**Kittens and Cats Meowing to Your Heart** Lisa Dobbton 2013-06-05 "You Are About To Discover The Secrets of Having a More Rewarding Relationship With Your New Kitten Than You Ever Thought Possible!" Cat Experts, Lisa & Harold Dobbton Reveals All The Secrets of Raising a Perfectly Behaved, Healthy, and Happy Cat! It's no surprise to find out that bringing home a new cat is almost like brining home a new baby into the

house. That's because they are really almost the same thing. Sure, cats have instincts (what living creature doesn't...) but when their paws first touch your floor they are in a new world. Everything seems like a playground to them. Your christmas decorations are now chew toys. Your family portrait is a new sliding surface, and your furniture are scratching posts. It may seem daunting, even intimidating to own a new kitten, but as a cat owner for several years I can tell you that having a loving companion that you can always come home to is always worth it. Cats are more than just pets. They are our friends. The warmth that they bring us on a day to day basis, the unconditional love that they greet us with each morning, all of these qualities make it worthwhile to take care of a a new cat. So I bet you are saying... Having The Perfect Cat Sounds Nice - But How? A common joke by cat experts is you can never train a cat, they just train you. And that's more true than we probably think. Take a second and really think about it. You see a cat is behaving nicely, and you think "wow, they did a good job raising this cat" but you are thinking in human eyes. A cat trains us by having us feed it and clean it's litter box daily. It cries, and we answer. Sure, doing these things may be enjoyable for you, but in essence, are you training the cat or is the cat training you? Okay okay, enough philosophical mumble-jumble. Cats can be trained. It's true that cats are very self-reliant creatures, and you may notice that they tend to themselves, but unless you want your cat to run your house they're are effective training methods that exist that will help you and your cat both understand each other. Better! Most people go about training their cats a wrong way. So wrong in fact, that many methods that owners think "work" for their cat is actually making their relationship with their cats worse. You can have an unbreakable bond with your cat, but you have to learn how to see the world through their eyes. For example, cats don't "learn" by scolding them. Every time you scold or yell at your cat when they throw up on your rug, or make in the wrong place, you may think you've won when your cat runs scattering away, but really, you are just scaring them, and confusing them. Quick Tip: Cats learn by rewards. You can't "punish" a cat for bad behavior, but you can reward a cat with good behavior in order to encourage it to repeat a desired action. The great thing about raising a kitten is that you are forming a bond with a cat at the earliest stage of it's life. That means if you get it right, you and your cat will have an iron-clad bond that won't be broken for anything. But if you get it wrong, the reverse is also true. Don't leave your relationship with your cat up to chance, you can understand your new kitten and raise it the way you want to! All our years of owning and watching over cats we learned what cats respond to, and what they hate. Our cats let us know everything we need to know about them, we just need to look for the signs. Body language, eyes, temperament, etc all tell us what we need to know to better bond with our cat. Our Book will tell you all you need to know to raise your own kitten into a healthy, behaved cat. ~~~~Lisa & Harold Dobbton~~~~~

Cat Sense John Bradshaw 2013-09-10 Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on the planet, and yet cats remain more mysterious, even to their most adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite "get us" the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company. In *Cat Sense*, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to understand their inherited quirks: understanding their body language, keeping their environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats. A must-read for any cat lover, *Cat Sense* offers humane, penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets' lives—and ours.

**The Trainable Cat** John Bradshaw 2016-08-04 'Amazing' Guardian From the on-screen experts for BBC2's Cat Watch, and based on their groundbreaking research - this is the ultimate guide to making your cat a happier, more sociable animal. The idea of a trained cat is a contradiction in terms, isn't it? Naturally solitary, wary, easily threatened by newcomers, they are attached to place rather than people, and much of their 'antisocial' behaviour arises in situations where that attachment is threatened. But, as cat experts Sarah Ellis and John Bradshaw argue, such stress-induced behaviour can be prevented, reduced, even eliminated, by training. A comprehensive and engaging step-by-step guide, The Trainable Cat will help you to help your cat negotiate the complexities of everyday life: to enjoy living with humans - including new babies and lively toddlers - and other pets; to answer to their name; settle into a new home; and to overcome the anxiety of a visit to the vet. You can train your cat to do what is in its own best interests - even when its instincts tell it otherwise.
