Animalkind - Ingrid Newkirk 2021-01-19

The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with "admiration and empathy" (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with

intelligence, emotions, intricate communications networks, and myriad abilities. In *Animalkind*, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish "sing" underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it's medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. *Animalkind* provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

The Complete Guide to Adopting a Cat -

Laura Cassiday 2021-11-23

Certified cat behavior consultant Laura Cassiday used her extensive experience working at the Maryland SPCA to help her write the definitive guide book for anyone who has recently adopted (or is considering adopting) a new cat. Using input and interviews from over 40 shelter and rescue organization experts, this book covers every topic and question a new cat owner will need to know to successfully integrate their new cat into their home and life. Topics covered include: Choosing the correct cat for your home and lifestyle What to do if you've found a stray cat or kittens Becoming a cat foster parent Bringing your new cat home: supplies, safe spaces, and introductions Cat nutrition Grooming and shedding Cat health care Troubleshooting problems Litter Boxes Issues Destructive Scratching Biting and Aggression Fear and Anxiety Nuisance Behaviors (Counter Surfing, Excessive Meowing, and More) Carrier Training Giving Medication Playtime and enrichment Senior Cat care So you've decided to adopt a cat. Easy, right? You just go to the closest shelter, pick out the cute, fluffy orange one, and live happily ever after. Although this is exactly what goes through the minds of many would-be cat adopters, picking out your new best friend can be a little more complicated. I mean, if you get a kitten, you're looking at a

15-20 year commitment. I once had one of my cats live to be 27! And what happens if they don't like your other pets? Or your kids? Even worse, what if they stop using their litter box? And how often do cats even need to go to the vet, anyway? Even for impulsive people like myself, you have to at least put a little bit of thought into it. That's where this book comes in. It's a comprehensive guide to all things cat adoption. If you don't know where to start, this is a good place. If you've just brought your new kitty home and have questions, we'll cover that too. Even if you've already had a cat for a while, you're guaranteed to learn something new. So grab your catnip and feather wand, and let's get started!

Reward, Lost Cat, the Search for Spock -

Donald Weiser 2012-09-01

This is a true story where the main characters are feline. There are some humans too. It is a story of cat love and loss. It is also a story of two humans finding each other and of human love and bonding. My name is Don Weiser. I had three cats: Jones (who is all black with green eyes and is going on 21 years of age), Spock (who is an Abyssinian and is presently lost), and Sam (who is a huge orange tabby who was a stray). I lived in Albany, NY for 17 years and worked for the Department of Social Services. My wife Beth lives in North Carolina and had three cats: Smokey (who is a lovely lion like gray tabby with the largest head I have ever seen), Maggie (who was a solid black cat with gold eyes), and Rosy (who is also a solid black cat with gold eyes and who is Maggie's daughter). Beth and I are now married (8/90) and live in North Carolina with our six cats. Maggie is dead, Spock is lost, and Junior (the youngster cat who is a tabby) now lives with us. These are the main characters and the story is about how we all came to live together in North Carolina. I hope you find it interesting. It may make you cry, I hope it makes you laugh too. My book is meant to help anyone whose pet is lost. What to do, what steps to take before your pet is lost to help ensure that it doesn't get lost and to make recovery easier. If it does become lost, what to do in the first hours, first days, first weeks, and long term up to how to deal with the possibility of never finding your pet.

Hello, My Name Is Riley - Tricia Jacobs

2018-09-03

This is the true story of Riley, a 5 month old kitten who was adopted from an animal shelter. He originally had a different name and lived in the shelter for several months. He was caught in a humane trap with his mother and two siblings as a part of a local trap and release program. His mother was spayed and released. He and his brother and sister were kept at the shelter, spayed and neutered until families came and adopted them. The story is directed towards elementary and middle school aged children. There are 20+ pages with full color illustrations. Included is a vocabulary list and definitions at the back of the book, with a brief description of what spaying and neutering are. In a poem at the back of the book, the author gives praise to our Creator for such a beautiful pet for their family. Excerpt from the "Statistics" page in the book: "There is an animal overpopulation problem in America. Millions of unwanted and uncared for animals go into shelters each year and are euthanized (put to death). Please, study these statistics before allowing your pets to become pregnant. Careless litters of puppies and kittens add to the animal overpopulation problem. These statistics are startling and very sad! Please spay or neuter your pets! Kittens can become pregnant as early as 6 months old. They can have three litters of kittens a year, averaging 4 kittens in each litter. That is 12 kittens or more per unspayed female cat per year! Then, if any of those kittens are female they can also start having kittens at 6 months of age. The number of kittens and unwanted cats adds up quickly!"

The Amazing Cat Family - Susan Fadler 2015-06-13

The Amazing Cat Family is an Animal Based Curriculum of the RUFF Program. The book is 133 pages and takes a comprehensive look at the entire cat family with emphasis on cultural use, science, biology, history, genetics and geography. Each species is noted with Navajo names. R.U.F.F. is an acronym that stands for Reservations' Unwanted Four-Footed Friends organized for establishing homes for the unwanted and neglected animals on the Navajo Reservation. Rescued animals went into classrooms to help teach the children about animal behavior, care and health, but the animals ended up helping the kids by extrapolating expressions of emotions which would otherwise be harbored or unexpressed by the child. It incorporated self-esteem where all else had failed. Using a natural catalyst, puppies and kittens, to teach responsible behavior proved to be extremely effective. Teacher nominated, this curriculum won 1st place Golden Bell Award from the ASBA as the best new innovative curriculum in 1996.
