Management of Unintended and Abnormal Pregnancy Maureen Paul 2011-08-24 Access to high quality abortion care is essential to women's health, as evidenced by the dramatic decrease in pregnancy-related morbidity and mortality since the legalization of abortion in the United States, and by high rates of maternal death and complications in those countries where abortion is still provided under unsafe conditions. The past two decades have brought important advances in abortion care as well as increasing cross-disciplinary use of abortion technologies in women's health care. Abortion is an important option for pregnant women who have serious medical conditions or fetal abnormalities, and fetal reduction techniques are now well-integrated into infertility treatment to reduce the risks of multiple pregnancies resulting from assisted reproductive technologies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the textbook of the National Abortion Federation, and serves as the standard, evidence-based reference text in abortion care. This state-of-the-art textbook provides a comprehensive overview of the public health implications of unsafe abortion and reviews the best surgical and medical practices for pregnancy termination, as well as managing ectopic and other abnormal pregnancies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the leading source for a comprehensive understanding of issues related to unintended and abnormal pregnancy. This textbook: is authored by internationally-known leaders in women's health care; addresses unintended pregnancy and abortion from historical, legal, public health, clinical, and quality care perspectives; includes chapters on pregnancy loss, ectopic pregnancy, gestational trophoblastic disease, and multifetal pregnancy reduction; covers treatment of pregnancies in the first and second trimester by both medical and surgical techniques; and provides resources for clinical, scientific, and social support for the abortion provider and patient.

This means that the edict that "you must have your baby in a hospital" is only about 60 years old. It comes from obstetricians and gynecologists who make

Nameless Claire Kent 2015-04-09 They named it anything but love. After a failed marriage to a domineering man, Erin refuses to be controlled by anything or anyone. That includes Seth, the father of her baby--a man who was supposed to be only a one-night-stand, a man who's used to always getting his way. There's a reason that Seth Thomas, a successful defense attorney, is often referred to as the Bulldozer. If something needs to happen, he makes it happen. That includes being part of his baby's life--even if he never expected to be a father, even if Erin doesn't really trust him. They'll work out an arrangement in the best interest of their baby--and if they occasionally have sex, well, that's just an added perk--but they both agree on one thing. What they have will never be love.

The High School Sex Pot Mrs. R 2005-04-20 Did you ever wonder what your teens wanted to know about sex (without asking)? Do you need a book to jump-start your discussion of sex with your teen? Mrs. R. has been able to generate discussion in her classroom by having her students anonymously submit questions each class period that she would answer. The questions that the students submitted were blunt and honest. She attempted to answer all questions submitted, and tied the answers to the physiology of human sexuality and the maturity needed for responsible decision-

making. The frank and innocent questions are contained in the book, and her candid, informative and sometimes humorous answers are captured in the pages. The High School Sex Pot gives readers the opportunity to get inside the minds of teenagers today. Mrs. R. has compiled sex-related questions that she has anonymously received from teens over the past several years and has answered them scientifically, humorously, and with a frankness that puts adults and teens at ease about today's sexual issues. This book is a must-read for teens, parents, and educators. Everyone is bound to learn something and may come away inspired to more frankly discuss sexuality with those closest to them.

Inducing Labour Sara Wickham 2018-04-30 When is it better to induce labour than to let a woman's body or baby decide the best time for birth? What are the pros and cons of waiting and of being induced? What about after the due date? When the baby is thought to be bigger than average? When the woman is older? If she had IVF? Or when her waters have broken earlier than usual? Induction of labour is an increasingly common recommendation and more and more women find themselves having to decide whether to let their body and baby go into labour spontaneously or agree to medical intervention. This book explains the process of induction of labour and shares information from research studies, debates and women's, midwives' and doctors' experiences to help women and families become more informed and make the decision that is right for them.

For Love or Magic Lucy March 2015-12-01 'Destined to be a superstar!' - Darynda Jones Eliot Parker's good-for-nothing deceased husband has left her a new lease on life: a house in sleepy

Nodaway Falls, New York. But his offer comes with a cost: his ghost . . . As if being married to him wasn't hard enough! Nodaway Falls turns out to be a town with more than a little magic in the air. Eliot swore off using her own powers sixteen years ago, thanks to one catastrophic day when she lost the only people who ever mattered to her, and ran away from her spellbinding father and his reckless enchantments. Now, when a chance encounter with quiet, handsome Desmond Lamb results in a magical explosion that rocks Eliot to the core, she can't help but wonder: Has her heart fallen under some sort of spell? Or is this what true love really feels like? The real question, of course, is whether her husband will stop haunting her . . . and let Desmond give her a chance at happily ever after? 'Chick lit embraces the supernatural in this sweet, funny tale of self-discovery, friendship, and trust.' - Publishers Weekly

Birth over 35 Sheila Kitzinger 2011-07-21 Birth statistics from the Office for National Statistics show that more women than ever before become mothers later in life. The trend is also backed up by figures from other countries around the world. In developed countries there is an upsurge in the age of mothers giving birth for the first time, and in the UK alone there are now more first-time mothers giving birth in the 30-34 age group than in the 25-29 age group. There is also a 50% increase from 10 years ago in the number of women aged 40 - 44 who are having a baby. Women over 35 (or even younger) expecting a first baby are automatically assigned to a "high risk" category, at risk for problems such as hypertension, pre-eclampsia, diabetes, difficult labour, and caesarean section. Research, however, suggests that the mother's overall health is more important than age per se. This updated version of Birth Over 35 (Sheldon Press 1994, Birth Over 30, Sheldon Press 1982) provides the specialist information needed by 'older' mothers.

Economics is the science of determining value and making informed decisions. To make a good decision, you need to understand the information available to you and to know what it means to you as an individual. *EXPECTING BETTER* overturns standard recommendations for alcohol, caffeine, sushi, bed rest, and induction while putting in context the blanket guidelines for fetal testing, weight gain, risks of pregnancy over the age of thirty-five, and nausea, among others. Oster offers the real-world advice one would never get at the doctor's office. Knowing that the health of your baby is paramount, readers can know more and worry less. The Bible Will Be My Textbook Raven M. Brown 2021-06-24 Some may read the title and say "I'm not really a religious person" and feel it's not a book they are interested in; but today, when our news feeds are inundated with fake news and propaganda to incite fear and push agenda, leaving us feeling hopeless, lost, defeated, and searching for answers, this is just what you need. I cover some of the main topics that have dominated the news, such as abortion, LGBTQ matters, increased bullying, and suicide, as well as forgiveness, parenting, relationships, and the law of the Lord and the law of the land so that you realize a choice exists that you must make. As laws and norms change, people are feeling confused and conflicted, and we see a society that has lost hope and that needs to know how to navigate through these dark times of uncertainty. If you or someone you know has ever been in a dark place, has lost hope, wavered in faith, wondered what your purpose is, wondered if God exists, sought the truth, felt alone, discouraged, has self-medicated, suffered from addiction and depression, or has contemplated suicide, divorce, an abortion, a sex change, or even getting a tattoo, you will find answers from sound doctrine, with accompanying scriptures, and will discover the mysteries of God as they are unfolded within that will increase your faith and renew your hope in God and mankind. It is my hope, prayer, and belief that upon reading, you will be richly blessed and have a zeal for life that will lead you to a life of prayer, repentance, salvation, and a relationship with God. I hope the kingdom of God will be increased and not only lives but souls will

Babies and Other Hazards of Sex Dave Barry 1984 A syndicated humorist discusses natural breathing and techniques to endure the ordeal of baby showers

Orgasmic Birth Elizabeth Davis 2010-06-08 A guide based on the award-winning coauthor's documentary explains how to render childbirth a natural and enjoyable experience, counseling women on how to take control of their bodies and prepare a birthing plan in accordance with personal needs. Original.

The Poo Bomb Jeff Vogel 2005-03 Author Jeff Vogel did not go into parenthood with any delusions. He knew that he would love his daughter, and that was terrifying. What if he screwed up? And he knew that life with a baby would be different, that it would be filled with an endless stream of filthy diapers, unexplained wailing, and sleepless nights. Not to mention no sex. The parenting books painted a picture of smart, communicative babies and mindless, limitless joy, but he knew they were lying to him. So he wrote his own book. *The Poo Bomb: True Tales of Parental Terror* recounts, in a no-punches-pulled style, the first year of life of Cordelia, Jeff's freshly hatched, gooey human girl. The first year of parenthood isn't about joy or fulfillment. It is about menial labor, wiping up human waste, and marking time until the kid is old enough to run and play and thank you for its life. Jeff chronicles the journey through the morass of year one week by week. Rich with irreverent honesty and humor, *The Poo Bomb* is the reality show of parenting books: It reflects what most parents have sometimes guiltily felt about their not-so-delightful bundles of joy.

Sexual Relations During Pregnancy and the Post-delivery Period Spencer Leon Israel 1970 *Counting on Hope* Laura Schmitt; Jen York; Amy Bowman 2010-02-25 They expected swollen bellies, imagined colorful nurseries, and envisioned bikes in their driveways. When infertility threatened their plans, all five women chose adoption to create a family. With introductions by their fertile friend Jenny, this book includes an intimate look at how Laura, Jen, Amy, Ginger, and Grace found hope as well as motherhood.

Sex at 6pm Annarosa Berman 2006 "Sex at 6pm tells the true story of a 39-year-old journalist, Annarosa Berman, who assumes medical science has made it possible for women to start families in their late 30s and early 40s, only to discover that having a baby on the dark side of 35 is far more difficult than she has imagined. As Annarosa's awareness of infertility issues becomes heightened, newspaper and magazine articles inform her that she is part of a generation of women who believed popular cultures assumptions about delayed motherhood. She discovers that the biological clock will not be turned back and that IVF is unable to churn out the miracle babies women of her generation have come to expect. In the process, she is confronted by a range of issues, including where the desire for procreation comes from, how we develop a sense of belonging, how the concepts of fertility, motherhood and childhood are experienced. Sex at 6pm follows Annarosa and her husband on a gruelling rollercoaster ride through grief and anger to acceptance and, finally (several years later) renewal and contentment. 'IVF at 39 is a race against time, where the first prize is a baby in your arms.'"
