Students Receive 2021 Academic Prizes, Scholarships, Fellowships - Wesleyan University

Child and Adolescent Development - William Damon 2012-06-29

This advanced text for psychology, human development, and education provides students with state-of-the-art overviews of the discipline in an accessible, affordable format. Unique both in the depth of its coverage and in the timeliness of the research that it presents, this comprehensive text conveys the field of child and adolescent development through the voices of scientists who themselves are now shaping the field.

Relationships as Developmental Contexts - W. Andrew Collins 1999-03

The volume's topic was chosen in part because of the rapidly growing salience of dyadic research perspectives in developmental psychology, but also in social psychology and in fields such as communication and family studies. It provides the most complete representation now available on current theory and research on the significance of personal relationships in child

and adolescent development. This volume addresses the ways in which the study of social development has been altered by an emphasis on research questions and techniques for studying children and adolescents in the context of their significant dyadic relationships. Leading scholars--many of them pioneers in the concepts and methods of dyadic research--have contributed chapters in which they both report findings from recent research and reflect on the implications for developmental psychology. Their work encompasses studies of relationships with parents, siblings, friends, and romantic partners. Opening chapters set the stage by describing the key characteristics of social-development research from a dyadic perspective and outlining key themes and contemporary issues in the field. It concludes with commentaries from distinguished senior scholars identifying important directions for future research.

Imprisoning America - Mary Pattillo 2004-05-20

Over the last thirty years, the U.S. penal population increased from around 300,000 to more than two million, with more than half a million prisoners returning to their home communities each year. What are the social costs to the communities from which this vast incarcerated population comes? And what happens to these communities when former prisoners return as free men and women in need of social and economic support? In *Imprisoning America*, an interdisciplinary group of leading researchers in economics, criminal justice, psychology, sociology, and social work goes beyond a narrow focus on crime to examine the connections between incarceration and family formation, labor markets, political participation, and community well-being. The book opens with a consideration of the impact of incarceration on families. Using a national survey of young parents, Bruce Western and colleagues show the enduring corrosive effects of incarceration on marriage and cohabitation, even after a prison sentence has been served. Kathryn Edin, Timothy Nelson, and Rechelle Parnal use in-depth life histories of low-income men in Philadelphia and Charleston, to study how incarceration not only damages but sometimes strengthens relations between fathers and their children. *Imprisoning America* then turns to how mass incarceration affects local communities and society at large. Christopher Uggen and Jeff Manza use survey data and interviews with thirty former felons to explore the political ramifications of disenfranchising inmates and former felons. Harry Holzer, Stephen Raphael, and Michael Stoll examine how poor labor market opportunities for former prisoners are shaped by employers' (sometimes unreliable) background checks. Jeremy Travis concludes that corrections policy must extend beyond incarceration to help former prisoners reconnect with their families, communities, and the labor market. He recommends greater collaboration between prison officials and officials in child and family welfare services, educational and job training programs, and mental and public health agencies. *Imprisoning America* vividly illustrates that the experience of incarceration itself—and not just the criminal involvement of inmates—negatively affects diverse aspects of social membership. By contributing to the social

exclusion of an already marginalized population, mass incarceration may actually increase crime rates, and threaten the public safety it was designed to secure. A rigorous portrayal of the pitfalls of getting tough on crime, *Imprisoning America* highlights the pressing need for new policies to support ex-prisoners and the families and communities to which they return.

Satisfaction in Close Relationships - Robert J. Sternberg 1997-06-27

With the premise that close relationships are subjected to extraordinary scrutiny in contemporary society, the authors go on to say that this generation values individual fulfillment more than any before us. We are able to leave existing relationships with relative ease, demand a high level of satisfaction from our intimate relationships, and are frustrated at those times when we fail to achieve it.; This volume presents a range Of Theoretical And Clinical Approaches To Understanding And Promoting relationship satisfaction. Integrating findings from social, clinical and counselling psychology, researchers illuminate what it means to be satisfied within a love relationship and identify the factors that allow couples to create successful relationships over time.

Family-Peer Relationships - Ross D. Parke 2016-03-10

Originally published in 1992, this volume provided an up-to-date overview of recent research concerning the links between family and peer systems. Considerable work in the past had focused on family issues or peer relationships, but these systems had typically been considered separately. This volume bridges the gap across these two important socialization contexts and provides insights into the processes that account for the links across the systems – the ways in which the relationships between these systems shift across development. In addition, the variations in the links between family and peers are illustrated by cross-cultural work, studies of abused children, and research on the impact of maternal depression. In short, the volume provides not only a convenient overview of recent progress at the time but lays out an agenda for future research.

IBSS: Sociology: 1993 Vol 43 - International Committee for Social Science Information and Documentation 1994

This bibliography lists the most important works published in sociology in 1993. Renowned for its international coverage and rigorous selection procedures, the IBSS provides researchers and librarians with the most comprehensive and scholarly bibliographic service available in the social sciences. The IBSS is compiled by the British Library of Political and Economic Science at the London School of Economics, one of the world's leading social science institutions. Published annually, the IBSS is available in four subject areas: anthropology, economics, political science and sociology.

Interparental Conflict and Child

Development - John Howard Grych 2001-03-19
Interparental Conflict and Child Development provides an in-depth analysis of the rapidly expanding body of research on the impact of interparental conflict on children. Emphasizing developmental and family systems perspectives, it investigates a range of important issues, including the processes by which exposure to conflict may lead to child maladjustment, the role of gender and ethnicity in understanding the effects of conflict, the influence of conflict on parent-child, sibling, and peer relations, family violence, and interparental conflict in divorced and step-families.

Housing Policy Debate - 2006

Families, Risk, and Competence - Michael Lewis 2014-04-04

The problems of studying families arise from the difficulty in studying systems where there are multiple elements interacting with each other and with the child. How should this system be described? Still other problems relate to indirect effects; namely the influence of a particular dyad's interaction on the child when the child is not a member of the dyad. While all agree that the mother-father relationship has important bearing on the child's development, exactly how to study this--especially using observational techniques--remains a problem. While progress in studying the family has been slow, there is no question that an increase in interest in the family systems, as opposed to the mother-child relationship, is taking place. This has resulted in an increase in research on families and their effects. This volume, by leading figures in child development on families, attests to the growing

sophistication of the conceptualization and measurement techniques for getting at family processes. The third in a series that aims to address topics relevant to the developmental problems and developmental disabilities of retardation, this volume is divided into two parts. Section 1 presents basic family processes and approaches for describing family dynamics. It deals with these issues from a broad perspective, including studying families at dinner, families in different cultural contexts, and the understanding of family in nonhuman primates. Section 2 looks at family processes in the service of studying families at-risk. The risk factors include poverty, malnutrition, and developmental delay and retardation. The study of family processes in these contexts provides data on family dynamics as well as how these dynamics impact on the children's developing competence. This volume will be informative for researchers, clinicians, and educators from a variety of disciplines and settings. The editors' aim is to bring a greater clarity to issues concerning the family life of children and highlight new research and possibilities for intervention.

Throwaway Dads - Ross D. Parke 1999
Argues that the largely negative portrayal of fathers in mass media is both inaccurate and harmful, and offer proposals for change.

Resources in Education - 1998

Popular - Mitch Prinstein 2017-06-06

Who doesn't want to be more popular? Surely a person's popularity, be it at school, work or socially, is the best predictor of how happy and successful they will be? The truth is actually much more complex and is based on millennia of human evolution. This impeccably researched and highly entertaining book presents two very distinct types of popularity and shows how only one of them will get you what you want. Professor of Psychology and popularity expert Mitch Prinstein has based his book *Popular* on two decades of research into the human psyche and genetic make-up. He investigates the science of what popularity is, why we care about it so much - even if we don't think we do - and if we can still become popular, even if we were outcasts when we were younger. He investigates social media phenomena, including Facebook

friends, Instagram likes and Twitter followers, and explores how they tap into our basic need to survive. He also examines the correlation between popularity, health and lifespan, and offers important insights into parenting for popularity, explaining why supporting children in the right way will help them cultivate the right kind of popularity and shape them positively as adults in the future. An enlightening read on a topic that has fascinated us for centuries, Popular will provide insight into your own popularity and how it influences your life in unexpected ways.

How Are Chinese Only Children Growing - Weiping Liu 2017-01-20

Weiping Liu contends that the impacts of learning environments on Chinese only children must be studied from a bioecological systems perspective by considering the direct and joint effects of learning environments and personality within the macro-environments of culture, public policy etc. Samples were chosen randomly from the 1980s and 1990s Chinese only children (N=2105) ranging from junior high, senior high and college students in east, middle and west China. With data analyses such as exploratory factor analysis, hierarchical multiple regression analysis, MANOVA and ANOVA, hypotheses formulated on these research purposes were tested to be true, especially, in terms of desirable learning outcomes. The author also provided practical and theoretical discussions.

Social Work Research Methods - Stuart A. Kirk 1999

Social Learning and Systems Approaches to Marriage and the Family - Ray DeV. Peters 1988

Language and Emotion. Volume 2 - Gesine Lenore Schiewer 2022-11-07

The handbook Language and Emotion is intended to give a historical and systematic profile of the area. It will aim to connect contemporary and historical theories, approaches, and applications and to cover eastern and western perspectives of language, communication, and emotion. It will present all relevant aspects of language and emotion and thus contribute significantly to research in the field of linguistics and semiotics of emotion.

Children of the Land - Glen H. Elder Jr.

2014-08-11

A century ago, most Americans had ties to the land. Now only one in fifty is engaged in farming and little more than a fourth live in rural communities. Though not new, this exodus from the land represents one of the great social movements of our age and is also symptomatic of an unparalleled transformation of our society. In *Children of the Land*, the authors ask whether traditional observations about farm families—strong intergenerational ties, productive roles for youth in work and social leadership, dedicated parents and a network of positive engagement in church, school, and community life—apply to three hundred Iowa children who have grown up with some tie to the land. The answer, as this study shows, is a resounding yes. In spite of the hardships they faced during the agricultural crisis of the 1980s, these children, whose lives we follow from the seventh grade to after high school graduation, proved to be remarkably successful, both academically and socially. A moving testament to the distinctly positive lifestyle of Iowa families with connections to the land, this uplifting book also suggests important routes to success for youths in other high risk settings.

Children's Friendship Training - Fred D. Frankel 2013-05-13

First published in 2003. *Children's Friendship Training* is a complete manualized guide for therapists treating children with peer problems. This unique, empirically validated treatment is the first to integrate parents into the therapy process to ensure generalization to school and home. Representing over twelve years of research, *Children's Friendship Training* presents the comprehensive social skills training program developed by these pioneering authors. Step-by-step interventions help children develop the skills to initiate mutually satisfying social interactions. These interactions can lead to higher regard within the peer group and the development of satisfying dyadic relationships that will, in turn, serve to enhance overall well being. Clinical and empirical rationales, illustrative case examples and parent handouts that educate parents and give specific guidelines for homework assignments are presented for each treatment module. Brief relevant reviews of

the child development literature and selective reviews of assessment techniques and other approaches to children's social skills training are presented to sufficiently acquaint therapists interested in implementing children's friendship training.

Family Systems and Life-span Development -

Kurt Kreppner 2013-05-13

This interdisciplinary volume presents international research and theories focusing on the development of the individual across the life span. Centering on "family" as the key context influencing, and being influenced by the developing person, the contributors to this volume discuss an array of theoretical models, methodological strategies, and substantive foci

linking the study of individual development, the family system, and the broader context of human development. The volume presents continuing empirical research and theories in the realm of individual and family development and features a developmental, contextual view from a process-oriented vantage point.

Handbook of Dynamics in Parent-Child Relations

- Leon Kuczynski 2003

This handbook provides an interdisciplinary perspective on theory, research and methodology on dynamic processes in parent-child relations. It focuses on cognitive, behavioural and relational processes that govern immediate parent-child interactions and long-term relationships.
