Relationships and Sex Education 3-11 - Sacha Mason 2019-03-21

'Where do babies come from?' The prospect of this age-old question is one that causes significant apprehension for many professionals working with children, but this isn't where the anxiety ends. This book argues that it is essential to have clear strategies to support children's questions about relationships, growing up and sex so that they are enabled to develop positive and confident views about themselves and those around them. It examines important concerns such as the role of media in children's lives in shaping their views on relationships and explores how issues of gender and sexuality are considered more fluidly. Whether working in an academy, free schools, faith schools, the independent sector or elsewhere this book supports you to help children to deal with a wide range of relationships issues, meeting the requirements of the new legislation on relationships education for primary aged children as a foundation for relationships and sex education. Drawing on research with teachers about their apprehensions about teaching the subject and children's experience of its delivery, the authors give a full picture of common concerns and difficulties and how to successfully meet them and support children from 3-11, and the transition to secondary school. Topics covered include platonic friendships, developing self-respect and respect for others, and enabling personal choice and safety. Sacha Mason and Richard Woolley explore issues surrounding notions of age and stage development. They discuss how children develop at different rates and that each child is unique in relation to learning in this area. They outline a distinct pedagogical approach to managing children's individual needs for relationships and sex education. They also look at

supporting children with SEND when considering how to implement relationships education in primary schools. This second edition includes new chapters on children's development and needs, and developing inclusive relationships education. The book has been updated throughout with summaries of the latest research, case studies, ideas for developing practice and signposts to key websites and resources. The chapters provide all the support you need to confidently promote children's healthy development.

Sex Education in Secondary Schools - Jennifer Harrison 2000

* What are effective teaching and learning styles for sex education? * How can the Health Promoting School create a context for sex education? * How do we interpret the legislation for sex education? This book will be important reading for secondary teachers of all disciplines. It provides a timely consolidation of educational thinking on sex education in schools today, including a consideration of the role of the Health Promoting School. It draws together recent research evidence to consider important aspects such as equal opportunities, school policy

and practice, as well as identifying a moral and social framework for sex education. The practical guidelines are particularly helpful for trainee and newly qualified teachers and provide strategies for introducing, developing and re-visiting key areas of sex education. Some aspects, such as abortion and AIDS education, are highly sensitive areas for teachers to take on, demanding a particular awareness of the surrounding issues and of what might and can be taught in their own school. Crucially they demand a level of self awareness and self confidence for teachers to embark on a variety of appropriate teaching and learning strategies. A range of individual and group activities are provided which are aimed at both beginning and more experienced teachers to stimulate independent learning.

Get Real About Sex - Pam Alldred 2007-07-16

"Up-to-date and accessible, this book manages to be both theoretically subtle and attuned to the realities of classroom practice." Dr Rachel Thomson, The Open University "[This] book is a great success and provides a wealth of insights into the realities of teaching and being taught about sex and relationships." Michael Reiss, Institute of Education

What are the different values and perspectives on sex and relationship education within a single secondary school? How do young people think sex education should be taught? What are the challenges facing the provision of good sex and relationship education at the classroom level and at the political level? Young people often receive mixed messages about gender and sexual relationships. When providing sex education lessons, schools should take into account different ideas and values, including the general British embarrassment over intimate matters and differing political and personal views about sex education. This book combines young people's views of sex education, schooling and parenthood, with those of teachers, school nurses and head-teachers. It brings together these varied perspectives and considers how they reveal different values, aims and agendas. The authors highlight the potential conflict between approaches to education and health, and reveal the complexity of dealing with sexuality and gender in real-life situations. Focusing on young people's identities in the classroom, contemporary theoretical approaches in the social sciences are employed to explore how gender is enacted and experienced by individuals, and how social pressures and government agendas operate at the level of the individual. This book contains original, first-hand empirical material from a detailed study of all the schools in one English city, and offers a critical analysis of broader political and cultural ideas and values. *Get Real About Sex* is

key reading for students and professionals in education, health and the sociology of gender and sexuality.

Exploring Contemporary Issues in Sexuality Education with Young People - Kathleen Quinlivan 2018-10-12

Challenging established approaches to sexuality education, this thought-provoking book shines a new light on alternative perspectives that can help make sexuality and relationships education more relevant and meaningful for young people in a rapidly changing world.
