Billie Piper (2006) On being asked if his consumption of jelly babies rotted his teeth - "Thankfully my teeth regenerate like The

(2009) "Doctor Who is not a name, but a question to which we're still learning the answer." on DrWho.org.uk "The Doctor's true name is unknown, although his nickname at school was Theta Sigma, which is presumably Gallifreyan for 'speccy git.' "Robert Colville in The Daily Telegraph (2010) "The TARDIS may have been impressively roomy but it would still only be a changing room for Superman." Steve Tomkins in Third Way (2006) "The 'timey-wimey' get out explanation - the Sonic Screwdriver of words." 'Camera Obscura' on DigitalSpy.co.uk (2009) "Doctor Who and Christmas go together like marmite and cheese. Or marmite and jam. Or whatever the hell English people eat marmite with. The point is, they go together well." This irreverent romp through the worlds of medicine and the military is part autobiography, part social history, and part laugh-out-loud comedy. When the author graduated from medical school in 1970, only 7% of America's doctors were women, and very few of those joined the military. She was the second woman ever to do an Air Force internship, the only woman doctor at David Grant USAF Medical Center, and the only female military doctor in Spain. She had to fight for acceptance: even the 3 year old daughter of a patient told her father, "Oh, Daddy! That's not a doctor, that's a lady." She was refused a radiology residency because they subtracted points for women. She couldn't have dependents: she was paid less than her male counterparts, she couldn't live on base, and her civilian husband was not even covered for medical care or allowed to shop on base. After spending six years as a General Medical Officer in Franco's Spain, she became a family practice specialist and a flight surgeon,

doing everything from delivering babies to flying a B-52. Along the way, she found time to buy her own airplane and learn to fly it (in that order) and to have two babies of her own. She retired as a full colonel. As a rare woman in a male-dominated field, she encountered prejudice, silliness, and even frank disbelief. Her sense of humor kept her afloat; she enlivened the solemnity of her job with antics like admitting a spider to the hospital and singing "The Mickey Mouse Club March" on a field exercise. This book describes her education and career. She tells an entertaining story of what it was like to be a female doctor, flight surgeon, pilot, and military officer in a world that wasn't quite ready for her yet. The title is taken from her first cross-country solo flight: when she closed out her flight plan, the man at the desk said, "Didn't anybody ever tell you women aren't supposed to fly?"

Communicating in Hospital Emergency Departments -

Diana Slade 2015-04-28

This book was conceived in response to the increasing recognition of the central role of communication in effective healthcare delivery, particularly in high-stress contexts. Over a three-year period, the research team investigated communication between patients and clinicians in five representative emergency departments (EDs). The book describes the communicative complexity and intensity of work in the ED and identifies the features of successful patient-clinician interactions. Drawing on authentic examples of communication within the ED, the book provides comprehensive communication strategies for healthcare professionals that can be readily integrated into everyday practice. 'Professor Diana Slade and her colleagues have written an innovative and practical book on communication and relationships in emergency departments and their effects on the patient experience. Rarely does one find a book

that so seamlessly translates research findings into practical action strategies. The book is an invaluable resource for the training of physicians, nurses, hospital administrators and others in healthcare.' - Elizabeth A. Rider, MSW, MD, FAAP, Department of Pediatrics, Harvard Medical School 'My participation in the UTS Emergency Communication project provided extraordinary insights into the complexities and subtleties of communication encounters during a patient's emergency department journey. This project has made a lasting impact on my daily work, and I hope will improve emergency patient care into the future.' - Dr Nick Taylor, Emergency Medicine Specialist, The Canberra Hospital 'The captured clinical conversations between doctors, nurses and patients are fascinating... The discussion and conclusions provide a rare insight into an integral and critical component of Emergency Medicine practice. The team, led by Professor

Slade, was truly unobtrusive, professional and personable.' - Dr Marian Lee, Emergency Physician, Director of Emergency Medicine Training [The Madwoman Can't Speak](#) - Marta Caminero-Santangelo 1998

In this work, the subversive madwoman first appropriated by feminist theorists and critics is re-evaluated. How, the author asks, can such a figure be subversive if she's effectively imprisoned, silent and unseen? Taking issue with a prominent strand of current feminist literary criticism, Caminero-Santangelo identifies a counternarrative in writing by women in the last half of the 20th century, one which rejects madness, even as a symbolic resolution.

Female Doctors in Canada - Earle H. Waugh 2019-01-01
Female Doctors in Canada is an accessible collection of articles by experienced physicians and researchers exploring how systems, practices, and individuals must change as medicine becomes an increasingly female-dominated profession. As the ratio of practicing physicians shifts from predominately male to

predominately female, issues such as work hours, caregiving, and doctor-patient relationships will all be affected. Canada's medical education is based on a system that has always been designed by and for men; this is also true of our healthcare systems, influencing how women practice, what type of medicine they choose to practice, and how they wish to balance their personal lives with their work. With the intent to open a larger conversation, Female Doctors in Canada reconsiders medical education, health systems, and expectations, in light of the changing face of medicine. Highlighting the particular experience of women working in the medical profession, the editors trace the history of female practitioners, while also providing a perspective on the contemporary struggles women face as they navigate a system that was tailored to the male experience, and is yet to be modified.

[Gender and the Quest in British Science Fiction Television](#) - Tom Powers
2016-10-18

The subjects of this book constitute a significant cross section of BBC science fiction television. With such characters as the Doctor (an enigmatic time-traveling alien), Kerr Avon (a problematic rebel leader), Dave Lister (a slovenly last surviving human) and Captain Jack Harkness (a complex omniseual immortal), these shows have both challenged and reinforced viewer expectations about the small-screen masculine hero. This book explores the construction of gendered heroic identity in the series from both production and fan perspectives. The paradoxical relationships between the producers, writers and fans of the four series are discussed.
