Seeds of Foreverland - Tony Bertauski

2015-10-09

Harold Ballard's breaking point came in the sixth grade. John Lively was a mouth-breather that no one cared about. He was an over-sized sixth grader destined to be incarcerated. God wasted a body on him. Harold was a curious loner that sat in the back. Unlike John's family, Harold's parents loved him. They just didn't have time for him. They spent days in the basement working on something that would change the world. Sometimes it was weeks. Harold was tired of being forgotten and pushed around. He pushed back. That day would change the world. That day would change him into the man he was destined to become. His curiosity would lead him

to Foreverland. INTERVIEW WITH THE AUTHOR HOW IMPORTANT ARE NAMES TO YOU IN THIS BOOK. DID YOU CHOOSE THEM BASED ON SOUND OR MEANING? Almost all of my books have names with special meaning, some foreshadowing a big twist. In *The Annihilation of Foreverland*, Reed's name was symbolic of his ability to tolerate suffering, bending in the face of gale forces but never breaking. WHERE DOES YOUR TOMORROW SPRING FROM? IN OTHER WORDS, HOW DID YOU COME UP WITH THE CRAZY WORLD? Sometimes, I can't remember how the story started by the time I get to the end. *The Annihilation of Foreverland* started with the premise of identity. I wanted to write it as a YA book in the science fiction dystopia genre in a way that slowly unfolded as well as questioned who we are and explore our fear of death, and what we're willing to do to avoid it. Like all of my stories, it does have a romantic angle mixed into the action. Because it should. GIVE YOUR

BOOK THE BECHDEL TEST. IT HAS TO HAVE AT LEAST TWO (NAMED) WOMEN IN IT WHO TALK TO EACH OTHER ABOUT SOMETHING BESIDES A MAN. I failed because there's only one female in *The Annihilation of Foreverland*. However, the young adult sequel (*Foreverland is Dead*) passes with flying colors since its mostly female characters that rarely talk about men. WHAT SORT OF BODY COUNT ARE WE TALKING HERE? The bodies die, but not necessarily the characters. Chew on that a second. DO YOU WANT YOUR TOMORROW TO MAKE IT BIG, AS IN JK ROWLINGS-BIG? WHY OR WHY NOT? Believe it or not, no. Don't get me wrong, I'd like to make enough cash to pay off this house and send my kids to college, but I'll pass on fame and fortune. Anonymity is a blessing. YOU CAST YOUR CHARACTERS FOR A MOVIE. WHO MAKES IT? In *The Annihilation of Foreverland*, I only casted two characters in my head while I was writing it. The Director is Jeff Bridges and Mr. Jones is Anthony Hopkins. It

was like watching a movie as I wrote. HAVE YOU WRITTEN IN ANY OTHER GENRES BESIDES YA DYSTOPIAN? WHAT DREW YOU TO YOU THIS GENRE? I've been fascinated by consciousness, identity and what this all means since I was young. I would read my grandfather's science fiction books with elements of artificial intelligence and alternate realities and wonder what happened when they died? I suppose that's why all of my writing deals with the big mysteries of life in one way or another. In a way, I write for my own exploration, in a sort of thought experiment approach, pulling apart our identities, exploring what makes us who we are. If I lost my memories, would I still be me? If I had my body parts replaced with synthetic replications, at what point would I not be me? Do I even need a body? What am I? A few years ago, I figured I'd write a romance novel. Since all of my books have a romantic element, I thought it would be fun. Halfway through the novel, I found myself

thinking more and more about the next project—a dystopian idea. So 40,000 words in, I scrapped the romance novel and got back to what I love. Science fiction.

Wonders of the Plant Kingdom - Wolfgang Stuppy 2015-02-23

Compared to the obvious complexity of animals, plants at a glance seem relatively simple in form. But that simplicity is deceptive: the plants around us are the result of millennia of incredible evolutionary adaptations that have allowed them to survive, and thrive, under wildly changing conditions and in remarkably specific ecological niches. Much of this innovation, however, is invisible to the naked eye. With *Wonders of the Plant Kingdom*, the naked eye gets an unforgettable boost. A stunning collaboration between science and art, this gorgeous book presents hundreds of images of plants taken with a scanning electron microscope and hand-colored by artist Rob Kessler to reveal the awe-inspiring adaptations all around us. The surface of a peach—with its hairs, or trichomes, and sunken stomata, or

breathing pores—emerges from these pages in microscopic detail. The dust-like seeds of the smallest cactus species in the world, the *Blossfeldia liliputana*—which measures just twelve millimeters fully grown—explode here with form, color, and character, while the flower bud of a kaffir lime, cross-sectioned, reveals the complex of a flower bud with the all-important pistil in the center. Accompanying these extraordinary images are up-to-date explanations of the myriad ways that these plants have ensured their own survival—and, by proxy, our own. Gardeners and science buffs alike will marvel at this wholly new perspective on the world of plant diversity.

This open access book shares impact stories – testimonies from various value chain actors who have been part of the Tropical Legumes (TL) projects, over the past twelve years. The Tropical Legumes projects led by ICRISAT in three parts (TLI, TLII and TLIII), constitute a major international initiative supported by the Bill & Melinda Gates Foundation (BMGF) and jointly implemented by the International Center

for Tropical Agriculture (CIAT), International Institute of Tropical Agriculture (IITA) and National Agricultural Research Systems (NARS) partners from Sub-Saharan Africa and India. The project developed improved cultivars of common bean, cowpea, chickpea and groundnut (but also soya bean and pigeon pea cultivars in its initial phases) and delivers their seed to smallholders in BMGF-focus areas. It also strengthens the NARS and CGIAR's breeding programs and seed platforms to enhance their ability to deliver high and sustained outputs to smallholder farmers. The book compiles the experiences of a diversity of actors within the grain legume value chains, with a focus on groundnut and common beans in Tanzania and Uganda, groundnut and cowpea in Nigeria, and groundnut in Ghana. All stakeholders involved share their thoughts on being part of a decade-long development project family.
