*Dangerousness, Risk and the Governance of Serious Sexual and Violent Offenders* is a fully up-to-date, comprehensive and user-friendly guide on those offenders who are often assessed as being dangerous. Outlining,

evaluating and commenting on specific methods, regimes and strategies for dealing with dangerous offenders throughout each chapter, this book begins by considering what a dangerous offender is and providing a brief historical account of how the label has been used for different types of offender over the last three or four centuries. The book examines sentencing policy in addition to early and current dangerousness legislation, evaluating the available sentences specifically designed for dangerous offenders and assessing their use and appropriateness. The role of risk and risk assessment tools is discussed, considering what risk assessment is, the way in which it works and how over recent times it has become more reliable and valid. It looks at the practical realities of how serious sexual and violent offenders are dealt with by the penal system in England and Wales. Finally, specific offender groups are considered, including female offenders, children and young people and mentally disordered offenders. Each chapter considers whether there are any differences in terms of policy, assessment and management strategies when sentencing and managing each distinct group; and if not whether any such modifications are required. This book will be key reading for students of law, criminology, social policy, psychology and sociology and of interest to criminal justice professionals including the police, prison officers, probation officers, psychologists, lawyers and judges.

Counselling Male Sexual Offenders - Andrew Smith 2017-11-22

*Counselling Male Sexual Offenders: A Strengths-Focused Approach* informs readers how to utilize an easily accessible, integrative, strengths-focused counselling approach with men who pose a sexual risk. There is currently a scarcity of published material which teaches people in a practical way how to conduct one-to-one counselling with different sorts of male sex offenders. However, as the number of internet offenders increases exponentially and more historic abuse cases emerge, understanding and treating the phenomenon of sex offending can play a significant role in preventing sexual crime and reducing harm to victims. In addition to being a 'how to do book', in *Counselling Male Sexual Offenders* the author explores at depth the inner processes of counsellors working with this client group. It presents treatment formats and exercises for engaging individuals who deny and minimize harmful sexual behaviour. With illustrative case studies of various types of sex offenders - as well as statements from sex offenders and probation officers themselves - this text provides one of the most comprehensive insights available into the authentic experience of treating this population. *Counselling Male Sexual Offenders* will be of value to counsellors and psychotherapists, alongside other practitioners such as psychologists, social workers, probation officers, and support workers.

### **High Risk Sexual Offenders - 2005**

High risk offenders are a complex and heterogeneous group of offenders about whom researchers, clinicians, and society still know relatively little. In response to the paucity of information that is specifically applicable to high risk offenders, the present study examined RCMP Integrated Sexual Predator Intelligence Network (ISPIN) data to investigate the relationship between sexual paraphilias, sexual fantasy,

and psychopathy among 139 of the highest risk sexual offenders in British Columbia. The sample included 41 child molesters, 42 rapists, 18 rapist/molesters, 30 mixed offenders, and 6 "other" sexual offenders. The majority of offenders in this sample were diagnosed with one primary paraphilia (67%). Data analysis revealed significant differences between offender types for criminal history variables including past sexual and nonsexual convictions, number of victims, and age of offending onset. For example, offenders who victimized children (i.e., exclusive child molesters & rapist/molesters) had a greater number of past sexual convictions than did offenders who victimized adults exclusively. Further, there were significant differences between offender types for paraphilia diagnoses, sexual fantasy themes, and levels of psychopathy. For example, exclusive child molesters were significantly more likely to receive a paraphilia diagnosis, were more likely to report having sexual fantasies, and had lower Psychopathy Checklist Revised (PCL-R) scores than other offender types. Results from the current study will serve to facilitate a more refined and informed understanding of sexual offending behaviour, with important implications for future research, assessment, and treatment issues, as well as law enforcement practices when working with high risk sexual offenders.

### European Treatment, Transition Management and Re-Integration of High-Risk Offenders - Frieder Dünkler 2016-02-29

All over Europe, the question of how best to manage and implement the resettlement and reintegration of released prisoners in society has become increasingly important. Transition management requires work in custody as well as cooperation and co-ordination between criminal justice agencies, statutory and voluntary providers and other partners involved in the offender's resettlement and reintegration. The objective of the project "Justice Cooperation Network - European treatment and transition management of high-risk offenders" has been to address these questions and to develop effective and efficient management principles, processes and practices for highrisk offenders leaving custody that can be shared and used by the project partners and across Europe. The project team comprises the responsible bodies from four project partner

states, Estonia, Finland, Ireland and Mecklenburg-Western Pomerania (Germany). The Ministry of Justice and Prison Service of Belgium, the Ministry of Justice and Public Administration of the Republic of Slovenia, the Ministry of Justice of the Slovak Republic, the Confederation of European Probation (CEP) and the Federal Ministry of Justice and Consumer Protection in Germany are associated partners in the project. The publication is structured according to the programme of the final conference in Warnemünde in September 2014.

**Understanding the Management of High Risk Offenders** - Hazel Kemshall 2008-09-16

"This is an extremely important and timely book written by a pre-eminent scholar in the field. Hazel Kemshall has a proven track record not just of exceptional scholarship but, equally importantly, of engaging effectively with policy and practice. Given the damaging synergies between media hype and public insecurities about 'dangerous' offenders, the evidence-based, measured and thoughtful analysis provided in this book provides a vital counterpoint to increasingly punitive and exclusionary discourses around public protection. In promoting a more balanced, humane and integrative approach to risk, the book deserves to influence not just scholars but also policy makers and practitioners facing the complex challenges of managing risk and dangerousness." Fergus McNeill, Associate Fellow of the Centre for Sentencing Research, Strathclyde University, UK High risk offenders have attracted much media, policy and practice interest in recent years. New legislation and extensive multi-agency partnerships have been initiated to improve the assessment and management of these offenders in the community. Drawing on a wide range of cross-national literature and original research by the author, this timely book reviews current approaches to the community management of high risk offenders. The book examines in detail a range of risk management techniques, including: Community protection measures (such as sexual offender registration and community notification) Restorative and re-integrative measures (such as Circles of Support and Accountability, pro-social modelling, public health campaigns and environmental risk management approaches) Hazel

Kemshall argues for a 'blending' of these two approaches to provide risk management interventions for the 'protective integration' of high risk offenders back into the community. In addition, the book examines contemporary difficulties in risk assessment, effective multi-agency partnership working, and recent policy and legislative initiatives in this challenging area of work. Understanding the Management of High Risk Offenders is a vital resource for criminology and criminal justice students and stimulating reading for probation officers, social workers, police and prison staff, among others.

**Assessment and Treatment of Sex Offenders** - Anthony R. Beech 2009-03-04

Includes material on managing offenders with developmental disabilities and those with Dangerous and Severe Personality Disorder.

**Abuse in Society** - Alan R. Kemp 2016-11-11

Today's headlines are filled with increasingly alarming accounts of abuse by coaches, religious leaders, institutional caregivers, family members, and others. Abuse in Society provides an illuminating and timely introduction to the physical, emotional/psychological, and sexual faces of abuse. The text presents a much-needed, in-depth assessment of child maltreatment, intimate partner violence, abuse by clergy, abuse of the elderly and disabled, and abuse in sports. Among the specific problems covered are bullying and sibling abuse, courtship violence and date rape, and abuse in the relationships of sexual minorities. The author explores these complex issues using an ecological approach, examining interacting explanations from a variety of perspectives and levels of analysis: societal and cultural, family, and individual. The author's down-

to-earth, conversational style is easy to understand, and his work is exceptionally well researched and thoroughly documented. Those who are pursuing careers in the fields of sociology, psychology, psychiatry, and human-service professions such as social work, pastoral counseling, mental health counseling, marriage and family therapy, and psychiatric nursing will find this text valuable. End-of-chapter resources include a Review Guide, Critical Thinking Questions, Recommended Reading, Internet Resources, and Suggested Activities.
