Laboratory Micro-X-Ray Fluorescence Spectroscopy Michael Haschke 2014-05-08 Micro-X-ray fluorescence offers the possibility for a position-sensitive and non-destructive analysis that can be used for the analysis of non-homogeneous materials and layer systems. This analytical technique has shown a dynamic development in the last 15 years and is used for the analysis of small particles, inclusions, of elemental distributions for a wide range of different applications both in research and quality control. The first experiments were performed on synchrotrons but there is a requirement for laboratory instruments which offers a fast and immediate access for analytical results. The book discusses the main components of a μ -XRF instrument and the different measurement modes, it gives an overview about the various instruments types, considers the special requirements for quantification of non-homogeneous materials and presents a wide range of application for single point and multi-point analysis as well as for distribution analysis in one, two and three dimensions.

Declining Grammar and Other Essays on the English Vocabulary Dennis E. Baron 1989 This book contains 25 essays about English words, and how they are defined, valued, and discussed. The book is divided into four sections. The first section, "Language Lore," examines some of the myths and misconceptions that affect attitudes toward language--and towards English in particular. The second section, "Language Usage," examines some specific questions of meaning and usage. Section 3, "Language Trends," examines some controversial trends in English vocabulary, and some developments too new to have received comment before. The fourth section, "Language Politics," treats several aspects of linguistic politics, from special attempts to deal with the ethnic, religious, or sex-specific elements of vocabulary to the broader issues of language both as a reflection of the public consciousness and the U.S. Constitution and as a refuge for the most private forms of expression. Managing Disruptions in Business Rajagopal 2022-01-11 This volume discusses business disruptions as strategic to gain market competitiveness. It analyzes the convergence of innovation and technology, business practices, public policies, political ideologies, and consumer values to strengthen competitive business practices through disruptions. Bringing together contributions from global experts, the chapters add to knowledge on contemporary business models, business strategies, radical interventions in manufacturing, services, and marketing organizations. Disruptive innovations led by contemporary trends, tend to transform the market and consumers' landscape. These trends include shifts from closed to open models of innovation, servitization, and moving from conventional manufacturing and marketing paradigms to industry 4.0 business philosophy. Focused on the triadic themes of disruption, innovation, and management in emerging markets, this book serves as a valuable compendium for research in entrepreneurship development, regional business and development, contemporary political ideologies, and changing social values.

Borderscapes Prem Kumar Rajaram 2007 Connecting critical issues of state sovereignty with empirical concerns, Borderscapes interrogates the limits of political space. The essays in this volume analyze everyday procedures, such as the classifying of migrants and refugees, security in European and American detention centers, and the DNA sampling of migrants in Thailand, showing the border as a moral construct rich with panic, danger, and patriotism. Conceptualizing such places as immigration detention camps and refugee camps as areas of political contestation, this work forcefully argues that borders and migration are, ultimately, inextricable from questions of justice and its limits. Cities Under Siege Stephen Graham 2011-11-01 Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, Cities Under Siege traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism.'

Researching Emotions in International Relations Maéva Clément 2017-12-05 This edited volume is the first to discuss the methodological implications of the 'emotional turn' in International Relations. While emotions have become of increasing interest to IR theory, methodological challenges have yet to receive proper attention. Acknowledging the plurality of ontological positions, concepts and theories about the role of emotions in world politics, this volume presents and discusses various ways to research emotions empirically. Based on concrete research projects, the chapters demonstrate how social-scientific and humanities-oriented methodological approaches can be successfully adapted to the study of emotions in IR. The volume covers a diverse set of both well-established and innovative methods, including discourse analysis, ethnography, narrative, and visual analysis. Through a hands-on approach, each chapter sheds light on practical challenges and opportunities, as well as lessons learnt for future research. The volume is an invaluable resource for advanced graduate and postgraduate students as well as scholars interested in developing their own empirical research on the role of emotions.

Funding the Rise of Mass Schooling Johannes Westberg 2016-11-24 This book presents expert analysis on how the remarkable rise of mass schooling was funded during the nineteenth century. Based on rich source materials from rural Swedish school districts, and drawing up evidence from schooling in countries including France, Germany, England and the U.S., Westberg examines the moral considerations that guided economic practices and sheds new light on how the advent of schooling did not only rest upon monies, but also on grains, firewood and cow fodder. Exploring school districts' motives and economic culture, this book shows how schooling was neither primarily guided by frugal impulses nor motivated by a fear of the growing working classes. Instead, school spending served multiple purposes in school districts that pursued a fair and reasonable economic practice. In addition to being a highly-detailed case study of Sweden 1840 - 1900 this book also entails a broadening of the theoretical horizon of history of education into social, agrarian and economic history in a wider context. With a focus on different systems of school finance, this work reveals a key change over time: from a largely in-kind system supporting schools in an early phase, followed by an increasingly monetarized, depersonalized and homogenized system of school finance. Boasting an interdisciplinary appeal, this will be a welcome contribution of interest to scholars in the fields of education history, sociology, and economics.

The Wisdom of Zhuang Zi on Daoism Zhuangzi 2008 Throughout the years there have been several editions of Zhuang Zi's book with significant differences in certain parts of the text. Not every word in the book came from Zhuang Zi's pen. Contributions were made by his disciples and there have been many changes to the original text: errors in hand copying the text, in mistaking notations for text, and in outright forgery throughout centuries. Chen Guying's 1976 edition of the book, an eclectic study of all the editions that identifies probable forgeries, is used as the text reference in the present translation.

Global Applications of Culturally Competent Health Care: Guidelines for Practice Marilyn "Marty" Douglas 2018-07-02 This book is unique in its global approach to applying the Guidelines for Culturally Competent Nursing Practice that were recently endorsed by the International Council of Nurses (ICN) and distributed to all of its 130 national nursing associations. The purpose of this book is to illustrate how these guidelines can be put into clinical practice and to show how practitioners from different countries with diverse populations can implement them. The first chapter provides the conceptual basis for Culturally Competent Health Care and describes how the guidelines were developed. Each of the next 10 sections presents a chapter describing a specific guideline followed by three or four chapters with detailed case studies to illustrate how the guideline was implemented in a particular cultural setting. All case studies follow a similar format and are written by international authors with clinical expertise and work experience in the culture being presented. This book will be useful for advanced practice nurses, healthcare students, clinicians, administrators, educators, researchers, and those who provide community health or population-based care.

Killer Cities Nigel Thrift 2021-02-10 Through a combination of social theory, polemic and close attention to empirical detail, author Nigel Thrift demonstrates how and why cities cause mass animal death and hasten the destruction of the planet. The book then attempts to set out how 'we' can navigate out of the current situation and towards a world in which cities no longer act as killers but become aligned with the lives of other beings.

The Practice of Everyday Life Michel de Certeau 2011-11 Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology--to speak of an apposite use of imaginative literature.

The Compassionate Contrarians Catherine Amey 2014-04 "Although New Zealand's economy has long depended on the bodies and infant milk of animals, this country also has a hidden history of vegetarianism. While some early vegetarians were concerned with health, spirituality, and purity, others took a broader view, speaking out on issues that included peace, feminism, animal rights, socialism, prison reform, and the environment. Yet others set up cafes, organised picnics, and wrote cookbooks. The Compassionate Contrarians uncovers the quirks of the vegetarian experience in a land of meat and dairy. More importantly, it acknowledges the hard work and courage of a group of idealists who dedicated their lives to creating a more just world for all sentient beings."--Publisher information.

Technics and Civilization Lewis Mumford 2010-10-30 Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. "The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written."—Journal of Technology and Culture

Modern Indian Theatre Nandi Bhatia 2011 Since the late nineteenth century, theatre has played a significant role in shaping social and political awareness in India. It has served to raise concerns in post-Independence India as well. Modern Indian Theatre: A Reader brings together writings that speak to the historical contexts from which theatrical practices emerged—colonization, socio-cultural suppression and appropriation, intercultural transformations brought about by the impact of the colonial forces, and acute critical engagement with socio-political issues brought about by the hopes and failures of Independence. The volume addresses pertinent questions like how drama influences social change, the response of drama to the emergence and domination of mass media and the proliferation and influence of western media in India, and how mediations of gender, class, and caste influence drama, its language, forms, and aesthetics. The Introduction by Nandi Bhatia provides a comprehensive understanding of the interface between Indian theatre and 'modernity'.

Bruno Jasienski Nina Kolesnikoff 1983-01-06 Bruno Jasiński was a bilingual Polish-Russian writer who died in exile in Siberia in 1939. This volume traces his literary evolution. The introductory biographical sketch is followed by a discussion of Jasiński's contribution to Polish poetry, specifically the Futurist movement which, like its parallels in Russia and Italy, revolutionized poetic language. An analysis and evaluation of Jasiński's prose work sheds light on the relationship between politics and literature in early twentieth-century Poland and Russia. Most of Jasiński's novels and short stories were written in the approved Soviet tradition of Socialist Realism. His *Man Changes His Skin* is considered one of the best Soviet industrial novels of the 1930s. The author's comprehensive and skillful treatment of Jasiński's literary production, the first to appear in English, also makes a valuable contribution to the knowledge of Futurism in Eastern Europe and Socialist Realism in the Soviet Union. The volume contains numerous quotations from Polish and Russian literature, both in English translation (prepared by the author) and in the original. It will be of interest to students of Slavic literature, comparative literature, and the literature of ideology.

Global Design History Glenn Adamson 2011-03-15 Globalism is often discussed using abstract terms, such as 'networks' or 'flows' and usually in relation to recent history. Global Design History moves us past this limited view of globalism, broadening our sense of this key term in history and theory. Individual chapters focus our attention on objects, and the stories they can tell us about cultural interactions on a global scale. They place these concrete things into contexts, such as trade, empire, mediation, and various forms of design practice. Among the varied topics included are: the global underpinnings of Renaissance material culture the trade of Indian cottons in the eighteenth-century the Japanese tea ceremony as a case of 'import substitution' German design in the context of empire handcrafted modernist furniture in Turkey Australian fashions employing 'ethnic' motifs an experimental UK-Ghanaian design partnership Chinese social networking websites the international circulation of contemporary architects. Featuring work from leading design historians, each chapter is paired with a 'response', designed to expand the discussion and test the methodologies on offer.
