Put Your Hands on Your Hips and Act Like a Woman Gale P. Jackson 2020-04 In a gathering of griot traditions fusing storytelling, cultural history, and social and literary criticism, *Put Your Hands on Your Hips and Act Like a Woman* "re-members" and represents how women of the African diaspora have drawn on ancient traditions to record memory, history, and experience in performance. These women's songs and dances provide us with a wealth of polyphonic text that records their reflections on identity, imagination, and agency, providing a collective performed autobiography that complements the small body of pre-twentieth-century African and African American women's writing. Gale P. Jackson engages with a range of vibrant traditions to provide windows into multiple discourses as well as "new" and old paradigms for locating the history, philosophy, pedagogy, and theory embedded in a lineage of African diaspora performance and to articulate and address the postcolonial

fragmentation of humanist thinking. In lyrically interdisciplinary movement, across herstories, geographies, and genres, cultural continuities, improvisation, and transformative action, Put Your Hands on Your Hips and Act Like a Woman offers a fresh perspective on familiar material and an expansion of our sources, reading, and vision of African diaspora, African American, and American literatures.

Song, Landscape, and Identity in Medieval Northern France

Jennifer Saltzstein 2023-06-13 *Song, Landscape, and Identity in Medieval Northern France* offers a new perspective on how medieval song expressed relationships between people and their environments. Informed by environmental history and harnessing musicological and ecocritical approaches, author Jennifer Saltzstein draws connections between the nature imagery that

pervades songs written by the trouvères of northern France to the physical terrain and climate of the lands on which their authors lived. In doing so, she analyzes the different ways in which composers' lived environments related to their songs and categorizes their use of nature imagery as realistic, aspirational, or nostalgic. Demonstrating a cycle of mutual impact between nature and culture, Saltzstein argues that trouvère songs influenced the ways particular groups of medieval people defined their identities, encouraging them to view themselves as belonging to specific landscapes. The book offers close readings of love songs, pastourelles, motets, and rondets from the likes of Gace Brulé, Adam de la Halle, Guillaume de Machaut, and many others. Saltzstein shows how their music-text relationships illuminate the ways in which song helped to foster identities tied to specific landscapes among the knightly classes, the clergy, aristocratic women, and peasants. By connecting social types to topographies, trouvère songs and the manuscripts in which they were preserved presented models of identity for later generations of songwriters, performers, listeners, patrons, and readers to emulate, thereby projecting into the future specific ways of being on the land. Written in the long thirteenth century during the last major era of climate change, trouvère songs, as Saltzstein demonstrates, shape our understanding of how identity formation has rested on relationships between nature, culture, and change.

her literary texts, especially the Heptaméron, as an exploratory space in which to generate a creative vision for institutional reform. The Heptaméron's approach to reform emerges from statistical analysis of the text's seventy-two tales, which reveals new insights into trends within the work, including the different categories of wrongdoing by male, institutional representatives from the Church and aristocracy, as well as the varying responses to injustice that characters in the tales employ as they pursue reform. Throughout its chapters, *The Visionary Queen* foregrounds the trope of the labyrinth, a potent symbol in early modern Europe that encapsulated both the fallen world and redemption, two themes that underlie Marguerite's project of reform.

Teaching Number Robert J Wright 2002-03-22 `As a classroom teacher, I found the stages and instructional strategies very helpful in identifying students' progress along mathematical development levels' - Teaching Children Mathematics `I have tried many of the suggestions and teaching procedures and seen short and long-term success, both with individuals and groups. It will be a valuable resource for the primary-school teacher, especially with older children who need accurate and specialised development. A sound approach to mathematics teaching could be developed from conscientious use of this resource' - Matthew Alcock, Primary Practice `This is a highly detailed and well-structured text to support the teaching of number skills at the primary phase with particular emphasis given to the 4-8 years age range. From the outset, the authors take great care to set out their credentials and the scope of their writing. It is clear that the guidance, teaching approach and activities offered in the book have been thoroughly tried and tested throughout the 1990s during research and development work with teachers in Australia, England and the USA in the Mathematics Recovery (MR) and Count Me In Too (CMIT) projects' - Mathematics in Schools This book provides a structured approach to the teaching of early numeracy, which has been extensively developed through the Mathematics Recovery and Count Me In Too Projects in Australia, the United Kingdom and the United States. The book lets teachers identify where their students are in terms of number

skills, and sets out a strategy for developing their knowledge. The authors show how to advance children's learning across five stages - emergent, perceptual, figurative, initial number, and facile number. This provides for increasingly sophisticated number strategies. Teaching procedures are organised into key teaching topics, and each includes: - a clearly defined purpose - detailed teaching procedures and learning tasks - application in whole class, small group and individualised settings - a link to the Learning Framework in Number. The activities have been tested by practitioners in Australia, the United States and the United States and can be used within each country's numeracy strategy. This book will be useful to primary teachers, especially in the early years, mathematics co-ordinators, heads of school, mathematics advisers, learning support personnel, lecturers and educational psychologists. This book builds on the assessment of children's strategies set out in the authors' Early Numeracy (Paul Chapman Publishing 2000)
