Preventing Sexual Violence on Campus - Sara Carrigan Wooten
2016-12-01

Amid the ongoing national conversation regarding campus sexual assault, this book thoughtfully explores existing programmatic interventions while wrestling with fundamental questions regarding the cultural shifts in our nation's higher education institutions. Stressing the critical importance of student inclusion in policy decisions and procedures, scholars and experts provide complex and nuanced analyses of institutional practices, while exploring themes of race, sexuality, and sexual freedom. This volume addresses many of the unanswered questions in the present dialogue on campus sexual violence, including: What's working and not working? How can outcomes be assessed or measured? What resources are needed to ensure success? This volume provides a truly fresh contribution for higher education and student affairs practitioners seeking to alter, design, or implement effective sexual assault prevention resources at their universities and colleges.

Warrior Guardian's Guide: Children's Abduction and Molestation Prevention Skills - Kenneth R. Haslam 2017-02

This to the point instruction book explains from the first chapter the essential ideas a parent, guardian or anyone working with children must teach to keep children safe from fear and violence in today's world. This is a straightforward reality-based instruction on the aspects of abduction and molestation prevention as taught by Professor Kenneth R. Haslam, World Martial Arts Hall of Fame Inductee who has been teaching parents and thousands of children over the last five decades. 1 in 5 girls and 1 in 7 boys succumb to sexual assault today, and 1 in 42 children go missing. Over 30% of sexual abuse is with children under 12 years of age. But, this is not a book of statistic or psychology, but a practical guide to what to teach and how. As a busy parent or guardian, you must get the facts and implement the safety tools without the need for hours of research. The work has been done for you. The ideas in this book can be use immediately. While this book is a quick read, every topic associated with abduction and molestation prevention has been discussed. The four steps in the ladder of protection, how to leave a veil of protection that no

predator will dare try to pierce when you leave a child with others, how to discuss nudity and sex your way, so your child does not learn things someone else's way, teaching your child without fear, safety on the internet, what to do if your child is lost, what to do if your child is abducted, what are the symptoms to tell if a child is believed to be being molested, fifteen action steps your child must learn to prevent themselves from becoming a victim in the first place. These actions are described in detail, so you know exactly what to teach a child and these actions all come with support tools such as rhymes for little ones to learn. "If you touch me I will tell if you touch me I will yell," "Adults don't ask children for help, adults ask adults for help," are examples of the many tools a parent can use to teach their child without fear at an early age. More, the ten lures predators use to trick children are not only discussed but how to role-play (another valuable tool) to help guarantee your child understands and will carry out the tasks which will keep them safe. Included are the mistakes parents make every day as parents are unaware of the dangers in places taken for granted to be safe. Also, discussed are the mistakes other instructors teach such as the secret word which is an absolute dangerous tool and should not be used. A scenario-based method of teaching a child is presented to parents so a parent can take random opportunities throughout the day to teach valuable lessons through simple observations of others and quick conversations with their child. Additionally, there are thirty-four guidelines for keeping a child safe from both abduction and molestation. This book was written as the need became obvious as I was teaching children martial arts that preventing abduction and molestation was the reality for self-defense in a child's world. While a child could not physically box an adult there were many strategies a child could learn to prevent abduction and molestation, and none were about martial art fighting skills. This book is not about psychology, social science or theory but the tools I personally have used for over five decades that I taught my four children that I am sure will work and help guarantee the safety of your children. Professor Kenneth R. Haslam Founder of the 360X DEFENSE Smart N' Safe Children's Program and has taught thousands

of children and adults over his five-decade career in reality-based martial arts. He is also the author of C.A.R.E.S., Children's Action Response and Escapes Skills, how to escape predators once it gets physical and the soon to be released book B.R.A.V.E., Bully Response, Attitudes, Value, and Empowerment.

Nurturing Future Generations - Rosemary A. Thompson, Ed.D.
2012-11-12

The statistics are pretty grim - young people face an ever increasing tide of poverty, alcohol and drug abuse, violence, suicide, and family dysfunction. Society's response has been slow. Too many young people do not receive consistent, positive, and realistic validation of themselves from those adults on whom they depend. *Nurturing Future Generations*

goes beyond the stilted rhetoric on the problems of youth and the dilemma for society by outlining specific treatment intervention and prevention strategies that address the full spectrum of dysfunctional behavior. It introduces structured intervention strategies for school and community collaboration, with an emphasis on remediation and treatment. Educators and helping professionals will find counseling strategies and psychoeducational techniques that focus on primary prevention. These primary prevention strategies are supported by an understanding of critical social, emotional, and cognitive skills. The new edition provides an increased focus on the positive aspects of youth development, with less emphasis placed on the dysfunctional side of youth behavior. The book addresses emerging research on resiliency and includes increased coverage of best practices for use with troubled youth. A new chapter on LGBT youth issues has been added, and the existing chapters have been substantially revised and updated. The author has reorganized sections within each chapter, adding to the readability and flow of the book, making it more useful as both a professional reference and supplemental text.

These stories from Africa, Asia, Latin America, and the United States tell us of women of varied backgrounds—rural villagers and urban squatters, street vendors and factory workers, professional and office workers, married and single mothers, school girls and college students. women in the United States are a part of the world-wide struggle for women's economic, political, social, and cultural empowerment.

The Educator's Guide To Substance Abuse Prevention - Sanford Weinstein 2012-11-12

The Educator's Guide to Substance Abuse Prevention is for educators and other school personnel who are concerned about student drug use and school violence. It will help them to appreciate and use their humanity, professional skills, educational ideals, and the school curriculum as tools for substance abuse prevention. Teachers' concerns are addressed in several ways. First, the text provides a guide through which they may resolve personal and professional concerns about the commitments, limits, and boundaries of their working relationships with students. Second, it describes tasks that teachers can perform and mental health issues they can address in creating classroom policies, procedures, and rules to promote healthful learning activity in the classroom. Third, the author summarizes and interprets research and theory about substance abuse as they apply specifically to educational prevention and to professional teaching practice--arguing that classroom management strategies, learning activities, and social interaction are a teacher's primary tools of prevention, and showing how teachers may use these tools in any curricular area and without direct reference to drugs. A highlight of this text is its emphasis on helping teachers to explore

drug-related issues from within the context of their own curricular specialties and to integrate substance abuse prevention with the curriculum in many school subjects--including the arts, literature, social studies, history, government, science, and culture. Action-oriented prevention strategies based on these content areas are suggested. The Educator's Guide to Substance Abuse Prevention: *focuses primarily on teaching, learning, and prevention rather than on information about drugs; *helps teachers to better use what they already do, know, and are in order to respond competently, responsibly, and with sensitivity to the needs of their students; *attends to the needs of teachers who do prevention work and the needs of children who are the target of prevention efforts; *describes student disappointment and disillusionment with family, school, and community as sources of risk and the legitimate domain in which teachers may serve a curative role; *provides extensive coverage of historical, social, and cultural issues

related to substance abuse and school violence; and *alerts teachers to the risk to children posed by extremist adult groups, prominent negative role models, popular culture, and peer pressure.
