readership: Students, instructors, researchers, engineers, medical doctors, businessmen, and general readers with broad interests in environmental issues, including the scientific, policy and community aspects. Key Features:No other

environmental book conveys the recent developments in London, or attempts to relate them to the environmental and general history of the cityThis book will be useful in the academic world for students and lectures and it will also be useful for local and national government and politics having to make decisions about sustainable development and the environmentThe unique overview provided here should also be useful to consultants, businesses and lawyers working on urban environmental/sustainability issuesKeywords:Environmental Strategies;Urban Environment;London *The Defining Decade* - Meg Jay 2016-04-07 Contemporary culture tells us the twentysomething years don't matter. Clinical psychologist Dr Meg Jay argues that this could not be further from the truth. In fact, your twenties are the most defining decade of adulthood. The Defining Decade weaves the latest science of the twentysomething years with

real-life stories to show us how work, relationships, personality, social networks, identity and even the brain can change more during this decade than at any other time in adulthood. Smart, compassionate and constructive, *The Defining Decade* is a practical guide to making the most of the years we cannot afford to miss.

The Leadership Challenge -

James M. Kouzes 1996-12-06
Completely revised and updated I not only enjoyed it...I found myself constantly nodding and saying to myself, 'That's right! That's how it's done! That's what it feels like!' You certainly captured the essence of what I've found is at the heart of transforming leadership. -- Robert D. Haas, chairman and CEO, Levi Strauss & Co. The leadership book that outshines them all, updated for today's new business realities. With an expanded research base of 60,000 leaders, this second edition captures the continuing interest in leadership as a critical aspect of human

organizations. It offers a broader scope of leaders in every industry and walk of life, including the education and nonprofit fields, and examines the era's hottest issues -- the new cynicism, the electronic global village, evolving employee-employer relationships -- in keeping pace with our ever-changing world. The classic five-point guide to better leadership, however, remains as useful as ever.

Heritable Human Genome Editing - The Royal Society
2021-01-16

Heritable human genome editing - making changes to the genetic material of eggs, sperm, or any cells that lead to their development, including the cells of early embryos, and establishing a pregnancy - raises not only scientific and medical considerations but also a host of ethical, moral, and societal issues. Human embryos whose genomes have been edited should not be used to create a pregnancy until it is established that precise genomic changes can be made reliably and without

introducing undesired changes - criteria that have not yet been met, says Heritable Human Genome Editing. From an international commission of the U.S. National Academy of Medicine, U.S. National Academy of Sciences, and the U.K.'s Royal Society, the report considers potential benefits, harms, and uncertainties associated with genome editing technologies and defines a translational pathway from rigorous preclinical research to initial clinical uses, should a country decide to permit such uses. The report specifies stringent preclinical and clinical requirements for establishing safety and efficacy, and for undertaking long-term monitoring of outcomes. Extensive national and international dialogue is needed before any country decides whether to permit clinical use of this technology, according to the report, which identifies essential elements of national and international scientific governance and oversight.

Crop ecology, cultivation

and uses of cactus pear

Food and Agriculture Organization of the United Nations 2018-06-05
Cactus plants are precious natural resources that provide nutritious food for people and livestock, especially in dryland areas. Originally published in 1995, this extensively revised edition provides fresh insights into the cactus plant's genetic resources, physiological traits, soil preferences and vulnerability to pests. It provides invaluable guidance on managing the resource to support food security and offers tips on how to exploit the plant's culinary qualities.

Frank's Luck - 2019-02-07

His resolve tested. His freedom at times, threatened, he persevered and never gave up, until the very end, when the flesh could do no more. His body had been traumatised, his mind, even more, his soul tormented nothing truly stopped him. He was a tough old bastard that was faced with great adversity and horrible tragedy. Disadvantaged, discriminated against and

deprived, it did not slow him,
he simply adapted.
