Drawing on the findings of an extensive research project, this book addresses urgent challenges and debates in trans health. Local Authorities and the Social Determinants of Health - Bonner, Adrian 2020-10-14

With detailed assessments of regional disparities and case studies of effective strategies and interventions from local authorities, this collaborative study addresses complex issues (Wicked Issues), considers where responsibility for wellbeing lies and points the way to future policy-making. The Centre for Partnering (CfP) is a key outcome of this innovative review along with Bonner's previous work Social Determinants of Health (2017).

The volume's distinctive international approach features practice vignettes as well as key theoretical perspectives on the components of health inequalities, including social determinants of health, minority stress, ecological approaches, and human rights. The Party Family - Kimberley Ens Manning 2023-08-15

The Party Family explores the formation and consolidation of the state in revolutionary China through the crucial role that social ties—specifically family ties—played in the state's capacity to respond to crisis before and after the foundation of the People's Republic of China. Central to these ties, Kimberley Ens Manning finds, were women as both the subjects and leaders of reform. Drawing on interviews with 163 participants in the provinces of Henan and Jiangsu, as well as government documents and elite memoirs, biographies, speeches, and reports, Manning offers a new theoretical lens—attachment politics—to underscore how family and ideology intertwined to create an important building block of state capacity and governance. As *The Party Family* details, infant mortality in China dropped by more than half within a decade of the PRC's foundation, a policy achievement produced to a large extent through the personal and family ties of the maternalist policy coalition that led the reform movement. However, these achievements were undermined or reversed in the complex policy struggles over the family during Mao's Great Leap Forward (1958–60).

Critical Perspectives on User Involvement - Marian Barnes 2012

User involvement is now official policy throughout the health and social care system. Does this mean that user involvement practices are unproblematic? Has it lost its radical edge as it has become an accepted part of service delivery, research and policy making? This important text offers a critical stocktake of the state of user involvement, comprising contributions from both user activists and leading academics. The contributors consider different contexts in which involvement is taking place, both in the groups involved and the activities they are engaged in, and includes different and sometimes conflicting perspectives on issues such as whether we should measure the impact of involvement. This valuable collection will be a crucial resource for students in health and social care and in social work, for researchers developing participative research practice, and for user activists seeking to learn how others have developed distinctive ways of challenging professional perspectives. Book jacket.
