Douyin, TikTok and China's Online Screen Industry - Chunmeizi Su 2023-09-22

TikTok has drawn attention from all over the world. Even if you have never used it before, you would still be familiar with its name. Many people have assumed that it is a US-generated platform, and normally awed at its real origin - a Chinese born and operated platform, a sister or parallel platform of Douyin. Because of the short-video platform-TikTok, and also its dispute with the US government, people have started to paying attention to what is really happening and changing in China. Two questions that hang over everyone's mind seem to be: why China? And why TikTok? This book attempted to answer the question of why short-video platforms such as TikTok—the most popular 'made in China' product of all the Chinese digital platforms—became a significant competitor on the global stage. This book explores the reasons behind the rise of short video platforms in China, with a focus on the sudden and unexpected success of TikTok and its parallel platform Douyin. Beginning with the historical

development of China's online screen industry, the book goes on to investigate the ICT industry, its business models and impact on the screen industry, to unfold the reasons behind the domestic popularity of Douyin. It draws on a spectrum of sources including policy documents, industry reports and expert analysis, which is supplemented by interviews with key people in the field. It traces the changing dynamics of the Chinese online screen ecology, and shows how a mixture of technological, industrial and cultural factors contributed to the proliferation of short-video platforms in China. This engaging and topical book will be ideal reading for students and scholars of media and communication studies, platform studies, and political economy studies.

The Fundamentals of Personal Branding and Marketing - Richard Works 2019-10-28

When it comes to building a personal brand, some people dismiss the process as being too time-consuming, or not that important. To be honest, you will have to devote time and energy to self-branding properly. Consistency and quality are key to getting the best out of your branding exercise. But the idea that building a

personal brand is not essential is just false, and here's why: People are Googling you at every stage of your career. Regardless of your age or professional stage, someone is screening you online. What they find can have significant implications for your professional (and personal) well-being. Personal branding gives you the chance to control how clients and prospects see you. It gives you the opportunity to ensure that no one but you manipulate and control the narrative. This book discusses all about personal branding and marketing.
