Health & Living: Information on Living a Healthy Lifestyle - MedicineNet

Environmental Issues (eBook) - Edward P. Ortleb 1986-09-01

This book is a study of the factors which influence the relationships between living things and the environment. Special consideration is given to those human activities which adversely affect our environment. Each of the twelve teaching units in this book is introduced by a color transparency (print books) or PowerPoint slide (eBooks) that emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow-up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities, and a complete answer key.

Biological Science - Jon (Emeritus Professor of Bioscience Education Scott, Emeritus Professor of Bioscience Education University of Leicester) 2022-06-24

Biological Science: Exploring the Science of Life responds to the key needs of lecturers and their students by placing a clear central narrative, carefully-structured active learning, and confidence with quantitative concepts and scientific enquiry central to its approach. Written by a team of dedicated and passionate academics, and shaped by feedback from over 55 institutions, its straightforward narrative, reinforced by key concept overview videos for every chapter, communicate key ideas clearly: the right information is provided at the right time, and at the right depth. Its pause and think features, self-check quizzes, and graded end of chapter questions, augmented by flashcards of key terms, directly support active learning. The combination of narrative text and learning features promote a rich, active learning experience: read, watch, and do. Its combination of Quantitative Toolkits, Scientific Process panels, and the Life and its Exploration chapters provide more insight and support than any other general biology text; they prepare students to engage with this quantitative and experimental discipline with confidence, and set them on a path for success throughout their future studies. With coverage that spans the full scale of biological science - from molecule to ecosystem - and with an approach that fully supports flexible, self-paced learning, Biological Science: Exploring the Science of Life will set you on a path towards a deeper understanding of the key concepts in biology, and a greater appreciation of biology as a dynamic experimental science. Digital formats and resources Biological Science: Exploring the Science of Life is available for students and institutions to purchase in a variety of formats. The enhanced ebook is enriched with features that offer extra learning support: www.oxfordtextbooks.co.uk/ebooks - Key concepts videos support students from the start of every chapter and as they make their way through every Module. - Self-check questions at the end of each chapter section give students quick and formative feedback, building their confidence and comprehension as they study and revise. - Quantitative skills video screencasts help students to master the foundational skills required by this discipline. - Interactive figures give students the control they need to step through, and gain mastery over, key concepts. - Per-chapter flashcard glossaries help students to recall the key terms and concepts on which further study can be built.

Kingdoms of Life - Protista (eBook) - Gina Hamilton 2006-09-01

Milliken's Kingdoms of Life series is aligned with national science standards and reflects current teaching practices. Each book includes approximately 50 black and white reproducible pages, 12 full-color transparencies (print books) or PowerPoint slides (eBooks), comprehension questions and lab activities for each unit, an answer key, a glossary of bolded terms, a timeline of biological discovery, a laboratory safety guide, as well as a national standards correlation chart. Protista details the structure and behavior of protists — distinguished from monera principally by being composed of so-called "true cells" (eukaryotes), or cells containing a distinct nucleus. Protists can be either unicellular or multicellular and include most algae and some fungi.

Scientifica Teacher Book 8 and CD-ROM Essentials - Lawrie Ryan 2005

Bring your science lessons to life with Scientifica. Providing just the right proportion of 'reading' versus 'doing', these engaging resources are differentiated to support and challenge pupils of varying abilities.

The Great Kapok Tree - Lynne Cherry 2000

The many different animals that live in a great Kapok tree in the Brazilian rainforest try to convince a man with an ax of the importance of not cutting down their home.

Understanding Basic Ecological Concepts - Audrey N. Tomera 2001

This introductory text for high school students delves into the ecological topics that young people relate to: Global warming Deforestation Water supplies How communities and ecosystems interact, and much more. Photographs, drawings and charts, and reviews help students come to grips with complex issues. A variety of labs and activities build interest as they simultaneously develop thinking skills. Understanding Basic Ecological Concepts is ideal for non-science students.

Collins International Primary Science - International Primary Science Teacher's Guide: Stage 3 - Collins 2021-06-14

Spark scientific curiosity from a young age with this six-level course through an enquiry-based approach and active learning. Collins International Primary Science fully meets the requirements of the Cambridge Primary Science Curriculum Framework from 2020 and has been carefully developed for a range of international contexts.

Food Webs - John C. Moore 2018

This book presents new approaches to studying food webs, using practical and policy examples to demonstrate the theory behind ecosystem management decisions.

Spotlight Science - Keith Johnson 2000

Topic Outlines show parts of the PoS to be covered, the relationship of the topic to aspects of KS2 and KS4 and warn of equipment that may need special preparation time in advance. Topic Maps are provided for students. Lesson Notes relating to each double page spread in the students' book offer objectives, ideas for each lesson, detailed references to the PoS, level descriptions, safety points with references to CLEAPPs HAZCARDS, ICT support, cross-curricular links and equipment lists. Answers to all questions in the students' book are also provided. Additional support material provide: Homework Sheets, Help and Extension Sheets to optimise differentiation (Sc1), Sc1 Skill Sheets,

'Thinking about....' activities to improve integration of CASE activities with Spotlight Science, Revision Quizzes and Checklists, etc. Extra Help Sheets for each topic extend the range of support for Sc1 and Sc2-4. Challenge Sheets for each topic provide a variety of enrichment activities for more able students. They consist of a variety of challenging activities which will present students with opportunities to develop problem-solving, thinking, presentational and interpersonal skills. Technician's Cards include help to prepare lessons, equipment requirements and CLEAPPS HAZCARD references. For more information visit the website at www.spotlightscience.co.uk

Learning Science Outside the Classroom - Martin Braund 2012-12-06

This book shows how a wide range of contexts for learning science can be used outside of the classroom, and includes learning: at museums, science centres and planetaria from newspapers, magazines and through ICT at industrial sites and through science trails at zoos, farms, botanic gardens, residential centres and freshwater habitats in school grounds. With contributions from well known and respected practitioners in all fields of science education and through using case studies, Learning Science Outside the Classroom offers practical guidance for teachers, assistant teaching staff and student teachers involved in primary and secondary education. It will help enable them to widen the scientific experience and understanding of pupils. The advice in this book has been checked for safety by CLEAPSS.

Everybody's Somebody's Lunch - Cherie Mason 2002-03-04

Many children--indeed, many adults--believe that there are "good" animals and "bad" animals. The Big Bad Wolf myth lives on. This new story puts predators in an entirely new light as a sensitive young girl, shocked and confused by the death of her cat, learns the roles that predator and prey play in the balance of nature. Gently and gradually, she comes to understand why some animals kill and eat other animals in order to live. It is one of nature's most exciting and important lessons. Children and all who read to them will come away with a new respect for all wildlife. In keeping with our commitment to diversity education, this story also shows an extended family rich in racial and cultural diversity. The important roles that predator and prey play in the balance of nature are gently explained to children in Everybody's Somebody's Lunch. This Teacher's Guide provides educators with information, activities, and play that can easily be incorporated into wildlife and nature study programs. Included are the history of the persecution of predators due to human ignorance and fear; profiles of predatory mammals, invertebrates, reptiles, amphibians, birds, and marine life; humans as predators; and hopeful evidence of change in today's attitudes. These critical environmental lessons are structured so that they are interesting, instructive, and fun.

Teaching the Global Dimension - David Hicks 2007-04-19

Teaching the Global Dimension specifically responds to concerns such as inequality, justice, environment and conflict in chapters written by leading educationalists in the field. It explores both the theory and practice of 'global education' today and provides: a framework for understanding global issues a model identifying the key elements of good practice insight into young people's concerns for the world and the future tried and tested strategies for handling controversial global issues more confidently in the classroom key concepts for planning appropriate learning experiences a range of case studies which demonstrate the different ways in which a global dimension can be developed. Inspiring, thought-provoking and highly practical, this book shows how teachers at any stage in their career can effectively and successfully bring a global dimension to the taught curriculum.

Science Made Easy, Ages 8-9 (Key Stage 2) - Carol Vorderman 2014-07-01

PLEASE NOTE - this is a replica of the print book and you will need paper and a pencil to complete the exercises. Let Carol Vorderman help your child succeed in Science. Science Made Easy is one of Carol

Vorderman's series of workbooks includes notes and tips to make learning about Science easy and fun! Follow the exercises and activities with your child to strengthen their learning in school, then reward them with stars for their efforts. Each title contains a progress chart so your child can keep track of all the exercises they have completed and parents' notes explain what children need to know at each stage and what's being covered in the curriculum so you can support your child. This ebook helps children to learn about different sorts of materials, their uses, and how they can be changed. Developed in consultation with leading educational experts to support curriculum learning, Science Made Easy (previous ISBN 9781405363716) is a great way to improve your child's science skills - "the more you practise, the better you'll be!" Carol Vorderman

Food Webs and Niche Space. (MPB-11), Volume 11 - Joel E. Cohen 2020-03-31

What is the minimum dimension of a niche space necessary to represent the overlaps among observed niches? This book presents a new technique for obtaining a partial answer to this elementary question about niche space. The author bases his technique on a relation between the combinatorial structure of food webs and the mathematical theory of interval graphs. Professor Cohen collects more than thirty food webs from the ecological literature and analyzes their statistical and combinatorial properties in detail. As a result, he is able to generalize: within habitats of a certain limited physical and temporal heterogeneity, the overlaps among niches, along their trophic (feeding) dimensions, can be represented in a one-dimensional niche space far more often than would be expected by chance alone and perhaps always. This compatibility has not previously been noticed. It indicates that real food webs fall in a small subset of the mathematically possible food webs. Professor Cohen discusses other apparently new features of real food webs, including the constant ratio of the number of kinds of prey to the number of kinds of predators in food webs that describe a community. In conclusion he discusses possible extensions and limitations of his results and suggests directions for future research.

Ocean Studies, Ocean Issues - James A. Kolb 1996

The Year of the Gray Whale - James A. Kolb 1996

Prentice Hall Exploring Life Science - 1997

Ascent! 1 - Louise Petheram 2002

This series is focused on delivering custom materials which are designed and presented to meet the needs of enthusiastic and committed students. The resources are written at an average reading ability level, but with full and proper use of scientific terminology throughout. Ascent! has its own text-linked website: www.nelsonthornes.com/ascent

Learning About Life Science - 2014

Become a life science with this expansive 26-book set! Readers will learn about anatomy, genetics, cells, ecosystems, and more. Some books cover a broad topic while others focus in on one part of the body or one ecosystem. Students will also learn how to beneficially incorporate life science into their lives with titles that promote healthy habits. Keep readers engaged from cover to cover with fun facts and vibrant images. This set includes: Senses; Bones; Muscles; Lungs; Brain; Heart; Oceans; Wetlands; Ponds; Deserts; Rainforests; Forest; Find Your Sport; Emergency! Be Prepared; Make It Healthy; Get Moving; Eat Healthy; Healthy Habits, Healthy You; Investigating Simple Organisms; Looking Inside Cells; All About Mitosis and Meiosis; The World of Genetics; Inside Ecosystems and Biomes; The World of Plants. (GRL ranges I-R).

Teacher book - David Sang 2004

Bring your science lessons to life with Scientifica. Providing just the right proportion of 'reading' versus 'doing', these engaging resources are differentiated to support and challenge pupils of varying abilities.
