

# Emergency Sex And Other Desperate Measures

*Chasing Chaos* - Jessica Alexander 2013-10-15

Jessica Alexander arrived in Rwanda in the aftermath of the 1994 genocide as an idealistic intern, eager to contribute to the work of the international humanitarian aid community. But the world that she encountered in the field was dramatically different than anything she could have imagined. It was messy, chaotic, and difficult—but she was hooked. In this honest and irreverent memoir, she introduces readers to the realities of life as an aid worker. We watch as she manages a 24,000-person camp in Darfur, collects evidence for the Charles Taylor trial in Sierra Leone, and contributes to the massive aid effort to clean up a shattered Haiti. But we also see the alcohol-fueled parties and fleeting romances, the burnouts and self-doubt, and the struggle to do good in places that have long endured suffering. Tracing her personal journey from wide-eyed and naïve newcomer to hardened cynic and, ultimately, to hopeful but critical realist, Alexander transports readers to some of the most troubled locations around the world and shows us not only the seemingly impossible challenges, but also the moments of resilience and recovery.

**Between Peril and Promise** - J. Martin Rochester 2011-11-08

In this concise introduction to international law, students gain a clear appreciation for how politics shapes the development of international law, and how international law shapes political relations between states. Throughout the book, Rochester takes this complex subject and makes it accessible with his vibrant, easy-to-read prose.

*Backstabbing for Beginners* - Michael Soussan 2010-06-01

A riveting, first-person account of the backstabbing and hypocrisy that led to the U.N.'s Oil-for-Food Program becoming the most corrupt enterprise ever overseen by the international community.

**Emergency Sex (and Other Desperate Measures)** by **Kenneth Cain, Heidi Postlewait and Andrew Thomson** - Llewellyn Johns 2006

**Five to Rule Them All** - David L. Bosco 2009

From the Berlin Airlift to the Iraq War, the UN Security Council has stood at the heart of global politics. Part public theater, part smoke-filled backroom, the Council has enjoyed notable successes and suffered ignominious failures, but it has always provided a space for the five great powers to sit down together. *Five to Rule Them All* tells the inside story of this remarkable diplomatic creation. Drawing on extensive research, including dozens of interviews with serving and former ambassadors on the Council, the book chronicles political battles and personality clashes as it opens the closed doors of its meeting room. What emerges here is a revealing portrait of the most powerful diplomatic body in the world. When the five permanent members are united, David Bosco points out, the Council can wage war, impose blockades, redraw borders, unseat governments, and levy sanctions. There are almost no limits to its authority. Yet the Council exists in a world of realpolitik. Its members are, above all, powerful states with their own diverging interests. Time and again, the Council's performance has dashed the hope that its members would somehow work together to establish a more peaceful world. But if these lofty hopes have been unfulfilled, the Council has still served an invaluable purpose: to prevent conflict between the Great Powers. In this role, the Council has been an unheralded success. As Bosco reminds us, massacres in the Balkans and chaos in Iraq are human tragedies, but conflicts between the world's great powers in the nuclear age would be catastrophic. In this lively, fast-moving, and often humorous narrative, Bosco illuminates the role of the Security Council in

the postwar world, making a compelling case for the enduring importance of the five who rule them all.

**Band-Aid for a Broken Leg** - Damien Brown 2017-01-01

Damien Brown thinks he's ready when he arrives for his first posting with Medecins Sans Frontieres in Africa. But the town he's sent to is an isolated outpost of mud huts, surrounded by landmines; the hospital, for which he's to be the only doctor, is filled with malnourished children and conditions he's never seen; and the health workers - Angolan war veterans twice his age who speak no English - walk out on him following an altercation on his first shift. In the months that follow, Damien confronts these challenges all the while dealing with the social absurdities of living with only three other volunteers for company. The medical calamities pile up - leopard attacks, landmine explosions, performing surgery using tools cleaned on the fire - but as Damien's friendships with the local people evolve, his passion for the work grows. Written with great warmth and empathy, *Band-Aid for a Broken Leg* is a compassionate, deeply honest and often humorous account of life on the medical frontline in Angola, Mozambique and South Sudan. It is also a moving testimony to the work done by medical humanitarian groups and the remarkable, often eccentric people who work for them.

**Psychic Self-Defense** - Dion Fortune 2020-12-12

A new edition of an occult classic, which includes a new introduction by Mary K. Greer, author of *Women of the Golden Dawn*, and a new afterword with excerpts from rarely seen documents by Fortune herself describing how the book came about. After finding herself the subject of a powerful psychic attack in the 1930s, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defense guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defense. Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognize them. This is one of the best guides to detection and defense against psychic attack from one of the leading

occult writers of the twentieth century. This Weiser Classics edition of Dion Fortune's *Psychic Self-Defense* includes a new forward by Mary K. Greer, author of numerous books including *Tarot for Your Self*, and a new afterword by Christian Gilson that chronicles the original context surrounding Dion Fortune's writing of the book. Mr. Gibson is the editor of *The Inner Light*, the journal published by the Society of Inner Light. [The Politics of the Final Hundred Years of Humanity \(2030-2130\)](#) - Ian Cook 2020-02-04

This book is the first book that looks at both the politics of maintaining the trajectory toward humanity's final hundred years and the politics of those final hundred years. It is the first book to take up theoretical and practical aspects with respect to both the movement toward and events during these final hundred years. As a result, it is the first book that attempts to provide a more complete picture of the politics of catastrophic human-caused environment change. The fact that the book provides a way into the variety of policy problems that catastrophic human-caused environment change is creating means that it is also important to those in Public Policy. The book also raises a series of philosophical and ethical questions associated with human rights, which are significant to those who study Political Philosophy (and some of those who study Law), international action to mitigate the effects of climate change, the nature of science and the limitations of political institutions. *Emergency Sex (and Other Desperate Measures)* - Kenneth Cain 2004 "It's early 1990s and three young people, working for the UN and Red Cross in Cambodia, become friends in the heady atmosphere of the country's first democratic elections. All of them have been attracted to peace-keeping, in countries both dangerous and alluring, for different reasons. Heidi is in need of a challenge and a pay cheque, Ken is full of idealism and Andrew strives to create a better world through his work as a doctor. As the Cold War ends and the New World Order dawns the three become friends for life. But their journey through a violetn decade, from Rwanda and Bosnia to Somalia and Haiti, challenges their lives and personalities, leaving them utterly changed - both broken and enriche. In this powerful, devastatingly honest memoir, Andrew, Heidi and Ken

mingle their distinct voices to paint a searing portrait of life amidst war and genocide, whilst giving eye-witness accounts of the thousands of lives that have been destroyed in countries such as Rwanda by the inactivity and greed of the West"--Back cover.

*The Crisis Caravan* - Linda Polman 2011-08-30

In her controversial, no-holds-barred exposé Linda Polman shows how a vast industry has grown up around humanitarian aid. The Crisis Caravan takes us to war zones around the globe, showing how aid operations and the humanitarian world have become a feature of military strategy. Impassioned, gripping, and even darkly absurd, journalist Linda Polman "gives some powerful examples of unconscionable assistance...a world where aid workers have become enablers of the atrocities they seek to relieve" (The Boston Globe).

**The Paradoxes of Aid Work** - Silke Roth 2015-03-24

This book explores what attracts people to aidwork and to what extent the promises of aidwork are fulfilled. 'Aidland' is a highly complex and heterogeneous context which includes many different occupations, forms of employment and organizations. Analysing the processes that lead to the involvement in development cooperation, emergency relief and human rights work and tracing the pathways into and through Aidland, the book addresses working and living conditions in Aidland, gender relations and inequality among aid personnel and what impact aidwork has on the life-courses of aidworkers. In order to capture the trajectories that lead to Aidland a biographical perspective is employed which reveals that boundary crossing between development cooperation, emergency relief and human rights is not unusual and that considering these fields as separate spheres might overlook important connections. Rich reflexive data is used to theorize about the often contradictory experiences of people working in aid whose careers are shaped by geo-politics, changing priorities of donors and a changing composition of the aid sector. Exploring the life worlds of people working in aid, this book contributes to the emerging sociology and anthropology of aidwork and will be of interest to professionals and researchers in humanitarian and development studies, sociology, anthropology, political science and

international relations, international social work and social psychology.

**Spaces of Aid** - Lisa Smirl 2015-03-12

Aid workers commonly bemoan that the experience of working in the field sits uneasily with the goals they've signed up to: visiting project sites in air-conditioned Land Cruisers while the intended beneficiaries walk barefoot through the heat, or checking emails from within gated compounds while surrounding communities have no running water. Spaces of Aid provides the first book-length analysis of what has colloquially been referred to as Aid Land. It explores in depth two high-profile case studies, the Aceh tsunami and Hurricane Katrina, in order to uncover a fascinating history of the objects and spaces that have become an endemic yet unexamined part of the delivery of humanitarian assistance.

*Emergency Sex and Other Desperate Measures* - Kenneth Cain

2004-06-09

"This is a true story about three friends trying to bring a bit of decency to some of the most savage and indecent spots on our planet." Back cover.

*White Noise* - Don DeLillo 2011-11-21

Now a major new Netflix film from Noah Baumbach, starring Adam Driver and Greta Gerwig How strange it is. We have these deep terrible lingering fears about ourselves and the people we love. Yet we walk around, talk to people, eat and drink. We manage to function. The feelings are deep and real. Shouldn't they paralyze us? Jack Gladney is the creator and chairman of Hitler studies at the College-on-the-Hill. This is the story of his absurd life; a life that is going well enough, until a chemical spill from a train carriage releases an 'Airborne Toxic Event' and Jack is forced to confront his biggest fear - his own mortality. White Noise is an effortless combination of social satire and metaphysical dilemma in which Don DeLillo exposes our rampant consumerism, media saturation and novelty intellectualism. It captures the particular strangeness of life lived when the fear of death cannot be denied, repressed or obscured and ponders the role of the family in a time when the very meaning of our existence is under threat. 'America's greatest living writer.' - Observer Part of the Picador Collection, a series

showcasing the best of modern literature.

*Communities in Action* - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

*Desperate Measures* - Katee Robert 2020-12-09

Once upon a time, I was a princess in a tower. One night, and my entire life went up in flames. All because of him. Jafar. As my world burned down around me, he offered me a choice. Walk away with nothing but my freedom... Or rise to his challenge and win my fortune back. I bargained. I lost. Now Jafar owns me, body and soul. Even as my mind rails against his rules, my body loves the punishments he deals out when I break them. But a gilded cage is still a prison, I'll do anything to obtain my freedom. Even betray the man I'm falling for. In *DESPERATE MEASURES*, you'll find: -> Enemies to lovers -> Captive Heroine -> Kinky Roleplay -> Daddy/baby girl -> Alpha hero

*Emergency Sex (And Other Desperate Measures)* - Andrew Thomson

2011-05-31

What it's really like on the frontline of humanitarian aid It's the early 1990s and three young people are looking to change their lives, and perhaps also the world. Attracted to the ambitious global peacekeeping work of the UN, Andrew, Ken and Heidi's paths cross in Cambodia, from where their fates are to become inextricably bound. Over the coming years, their stories interweave through countries such as Rwanda, Bosnia, Somalia and Haiti - war-torn, lawless places where the intervention of the UN is needed like nowhere else. Driven by idealism, the three struggle to do the best they can, caught up in an increasingly tangled web of bureaucracy and ineffectual leadership. As disillusionment sets in, they attempt to keep hold of their humanity through black humour, revelry and 'emergency sex'. Brutal and moving in equal measure, *Emergency Sex (And Other Desperate Measures)* explores pressing global issues while never losing a sense of the personal. Deeply critical of the West's indifference to developing countries and the UN's repeated failure to intervene decisively, the book provoked massive controversy on its initial publication. Kofi Annan called for the book to be banned, and debate was sparked about the future direction of the UN. Brilliantly written and mordantly funny, it is a book that continues to make waves.

*Unintended Consequences of Peacekeeping Operations* - Chiyuki Aoi 2007

The deployment of a large number of soldiers, police officers and civilian personnel inevitably has various effects on the host society and economy, not all of which are in keeping with the peacekeeping mandate and intent or are easily discernible prior to the intervention. This book is one of the first attempts to improve our understanding of unintended consequences of peacekeeping operations, by bringing together field experiences and academic analysis. The aim of the book is not to discredit peace operations but rather to improve the way in which such operations are planned and managed.

*The Bone Woman* - Clea Koff 2014-01-02

In the Spring of 1994, Rwanda was the scene of the first acts since the

Second World War to be legally defined as genocide. Two years later, Clea Koff, a twenty-three-year-old forensic anthropologist, was one of sixteen scientists chosen by the United Nations International Criminal Tribunal to go to Rwanda to unearth physical evidence of war crimes and crimes against humanity. *The Bone Woman* is Koff's riveting, intimate account of that mission and six subsequent missions she undertook to Bosnia, Croatia and Kosovo on behalf of the UN. It is, ultimately, a story filled with hope, humanity and justice.

*The People Vs Tech* - Jamie Bartlett 2018-04-05

**\*\*Winner of the 2019 Transmission Prize\*\*** **\*\*Longlisted for the 2019 Orwell Prize for Political Writing\*\*** 'A superb book by one of the world's leading experts on the digital revolution' David Patrikarakos, Literary Review 'This book could not have come at a better moment... *The People Vs Tech* makes clear that there is still time - just - for us to take back control' - Camilla Cavendish, Sunday Times The internet was meant to set us free. Tech has radically changed the way we live our lives. But have we unwittingly handed too much away to shadowy powers behind a wall of code, all manipulated by a handful of Silicon Valley utopians, ad

men, and venture capitalists? And, in light of recent data breach scandals around companies like Facebook and Cambridge Analytica, what does that mean for democracy, our delicately balanced system of government that was created long before big data, total information and artificial intelligence? In this urgent polemic, Jamie Bartlett argues that through our unquestioning embrace of big tech, the building blocks of democracy are slowly being removed. The middle class is being eroded, sovereign authority and civil society is weakened, and we citizens are losing our critical faculties, maybe even our free will. *The People Vs Tech* is an enthralling account of how our fragile political system is being threatened by the digital revolution. Bartlett explains that by upholding six key pillars of democracy, we can save it before it is too late. We need to become active citizens; uphold a shared democratic culture; protect free elections; promote equality; safeguard competitive and civic freedoms; and trust in a sovereign authority. This essential book shows that the stakes couldn't be higher and that, unless we radically alter our course, democracy will join feudalism, supreme monarchies and communism as just another political experiment that quietly disappeared.
