Sex-Work, Prostitution and Policy Rebecca MF Hewer 2021-09-05 The topic of sex-work/prostitution has long generated contentious debate, particularly within the broad church of feminism. This antagonism is reflected in UK policy debates, which are further complicated by their enactment in spaces of neoliberal hegemony. This book analyses the plurality of narratives which contribute to Westminster sex-work/prostitution policy debates and subsequently seeks to situate them within the social and political conditions of their production. Hewer illustrates that contemporary sex-work/prostitution debates are constituted through a complex entanglement of ideologically hybrid perspectives, which variously challenge and ingrain extant relations of power. Moreover, by drawing on a range of feminist and other critical social theories, Hewer offers a way to think differently about both sex-work/prostitution debates and sex-work/prostitution itself. The book will be a valuable resource for researchers and students from across the social sciences with an interest in the language used to talk about sex-work and prostitution in policy debates.

Sister Wives, Surrogates and Sex Workers Angela Campbell 2016-04-01 Did she choose that?' Or, more normatively, 'Why would she choose that?' This book critiques and offers an alternative to these questions, which have traditionally framed law and policy discussions circulating around controversial genderized practices. It examines the simplicity and incompleteness of choice-based rhetoric and of presumptions that women's conduct is shaped, in an absolute way, either by choice or by coercion. This book develops an analytical framework that aims to discern the meaning and value that women may ascribe to morally ambiguous practices. An analysis of law's approach to polygamy, surrogacy and sex work, particularly in Canada, the United Kingdom and Australia, provides a basis for evaluating the choice-coercion binary and for contemplating alternate modes for assessing, from a law and policy standpoint, the palatability of social practices that appear pernicious to women. Weaving together interdisciplinary research, an innovative analytical framework for assessing choices ostensibly harmful to women, and a critique of the legal rules governing such choices, this book bears relevance for students, scholars, practicing jurists and policymakers seeking a richer understanding of conduct that moves women to the margins of law and society.

Child Sexual Abuse in Victorian England Louise A. Jackson 2013-01-11 Child Sexual Abuse in Victorian England is the first detailed investigation of the way that child abuse was discovered, debated, diagnosed and dealt with in the Victorian and Edwardian periods. The focus is placed on the child and his or her experience of court procedure and welfare practice, thereby providing a unique and important evaluation of the treatment of children in the courtroom. Through a series of case studies, including analyses of the criminal courts, the author examines the impact of legislation at grass roots level, and demonstrates why this was a formative period in the legal definition of sexual abuse. Providing a much-needed insight into Victorian attitudes, including that of Christian morality, this book makes a distinctive contribution to the history of crime, social welfare and the family. It also offers a valuable critique of current work on the history of children's homes and institutions, arguing that the inter-personal relationships of children and carers is a crucial area of study.

prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Consent, Stealthing and Desire-Based Contracting in the Criminal Law Brianna Chesser 2021-12-24
Consent, Stealthing and Desire-Based Contracting in the Criminal Law examines the inconsistencies in the definitions of consent in sexual encounters by examining emerging sex crimes alongside changing community values and the changing legal definitions of consent in sexual offending, focusing on common law and civil law countries. This book distinguishes itself through the use of empirically validated research strategies and an in-depth analysis of current legislative regimes. It argues that desire and pleasure are largely ignored by legal consent definitions, despite its importance in sexuality more broadly. Using two case studies of emerging forms of sexual offending, the criminalisation of sadomasochistic sexual practices and the offence of 'stealthing', it examines how the law is both a blunt and under-utilised instrument in the policing of people's sexual relationships. The presence or absence of consent can change a lawful sexual act between two people into a serious crime with potentially devastating consequences to both survivor and offender. Yet there remains no consistent definition of consent applied within and between legal jurisdictions across the world. A comparative analysis reveals parallels between common law countries and civil law countries. The book also provides a brief history of the use of term consent in relation to sexual offending and examines definitional and sociological requirements of conceptual consent across history. Covering jurisdictions in the US, UK, and Australia, providing an innovative resource on issues relating to consent presented in an accessible way, this book will appeal to students and researchers of criminal justice, criminal law, criminology, sociology and gender studies.

Sex Work and Hate Crime Rosie Campbell 2021-11-09
This book brings together literature, empirical research findings from two projects, and policy analysis to examine how some forces in England have adopted the approach of treating crimes against sex workers as hate crimes. This book identifies some of the benefits of the hate crime approach to crimes against sex workers, both operationally and for some of the victims of crime. The authors argue that the hate crime approach

should not be seen as an alternative to decriminalisation of sex work but can provide a pathway to achieving more sensitive but robust policing of crimes against sex workers and support in accessing justice through the criminal justice system. They also examine the broader context of hate crime policy and scholarship as they debate the relevance, problems and merits of the sex work hate crime model. The book provides another dimension to current theoretical and policy debates about widening definitions and law around hate crime to include other groups beyond existing protected characteristics.

Public Indecency in England 1857-1960 David J. Cox 2015-06-12 Throughout the nineteenth century and twentieth century, various attempts were made to define and control problematic behaviour in public by legal and legislative means through the use of a somewhat nebulous concept of 'indecent'. Remarkably however, public indecency remains a much under-researched aspect of English legal, social and criminal justice history. Covering a period of just over a century, from 1857 (the date of the passing of the first Obscene Publications Act) to 1960 (the date of the famous trial of Penguin Books over their publication of *Lady Chatterley's Lover* following the introduction of a new Obscene Publications Act in the previous year), *Public Indecency in England* investigates the social and cultural obsession with various forms of indecency and how public perceptions of different types of indecent behaviour led to legal definitions of such behaviour in both common law and statute. This truly interdisciplinary book utilises socio-legal, historical and criminological research to discuss the practical response of both the police and the judiciary to those caught engaging in public indecency, as well as to highlight the increasing problems faced by moralists during a period of unprecedented technological developments in the fields of visual and aural mass entertainment. It is written in a lively and approachable style and, as such, is of interest to academics and students engaged in the study of deviance, law, criminology, sociology, criminal justice, socio-legal studies, and history. It will also be of interest to the general reader.

Women, Crime and Criminology (Routledge Revivals) Carol Smart 2013-10-14 First published in 1977, *Women, Crime and Criminology* presents a feminist critique of classical and contemporary theories of female criminality. It addresses the issue that criminology literature has, throughout history, been predominantly male-oriented, always treating female criminality as marginal to the 'proper' study of crime in society. Carol Smart explores a new direction in criminology, and the sociology of deviance, by investigating female crime from a committed feminist position. Examining the types of offences committed by female offenders, Smart points to the fallacies inherent in a reliance on official statistics and shows the deficiencies of the popular argument that female

emancipation has caused an increase in female crime rates. She deals with studies of prostitution and rape and considers the treatment of women - as offenders and victims - by the criminal law, the police and courts, and the penal system. Particular attention is given to the question of lenient treatment for female offenders with the conclusion that women and girls are, in some important instances, actually discriminated against in our legal and penal systems. The relationship between female criminality and mental illness is discussed and the author concludes by dealing with some of the problems inherent in developing a feminist criminology.

Assisted Reproduction, Discrimination, and the Law Michelle Weldon-Johns 2019-10-08 The numbers of women undergoing Assisted Reproduction Technology (ART) treatments have risen steadily, yet they remain largely outside the scope of equality and employment law protection while undergoing treatment. *Assisted Reproduction, Discrimination, and the Law* examines this gap in UK law, with reference to EU law as appropriate, and argues that new conceptions of equality are necessary. Drawing from the literature on multidimensional and intersectional discrimination, it is argued that an intersectionality approach offers a more useful analytical framework to extend protection to those engaged in ART treatments. Drawing from Schiek's intersectional nodes model, the book critically examines two alternative interpretations of existing protected characteristics, namely infertility as a disability, with reference to the social model of disability and the UN Convention on the Rights of Persons with Disabilities 2006, and redefining the boundaries of pregnancy and/or sex discrimination, with reference to attempts to extend associative discrimination

to pregnancy. Comparisons are drawn with the US, where infertility has been recognised as a disability under the American's with Disabilities Act 1990 and as a pregnancy-related condition under the Pregnancy Discrimination Act 1978. A specific right to paid time off work to undergo treatment is also proposed, drawing comparisons with the US Family and Medical Leave Act 1993 and the existing UK work-family rights framework. It is argued that the reinterpretations of equality law and the rights proposed here are not only conceptually possible, but could practically be achieved with minor, but significant, amendments to existing legislation.

Coercive Control Evan Stark 2009 Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.

Cybersex Unplugged David L. Delmonico 2011-01-19 How do you know if you have a cybersex problem? What do you do about it if you do? Maybe someone you care about is struggling with cybersex. This workbook builds on our experience in sexual compulsivity to focus on the nuances of Internet sexual compulsivity. We break down the complex elements of treating cybersex problems into the basic elements for the individual to address. We also highlight issues unique to cybersex including topics such as: psychology of the Internet, cybersex user categories, and understanding, assessing, and managing your Internet use. The three of us represent over 50 years of clinical and research work. One way to help determine if a behavior is problematic is to take a self administered screening test. The Internet Sex Screening Test (included in the workbook) has been taken by thousands of individuals and can be used to help gauge how problematic your online sexual behavior may be. People who exhibit problematic sexual behavior on the Internet tend to fall into one of the three groups: Discovery Group: those who have no previous problem with online sex or any history of problematic sexual behavior. Predisposed Group: those who have had their first out-of-control sexual behavior on the Internet while obsessing over unacted-on sexual fantasies and urges. Lifelong Sexually Compulsive Group: those whose out-of-control sexual behavior on the Internet is part of an ongoing and severe sexual behavior problem. Through this book, you will have opportunities to examine your online sexual behaviors and assess the level of compulsiveness, address related treatment issues to your cybersex behaviors, and develop plans to find sexual health in an electronic world. We hope you find this workbook useful as you strive to find sexual health in an electronic world. One of the major goals of this workbook is to assist you in clarifying healthy sexual behavior, both offline and online. We believe that in order to be healthy online, sexually or otherwise, you must develop healthy sexuality offline as well

Blackstone's Guide to the Equality Act 2010 John Wadham 2012-05-17 The Equality Act 2010 was an extremely significant reform of UK discrimination law, consolidating the existing complex mass of statutory provisions into one statute. The Act brought new rights against discrimination and imposed new duties on employers, service providers and public authorities, and also introduced a new socio-economic duty on public authorities to reduce the inequalities of outcome which result from socio-economic disadvantage. It defined nine protected characteristics: age, disability, combined grounds, gender reassignment, marriage and civil partnership, race, religion or belief, sex, and sexual orientation. Much more is now known about the Equality Act in practice; amendments have been made to the Act itself (such as those made as a consequence of insurance premium and gender cases in the European Court of Justice) and statutory guidance to the Act has been produced. Case law on the new provisions is also starting to appear. This fully revised edition of Blackstone's Guide to the Equality Act 2010 covers all recent developments and clearly and concisely explains the intricacies of the Equality Act. Combining the full text of the Act, as amended, with narrative from an expert team, the book is an invaluable resource for all who encounter the evolving legislation. The Blackstone's Guide Series delivers concise and accessible books covering the latest legislative changes and amendments. Published soon after enactment, they offer expert commentary by leading names on the extent, scope, and effects of the legislation, plus a full copy of the Act itself. They offer a cost-effective solution to key information needs and are the perfect

Sex Offenders and the Internet Dennis Howitt 2009-09-28 Online, the opportunity to commit a crime is never more than a few clicks away. *Sex Offenders and the Internet* explores the nature of online sex offenders in order to help practitioners understand and treat this new category of client. Kerry Sheldon and Dennis Howitt examine the research base by reviewing case studies and psychological profiles, with a particular focus on paedophilic Internet sex offenders. Issues covered include child pornography, the often overlooked 'excuses' for paedophilia, and how we can move forward. The result is a book that comprehensively details the nature of Internet sex offenders, bringing together the relevant research into one essential volume.

Sex Offenders: Punish, Help, Change or Control? Jo Brayford 2013-05-07 Sex offending, and in particular child sex offending, is a complex area for policy makers, theorists and practitioners. A focus on punishment has reinforced sex offending as a problem that is essentially 'other' to society and discourages engagement with the real scale and scope of sexual offending in the UK. This book looks at the growth of work with sex offenders, questioning assumptions about the range and types of such offenders and what effective responses to these might be. Divided into four sections, this book sets out the growth of a broad legislative context and the emergence of child sexual offenders in criminal justice policy and practice. It goes on to consider a range of offences and victim typologies arguing that work with offenders and victims is complex and can provide a rich source of theoretical and practical knowledge that should be utilised more fully by both policy makers and practitioners. It includes work on female sex offenders, electronic monitoring and animal abuse as well as exploring interventions with sex offenders in three different contexts; prisons, communities and hostels. Bringing together academic, practice and policy experts, the book argues that a clear but complex theoretical and policy approach is required if the risk of re-offending and further victimisation is to be reduced. Ultimately, this book questions whether it makes sense to locate responsibility for responding to sexual offending solely within the criminal justice domain.

Why Men Buy Sex Philip Birch 2015-02-20 Sex work has been a contentious issue in a variety of ways throughout history - socially, morally, ethically, religiously and politically. Traditionally noted as one of the oldest professions in the world, sex work has commonly been demonised and is often viewed as a social disgrace. While sex work involves both providers of sexual services, most commonly women, and purchasers of sexual services, most commonly men, providers have attracted the most social commentary. Recent research shows that a limited number of studies have been conducted since 1990 concerning men who procure sexual services. This book aims to help reset this balance. In this book, Philip Birch examines the procurement of female sexual services with a focus on the personal and social aspects of men who procure such exchanges and offers insight into the demographics amongst men who purchase sexual services, alongside an analysis of the reasons why they purchase sex. This book brings together existing literature with analyses of new data to develop a multi-factor model reflecting men's procurement of sexual services and demonstrates the complexities surrounding the procurement of these sexual services in exchange for money. The book considers what contribution the understanding of the personal and social aspects of men who procure sexual services has on re-theorising the purchasing of sex in the 21st Century and will be of interest to academics and students involved in the study of criminology, criminal justice, social policy, law, sociology, sexuality and gender studies.

Ministry of Justice - Code of Practice for Victims of Crime Great Britain: Ministry of Justice 2013-10-29 This Code of Practice for Victims of Crime forms a key part of the wider Government strategy to transform the criminal justice system by putting victims first, making the system more responsive and easier to navigate. Victims of crime should be treated in a respectful, sensitive and professional manner without discrimination of any kind. They should receive appropriate support to help them, as far as possible, to cope and recover and be protected from re-victimisation. It is

important that victims of crime know what information and support is available to them from reporting a crime onwards and who to request help from if they are not getting it. This Code sets out the services to be provided to victims of criminal conduct by criminal justice organisations in England and Wales. Criminal conduct is behaviour constituting a criminal offence under the National Crime Recording Standard. Service providers may provide support and services in line with this Code on a discretionary basis if the offence does not fall under the National Crime Recording Standard (NCRS) (see the glossary of key terms found at the end of this Code). Non-NCRS offences include drink driving and careless driving. This Code also sets a minimum standard for these services. Criminal justice organisations can choose to offer additional services and victims can choose to receive services tailored to their individual needs that fall below the minimum stand

Butterfly Politics Catharine A. MacKinnon 2019-04-02 “Sometimes ideas change the world. This astonishing, miraculous, shattering, inspiring book captures the origins and the arc of the movement for sex equality. It’s a book whose time has come—always, but perhaps now more than ever.” —Cass Sunstein, coauthor of *Nudge* Under certain conditions, small simple actions can produce large and complex “butterfly effects.” *Butterfly Politics* shows how Catharine A. MacKinnon turned discrimination law into an effective tool against sexual abuse—grounding and predicting the worldwide #MeToo movement—and proposes concrete steps that could have further butterfly effects on women’s rights. Thirty years after she won the U.S. Supreme Court case establishing sexual harassment as illegal, this timely collection of her previously unpublished interventions on consent, rape, and the politics of gender equality captures in action the creative and transformative activism of an icon. “MacKinnon adapts a concept from chaos theory in which the tiny motion of a butterfly’s wings can trigger a tornado half a world away. Under the right conditions, she posits, small actions can produce major social transformations.” —New York Times “MacKinnon [is] radical, passionate, incorruptible and a beautiful literary stylist... *Butterfly Politics* is a devastating salvo fired in the gender wars... This book has a single overriding aim: to effect global change in the pursuit of equality.” —The Australian “Sexual Harassment of Working Women was a revelation. It showed how this anti-discrimination law—Title VII—could be used as a tool... It was the beginning of a field that didn’t exist until then.” —U.S. Supreme Court Justice Ruth Bader Ginsburg

Expert evidence in criminal proceedings in England and Wales Great Britain: Law Commission 2011-03-22 This project addressed the admissibility of expert evidence in criminal proceedings in England and Wales. Currently, too much expert opinion evidence is admitted without adequate scrutiny because no clear test is being applied to determine whether the evidence is sufficiently reliable to be admitted. Juries may therefore be reaching conclusions on the basis of unreliable evidence, as confirmed by a number of miscarriages of justice in recent years. Following consultation on a discussion paper (LCCP 190, 2009, ISDBN 9780118404655) the Commission recommends that there should be a new reliability-based admissibility test for expert evidence in criminal proceedings. The test would not need to be applied routinely or unnecessarily, but it would be applied in appropriate cases and it would result in the exclusion of unreliable expert opinion evidence. Under the test, expert opinion evidence would not be admitted unless it was adjudged to be sufficiently reliable to go before a jury. The draft Criminal Evidence (Experts) Bill published with the report (as Appendix A) sets out the admissibility test and also provides the guidance judges would need when applying the test, setting out the key reasons why an expert's opinion evidence might be unreliable. The Bill also codifies (with slight modifications) the uncontroversial aspects of the present law, so that all the admissibility requirements for expert evidence would be set out in a single Act of Parliament and carry equal authority.

HM Government: Serious Organised Crime Strategy - Cm. 8715 Great Britain: Home Office 2013-10-07 This is a new strategy to deal with the challenges we face from serious and organised crime. It is published to coincide with the launch of the new National Crime Agency (NCA) and reflects changes to the threats faced and the lessons learned from previous work. Organised crime

includes drug trafficking, human trafficking, and organised illegal immigration, high value fraud and other financial crimes, counterfeiting, organised acquisitive crime and cyber crime. The aim of the strategy is to substantially reduce the level of serious and organised crime affecting the UK and its interests. The strategy uses the framework developed for our counter-terrorist work and has four components: prosecuting and disrupting people engaged in serious and organised crime (Pursue); preventing people from engaging in this activity (Prevent); increasing protection against serious and organised crime (Protect); and reducing the impact of this criminality where it takes place (Prepare). The strategy lists strategic objectives under each of the four areas of work. Tactical operational objectives (e.g. priority crime groups) will be set by the NCA with law enforcement agency counterparts. Our immediate priority is the work set out under Pursue to prosecute and relentlessly disrupt organised criminals and reduce the threat they pose. Like other threats to our national security, serious and organised crime requires a response across the whole of government, and close collaboration with the public, the private sector and with many other countries

Family Law Challenges in a Changing Society Alicia Danielsson 2014-08-05 Research Paper (undergraduate) from the year 2014 in the subject Law - Civil / Private / Family Law / Law of Succession, grade: A - Excellent, University of Hertfordshire, course: Independent Legal Study, language: English, abstract: There are many ways to define marriage and there are numerous perspectives on which these definitions can be based. Every country or even state has its own legal definition, each culture will have its own cultural and sociological definition, religions will have their own religious definitions and even each era will have its own anthropological definition. The British anthropologist Eleanor Kathleen Gough Aberle defined marriage in 1959 as „a relationship established between a woman and one or more other persons, which provides that a child born to the woman under circumstances not prohibited by the rules of the relationship, is accorded full birth-status rights common to normal members of his society or social stratum.“ For statistical purposes the United Nations have recommended the following definition: „the legal union of persons of opposite sex. The legality of the union may be established by civil, religious, or other means as recognised by the laws of each country; and irrespective of the type of marriage, each should be reported for vital statistics purposes.“ It is particularly interesting that the United Nations have added the word “legal” to their definition which provides the institution of marriage with a legal dimension. In the book “A practical treatise on the law of marriage and divorce“, Leonard Shelford explains that “Marriage, in its origin, is a contract of natural law antecedent to its becoming in civil society a civil contract, regulated and prescribed by law and endowed with civil consequences.” However, the past decades have experienced a decline in marriages amongst the British population as well as a substantial increase of cohabiting partners, who share the same domicile without having some form of contract governing the relationship. This has given rise to various approaches as to how relationships and families in particular are to be regulated. The following discussion will begin by taking a look at the current situation in England and Wales. Hereafter, points 3 and 4 will provide a theoretical foundation of the development of marriage and families as well as laws and justice. Finally, the last two points will discuss the recommended reform of the laws governing cohabitation and the current marriage scepticism which is growing in feminist and liberal jurisprudence.

Code of Practice for Adult Conditional Cautions Great Britain: Ministry of Justice 2013-01-09 Dated January 2013

Domestic Violence Sarah Hilder 2016-06-29 This book presents a variety of socio-legal perspectives on issues of domestic violence and abuse. Focussing on contemporary research and practice developments in policing, law, statutory and voluntary sectors, the contributors to this volume cover a vast spectrum of initiatives and professional expertise concerned variably with protection, prevention and intervention priorities. The challenges of “joined up” thinking across

these perspectives are apparent as the varied definitions, underpinning ideologies, terminologies, the profile of the victim/survivor's voice and identified gaps in service provision appearing in this book illustrate. As a reflection on the current economic climate, some of the perspectives presented necessarily compete rather than complement each other, an issue the volume highlights and addresses. Achieving a broader understanding of these issues and insights into a range of activity in this context is vital for both the practitioner and academic alike, whatever their perspective./div
