The Prevalence of Child Sexual Abuse in Britain - Deborah Ghate 1995

In response to concern about the sexual abuse of children, the Department of Health commissioned a feasibility study for a survey of the prevalence of child sexual abuse. This report documents the work and conclusions of that study, which addresses methodological, procedural and ethical issues.

Coming Back to Jail - Elizabeth Comack
2021-01-10T00:00:00Z

Published some two decades ago, Elizabeth Comack's *Women in Trouble* explored the connections between the women's abuse histories and their law violations as well as their experience of imprisonment in an aged facility. What has changed for incarcerated women in those twenty years? Are experiences of abuse continuing to have an impact on the lives of criminalized women? How do women find the experience of imprisonment in a new facility? Drawing on the stories of forty-two incarcerated women, *Coming Back to Jail* broadens the focus

to examine the role of trauma in the women's lives. Resisting the popular move to understand trauma in psychiatric terms — as post-traumatic stress disorder (ptsd) — the book frames trauma as “lived experience” and locates the women's lives within the context of a settler-colonial, capitalist, patriarchal society. Doing so enables a better appreciation of the social conditions that produce trauma and the problems, conflicts and dilemmas that bring women into the criminal justice net. In *Coming Back to Jail*, Comack shows how — despite recent moves to be more “gender responsive” — the prisoning of women is ultimately more punishing than empowering. What is more, because the sources of the women's trauma reside in the systemic processes that have contoured their lives and their communities, true healing will require changing women's social circumstances on the outside so they no longer keep coming back to jail.

Up Against Foucault - Caroline Ramazanoglu
2002-11-01

Up Against Foucault introduces key aspects of Foucault's work to feminists, in ways which are less abstracted than much of the existing literature in this area. It includes an introduction to Foucault's terms, and fills a gap in the literature by clarifying the links between the everyday realities of women's lives and Foucault's work on sexuality and power. The contributors explore the implications of analysing power relations, sexuality or the body, without also thinking about gender and other social divisions. They bring their expertise from social theory and philosophy to bear on the same core issues; the ways in which Foucault provokes feminists into questioning their grasp

of power relations, and the implications of the absence of gender in his own work. Up Against Foucault shows that in spite of his lack of interest in gender, Foucault does have much to offer feminism - proposing new ways of understanding the control of women and especially the control of sexuality and bodies. This book offers new ground in relating Foucault's challenge to feminism to feminisms challenge to Foucault. Feminists are up against Foucault because he questions the key conclusions which feminists have come to about the nature of gender relations, and men's possession of power. It is an appraisal of how seriously we need to take this challenge.

Spiritual Healing from Sexual Violence -

Debra Meyers 2023-05-18

Spiritual Healing from Sexual Violence: An Intersectional Guide is a collection of essays from survivors, scholars, activists, spiritual leaders, and social justice practitioners that offers numerous intersectional and culturally

competent options for women, men, and non-binary conforming adults to create their own safe healing conditions and establish pathways for recovery. These chapters provide a wide range of survival stories that raise awareness of the issues involved in healing after sexual assault and also provide inspiration for reforming negative societal issues and patterns. In a classroom setting, these chapters deliver both the culturally grounded knowledge and the skillsets necessary for recovery. This is a vital guide for students and practitioners in counseling, social work, theology, and gender studies.

Childhood Sexual Experiences - Sally Hunter

2018-04-19

The issue of Childhood Sexual Experiences (CSEs) is highly controversial, and has generated considerable disagreement and conflict. Such experiences are often framed as child sexual abuse (CSA) within a discourse of child maltreatment. Sexual activity between

Recollecting Our Lives Womens Experience Of Childhood Sexual Abuse

adults and young children is indeed abuse, and fully merits the moral stance taken by therapists, health professionals and society. However, Childhood Sexual Experiences presents evidence that viewing all CSEs through the same prism of abuse, victimhood and commonly-held perceptions of gender socialisation may not always allow those affected to tell the whole story. Not all those who experienced sexual activity as children view themselves as victims, believe that their experiences had a profoundly or irrevocably negative impact on their lives, or view their experiences as 'abusive'. Others do not want their identities to be linked to specific events in childhood. Applying a positive psychology approach, Childhood Sexual Experiences recounts and explores the stories of those who have shown an ability to come to terms with or overcome the difficulties that they have faced, exploring the insights these narratives of resilience present to therapists and health and social care professionals. 'I would

encourage you to read this book with an open mind and to look for the strength and determination to be found in these narratives, remembering that those who are resilient may teach us how better to help those who are less fortunate.' - Sally V

Growing Up - Neil Sutherland 1997-01-01
By laying out the structure of children's lives and their childhood experiences in such settings as the home, the classroom, the church, and on streets and in the playground, the author describes how English-Canadian children grew up in 'modern' Canada.

Mothers Surviving Child Sexual Abuse -

Carol-Ann Hooper 2013-01-11

Despite increased recognition of the high incidence of child sexual abuse, little attention has so far been paid to the women on whom children primarily depend for care and protection - their mothers. Informed by theory and research on other situations involving loss, secrecy and moral dilemmas, as well as the rapidly accumulating knowledge of child sexual abuse, *Mothers Surviving Child Sexual Abuse* offers a new analysis of mother's reactions and responses, presenting a fresh perspective on a shocking problem for practitioners and policy-makers involved in child protection, as well as students and lecturers of social work and social studies and women's studies.

Confessional Politics - Irene Gammel 1999

The premise of *Confessional Politics* is that in

this confessional age, "telling all is in." From a unique variety of perspectives and angles, the essays in this collection explore the association of confession with femininity; they examine its function as a gender-specific discourse as they probe its many feminized genres and subgenres. *Confessional Politics* investigates the creative and strategic ways in which women shape the telling of their sexual stories in order to resist and negotiate the confessional practices designed to position them in conventional sexual frameworks. Investigating the confessional politics of traditional forms of social life writing (including erotic diaries, journals, letters, and confessional fiction), this book significantly expands its focus beyond conventional forms to include practices affecting mass readerships and audiences. The collection addresses provocative general topics: talk shows, sexual harassment, sexual abuse, sexuality, self-help books, and cross-dressing, as well as expressive works such as contemporary Canadian women's poetry,

Embodied Wisdom - Alison Pryer 2010-12-01
Embodied wisdom: Meditations on memoir and education by Alison Pryer, Ph.D. explores the interconnectedness of body, mind and spirit within diverse educational contexts. Evocative, sensual prose carries the reader on a journey through the personal and the remembered in a layered series of autobiographical essays, each

one affording deeper insights into the ways in which the inner, emotional life of an educator is intertwined with everyday embodied practice. This is a provocative text, alive with the richness and complexity of pedagogical experience, one that acknowledges the presence of the body, the spirit, the passionate, the subjective, the intuitive, the chaotic, and the sacred in all the relationships that make teaching and learning possible. In speaking beyond the limitations of dualistic pedagogy, in its diverse forms and locations, Embodied wisdom enters at times into unexpected and little explored pedagogical territories, engaging with educational contexts that our dualistic culture often denigrates, dismisses, or considers taboo. This work offers readers subtle understandings of the centrality of love, desire and eros in teaching and learning; carefully examines the connections between powerful family and school pedagogies, including “domestic” violence against women and childhood sexual abuse; opens up a textual

Recollecting Our Lives Womens Experience Of Childhood Sexual Abuse

space in which to contemplate the contemporary relevance of the ancient wisdom of Zen pedagogy; and gives serious consideration to the role that the public pedagogies of popular culture play in the formation of personal and cultural identity. The work of healing our dualistic educational culture is a significant political and ethical undertaking - a matter of social justice. Embodied wisdom is a book that lights the way for those who want to engage in meaningful cultural transformation. It is, above all, a generative and hopeful text, one that makes possible new kinds of conversations. It will be of interest to curriculum theorists and teacher educators, as well as those engaged in holistic education, social ecology, women's and gender studies, and cultural studies. This award-winning, ground breaking exploration of memoir as methodology is also an exquisitely written resource for those engaged in innovative arts-based and autobiographical research.

Too Scared To Learn - Jenny Horsman

2013-01-11

Too Scared to Learn explores the impact of women's experiences of violence on their learning, and proposes radical changes to educational programs through connecting therapeutic and educational discourses. Little attention has previously been paid to the impact of violence on learning. A large percentage of women who come to adult literacy programs have experienced, or are currently experiencing, violence in their lives. This experience of violence negatively affects their ability to improve their literacy skills. Literacy programs and other educational programs have not integrated this reality into their work. This book builds on extensive research that revealed the wide range of impacts violence has on adult literacy learning. Interviews with counselors and therapists, literacy learners, and educators working in different situations, and a wide range of theoretical and experiential literature, form the basis of the analysis. Educators are offered

Recollecting Our Lives Womens Experience Of Childhood Sexual Abuse

information to support reconceptualizing programs and practices and making concrete changes that will enable women to learn more effectively. The book makes clear that without an acknowledgment of the impact of violence on learning, women, rather than getting a chance to succeed and improve their literacy skills, get only a chance to fail, confirming to themselves that they really cannot learn. Essential reading for literacy and adult education practitioners, teachers of English as a second language, and education theorists, *Too Scared to Learn* explores the intersection among trauma, psychological theory, and pedagogy. The book is filled with a wealth of practical ideas, possibilities, and thoughts about what practitioners might do differently in classrooms

and educational institutions if we begin to think differently about violence.
