Treatment And Prevention Of Childhood Sexual Abuse - Sandra A. Burkhardt 2013-02-01

This practice-oriented book provides a model of intervention for sexually abused children. Its approach is that intervention strategy should be based on child-generated information. Models of intervention based on adult-generated information are ineffective - simply because children do not have the cognitive capability of utilising such strategies to prevent or stop abuse. In contrast, therapeutic strategies presented in this text emphasising child-generated information enable the clinician to assess and understand the vulnerability of sexually abused children in regards To Their Cognitive Level Of Understanding And Their Emotional Reactions.; The book guides mental health professionals to: acquire information about what and how children think about adults, in general, and perpetrators in particular; inventory children's own strategies for responding to perpetrators; document children's underlying logic for the strategies they identify; and use the information provided by children to guide the selection of treatment and prevention techniques.; After the introduction of the topic, the book moves on to a discussion of the correlates of child sexual abuse. Information on a systematic research endeavour examining victim vulnerability is then presented, as well as children's responses to perpetrators. Other chapters focus on the Burkhardt child-generated model of sexual abuse intervention and procedures for assessment. Finally, the appendix provides a description of educational and psychological materials on child sexual abuse which can be used for prevention and intervention.

Judicial Decision Making in Child Sexual Abuse Cases - Margaret M. Wright 2011-11-01

Amendments were made to the Criminal Code of Canada and sexual assault was redefined. The word "rape" was replaced with a continuum of categories intended to reflect the full range of sexually intrusive behaviours. Margaret Wright examines how the courts have dealt with child sexual abuse cases since then. Not Monsters - Pamela D. Schultz 2005

In the wake of recent violence our nation has experienced, and the paranoia that has ensued, we've directed our attention to potential terrorists in our midst. Yet our children face more risk from people they know than from terrorists they have never met. An estimated one in five girls and one in ten boys in the United States experience some form of sexual abuse by age eighteen. What could possibly motivate a person to molest a child? *Not Monsters* documents the stories of nine convicted child molesters through one-on-one interviews, listening to what offenders have to say about their crimes and exploring the roots of these behaviors from a social constructionist perspective. Their words paint a compelling and frightening portrait of how sexual abuse works in Western culture to perpetuate a political and social system of dominance and control.
