Young Men and Masculinities Victor J. Seidler 2013-07-04 In this book Victor J Seidler, one of the leading contributors to the growing debate about masculinities, turns his attention to the lives of young men and their understandings of themselves as gendered beings. By contextualizing their experiences and subjectivities within a rapidly globalizing world, Seidler pays particular attention to the impact of the global media. How does the mass circulation of images of men's bodies, desires and sexualities affect their self-perception and behaviours, and how are these images framed within particular histories, cultures and traditions? Questioning universalist theories of 'hegemonic masculinities', the book argues that young men often feel caught between prevailing masculinities and their own struggle for self-definition. It explores both how the idea of men as 'the First Sex' has been established within the West and the ways in which men in other cultures and societies affirm their gendered identities. Seidler pioneers new methodologies that involve listening to the silences surrounding male experience as well as to oral testimonies. This enables innovative analysis of the contradictions young men are faced with in both creating their own gendered identities and establishing more equal relationships within a world of intense inequalities.

Men, Law and Gender Richard Collier 2010-04-05 What does it mean to speak of 'men' as a gender category in relation to law? How does law relate to masculinities? This book presents the first comprehensive overview and critical assessment of the relationship between men, law and gender; outlining the contours of the 'man' of law across diverse areas of legal and social policy. Written in a theoretically informed, yet accessible style, Men, Law and Gender provides an introduction to the study of law and masculinities whilst calling for a richer, more nuanced conceptual framework in which men's legal practices and subjectivities might be approached. Building on recent sociological work concerned with the relational nature of gender and personal life, Richard Collier argues that social, cultural and economic changes have reshaped ideas about men and masculinities in ways that have significant implications for law. Bringing together voices and disciplines that are rarely considered together, he explores the way ideas about men have been contested and politicised in the legal arena. Including original empirical studies of male lawyers, the legal profession and fathers' rights and law reform, alongside discussions of university law schools and legal academics, and family policy and parenting cultures, this innovative, timely and important text provides a unique and important insight into the relationship between law, men and masculinities. It will be required reading for academics and students in law and legal theory, socio-legal studies, gender studies, sociology and social policy, as well as policy-makers and others concerned with the changing nature of gender relations.

End Of Masculinity MacInnes, John 1998-02-01 This book explains why both popular and academic commentators have found it impossible to define masculinity. It is because no such thing exists. Re-examining the ideas of thinkers such as Sigmund Freud and Thomas Hobbes, the author shows that modern societies faced the novel problem of explaining how men and women had equal rights, yet led such different lives, and solved it by inventing the concept of masculinity.

Fatherhood and Masculinities Catherine Gallais 2023-08-09 Based on novel ethnographic research conducted in New York City, this book explores through the lens of intersectionality how gender impacts men's experiences of full-time fatherhood, as well as how sexuality, race, class, faith, and so on result in unequal access to choices and opportunities as parents. Chapters analyze how perspectives on caregiving are complicated by varying cultural, gendered, and racialized stereotypes and representations that pull different fathers toward or push them away from particular models of fatherhood in an urban context. Additionally, the author interrogates how societal conceptions of men's bodies also play a role in how men understand their experiences of fatherhood. This book will be of interest to scholars and students studying gender, masculinity, and fatherhood.

Manhood in Early Modern England Elizabeth A Foyster 2014-09-25 This is the first book to focus on the relationships which men formed with their wives in early modern England, making it an important contribution to a new understanding of English, social, family, and gender history. Dr Foyster redresses the balance of historical research which has largely concentrated on the public lives of prominent men. The book looks at youth and courtship before marriage, male fears of their wives' gossip and sexual betrayal, and male friendships before and after marriage. Highlighted throughout is the importance of sexual reputation. Based on both legal records and fictional sources, this is a fascinating insight into the personal lives of ordinary men and women in early modern England.

Rediscovering Masculinity Victor J. Seidler 2003-09-02 Men have responded to feminism with feelings of anxiety, guilt and unease. It has taken time for men to consider ways of changing themselves rather than hiding behind feminist rhetoric. Since the mid '70s a structuralist interpretation of feminism has led to new perceptions of power, domination, oppression and sexuality. The author argues that historically masculinity has been identified with reason and femininity with emotion, so men have been trained to speak for others before learning to speak for themselves. Victor Seidler uses some prevalent positions in social theory to expose the main contradictions in received ideas of power, language and sexuality. Topics discussed include: reason, sexuality, change, control, identity, language, strength and intimacy.

The New Politics of Masculinity Fidelma Ashe 2007-11-30 The field of masculinities research continues to expand, and has become increasingly complex. Much of the contemporary analysis of men, masculinity and power has been influenced by the work of a number of profeminist writers who have been leading figures in developing new political interventions around men's identities and power. These men have been at the forefront of interrogations of the concept of masculinity and have attempted to develop new forms of radical gender-conscious politics for men who seek to extend gender justice. The New Politics of Masculinity is the first single-authored feminist text to engage critically with the theoretical frameworks which leading profeminist writers have developed in the field of masculinity studies. Drawing on new social movement and contemporary theory, the book examines the different models of politics that such writers have evolved for men who want to challenge dominant forms of masculinities and inequitable gender relationships. It also assesses the broader effects - on the field of men and masculinities research - of these writers' diverse theorisations of key political concepts such as masculinity, subjectivity, power and resistance. Overall, The New Politics of Masculinity outlines the central theoretical issues for scholars and students working in the area of critical studies of masculinities, and evaluates the effects of men's gender-conscious politics on feminist scholarship and research. The New Politics of Masculinity will be of great interest to students and scholars of gender theory, sociology, and politics.

Men, Masculinities and Social Theory (RLE Social Theory) Jeff Hearn 2014-08-13 This volume presents a series of illustrative and critical perspectives upon the developing study of men and masculinities and its importance for sociological theory. The contributions, by women and men from Britain and the United States, are organized around the unifying themes of Power and Domination; Sexuality; Identity and Perception. Feminism has raised profound questions for the social sciences, for sociological theory and for the study of men. The contributors to this volume discuss how such questions can be addressed. They demonstrate the range of theoretical traditions that can be brought to bear on the study of men, and underline the importance of understanding 'masculinities' in the plural. In a concluding section, three different views upon the controversy surrounding 'Men's Studies' are presented.

Recreating Sexual Politics (Routledge Revivals) Victor Seidler 2009-12-15 This thought-provoking book, first published in 1991, examines sexual politics in a world which is being radically changed by the challenges of feminism. Seidler explores how men have responded to feminism, and the contradictory feelings men have towards dominant forms of masculinity. Seidler's stimulating and original analysis of social and political theory connects personally to everyday issues in people's lives. It reflects the growing importance of sexual and personal politics within contemporary politics and culture, and demonstrates clearly the challenge that feminism brings to our inherited forms of morality, politics and sexuality.

Rethinking Masculinity Larry May 1996 Are men naturally aggressive? What makes a good father? How can men form intimate friendships? In the new edition of this popular anthology, seventeen philosophers explore these and other questions that relate to what it means to be a man, including questions about pornography and homosexuality. New essays look at masculinity and violence, research on differences between men's and women's brains, impotence, sexual ambiguity, and whether black men have a moral duty to marry black women.

Long Live the King Maite Escudero-Alías 2008-12-18 Masculinity is no longer a monolithic category, if ever it was. Long Live the King is a solid piece of scholarship that explores in depth the drag king phenomenon as well as key theoretical texts by feminist, postcolonial and cultural thinkers. Maite Escudero-Alías delves into drag king culture and highlights its relevance for the study of the relationship between gender, sex, race and sexuality. Introduced by a well-informed theoretical chapter that traces the roots of queer theory, Long Live the King provides the reader with a rigorous textual and cultural examination of drag kings' most innovative performances of masculinity in the USA and the UK. These chapters prove groundbreaking in their acute analyses of drag kings' acts in different media, ranging from still images to live performances, documentaries, mainstream television series and literature. Theory and analysis blend perfectly and Escudero-Alías's main contention in this research - the ambivalent nature of drag kings' performances of masculinity - is conducted convincingly. This book constitutes an invaluable contribution to the field of gender studies and a fair assessment of the political impact of minority artistic practices in contemporary culture.

Masculinities R. W. Connell 2005 This is an exciting new edition of R.W. Connell's ground-breaking text, which has become a classic work on the nature and construction of masculine identity. Connell argues that there is not one masculinity, but many different masculinities, each associated with different positions of power. In a world gender order that continues to privilege men over women, but also raises difficult issues for men and boys, his account is more pertinent than ever before. In a substantial new introduction and conclusion, Connell discusses the development of masculinity studies in the ten years since the book's initial publication. He explores global gender relations, new theories, and practical uses of masculinities research. Looking to the future, his new concluding chapter addresses the politics of masculinities, and the implications of masculinity research for understanding current world issues. Against the backdrop of an increasingly divided world, dominated by neo-conservative politics, Connell's account highlights a series of compelling questions about the future of human society. This second edition of Connell's classic book will be essential reading for students taking courses on masculinities and gender studies, and will be of interest to students and scholars across the humanities and social sciences.

Sustainability in Developing Countries Susan Osireditse Keitumetse 2020-10-08 This book illustrates an alternative approach to 'state of sustainability' reporting by presenting cross-sectoral and multi-disciplinary discussions on sustainability issues in the context of a developing country, Botswana. The book volume illustrates how academic publishing can supplement African governments' existing forms of reporting on sustainability by providing on-ground detailed descriptions and experiences relating to achievement of the various sustainable development goals (SDGs). In addition, this process involves, increases and enhances diversity of stakeholders that report on sustainability. Furthermore, the approach resonates with the UN's recommendation to build local strategies for implementation of the 2030 agenda for sustainable development. Conventional reporting on sustainability by most African countries is an exercise that is customarily the preserve of designated government ministries. While this form of reporting provides a consistent platform for tracking sustainable development goals, it can also benefit from juxtaposition with in-depth descriptions and experiences provided by academic publishing. Academia, through publishing, provides a framework for on-ground situation-analysis as well as in-depth descriptions of African country's grass-root experiences, thus allowing for temporal tracking of sustainable development milestones. As this volume illustrates, experiences from the various contributors on this volume highlight different points of departure towards achieving the 2030 agenda. Topics covered include biodiversity, water management, world heritage, environment, education, tourism, gender, institutional approaches to achievement of SDGs, as well as contribution of non-governmental organisations (NGO)'s amongst others.

Sartre, Self-formation, and Masculinities Jean-Pierre Boulé 2005 Published on the occasion of Sartre's Centenary, this book helps to understand the man behind the work, offering a psycho-social analysis of Jean-Paul Sartre with an emphasis on his masculinity. It sets out to contextualize Sartre in terms of his psycho-sexual formation and processes of self-constitution in view of his childhood. The main period under detailed study is 1905-1945, before Sartre became the Sartre. It concentrates on his early childhood, his teenage years in La Rochelle, the years at the Ecole Normale, and the first few years of his adulthood, with specific attention on the war years. An analysis of Sartre's relationships follows, with Simone de Beauvoir and other women and men (including love and sex), before a postscript covering the period 1973-1980. This essay is not a reductive account. It tells the story of Jean-Paul Sartre, from the inside out, so that the achievements of one of the major intellectuals of the 20th Century can be measured against his own internal struggles.

Spaces of Masculinities Bettina van Hoven 2005 Changing circumstances in Western and global societies have introduced new constraints and opportunities for men and the formation of male identities. Meanwhile, the emerging diversity of 'atypical' identities ('atypical' when compared with traditional conceptions of middle-class, white, heterosexual men) poses new challenges for the production and use of spaces. Spaces of Masculinities provides a comprehensive introduction to the innovative and diverse research on spaces of masculinity. Drawing on a variety of geographical research projects, the central concern of the book is to highlight the significance of research on masculinity in sociological and geographical work dealing with constructions of gender.

White Men Aren't Thomas DiPiero 2002-08-19 Psychoanalytic theory has traditionally taken sexual difference to be the fundamental organizing principle of human subjectivity. White Men Aren't contests that assumption, arguing that other forms of difference—particularly race—are equally important to the formation of identity. Thomas DiPiero shows how whiteness and masculinity respond to various, complex cultural phenomena through a process akin to hysteria and how differences traditionally termed "racial" organize psychic, social, and political life as thoroughly as sexual difference does. White masculinity is fraught with anxiety, according to DiPiero, because it hinges on the unstable construction of white men's cultural hegemony. White men must always struggle against the loss of position and the fear of insufficiency—against the specter of what they are not. Drawing on the writings of Freud, Lacan, Butler, Foucault, and Kaja Silverman, as well as on biology, anthropology, and legal sources, Thomas DiPiero contends that psychoanalytic theory has not only failed to account for the role of race in structuring identity, it has in many ways deliberately ignored it. Reading a wide variety of texts—from classical works such as *Oedipus Rex* and *The Iliad* to contemporary films including *Boyz 'n' the Hood* and *Grand Canyon*—DiPiero reveals how the anxiety of white masculine identity pervades a surprising range of Western thought, including such ostensibly race-neutral phenomena as Enlightenment forms of reason.

Cultures of Masculinity Tim Edwards 2004-08-02 Presenting a survey of the social, cultural and theoretical issues which surround and inform our understanding of masculinity, this book explores the interface between traditional sociological approaches and the work covered by more post-structural, media-driven or cultural perspectives. Edwards well known for his work on representations of masculinities, uses grounded examples of the job market and domestic violence to set his theoretical discussion. He argues that there is a need for more dialogue on men and masculinities between disciplines, and considers the validity of the concerns and anxieties which surround masculinity in the contemporary world through a range of key topics, including: the new man, the new lad and 'men's movements' men, masculinity and violence marginalized masculinities: black masculinity and gay male sexuality queer theory, performativity and fashion cinema, representation and the body. One of the most comprehensive and progressive studies of modern masculinity available, this book will be essential reading for students of gender, culture and sociology.

Unreasonable Men Victor J. Seidler 2013-07-23 This much needed book is the first to show how dominant forms of masculinity are implicated in the traditions of social theory that have emerged since the Enlightenment. The author shows how an 'unreasonable' form of reason has emerged from the separation of reason from emotion, mind from body, nature from culture, public from private, matter from spirit - the dualities that have shaped our vision of modernity. The book argues that men need to explore critically their power and experience which has been rendered invisible by the dominant traditions of social theory. Instead of legislating for others they have to learn to speak more personally for themselves.

Reworking Gender Karen Ashcraft 2004 " Reworking Gender is a remarkable analysis of the intersections of discourse, gender, and organizing that not only addresses contemporary metatheoretical concerns but also illuminates these issues with archival and interview data. . . . Reworking Gender systematically lays out arguments for the importance of work in our field, for communication's connections with and potential contributions to related disciplines, and for possible ways in which researchers can continue to challenge boundaries between presumably incommensurable discourses. Without a doubt, Reworking Gender will prove to be a landmark book in feminist, critical-cultural, organization studies, and organizational communication theorizing." --Patrice M. Buzzanell, Purdue University Reworking Gender: A Feminist Communicology of Organization examines the place of gender and feminist scholarship in contemporary critical organization studies. Departing from the common view of gender as a specialized branch of organization scholarship, authors Dennis K. Mumby and Karen Lee Ashcraft reposition feminism in a communication-centered model that integrates recent developments in feminist, critical, and postmodern organizational studies. Linking theory to practical projects, the authors address many of the complex and often contradictory concerns of critical organizational scholarship, including issues of discourse, subjectivity, power, race, and class. In a compelling and timely fashion, this important volume explores Gendered organization studies in the wake of the discursive turn The dynamic relationship between gender and organization The social construction of gendered work identities The intersection of gender, race, sexuality, and class The dialectical relation of power and resistance With its interdisciplinary approach, Reworking Gender: A Feminist Communicology of Organization will be of significant interest to scholars and graduate students in such fields as organizational communication, management and organization studies, sociology, and gender studies.

AIDS: Setting A Feminist Agenda Lesley Doyal 2018-12-07 AIDS: Setting a Feminist Agenda" presents an overview of the important issues raised for feminist theory and practice by the HIV/AIDS epidemic, and outlines the direction in which feminist debates about the subject are developing. It makes essential links between feminism and HIV/AIDS work, and not only demonstrates that AIDS is a feminist issue, but also suggests areas where feminism is long overdue. The essays discuss medical issues; the specific social and political impact of HIV/AIDS on the lives of women of colour, lesbians, injecting drug users and prostitute women; And Current Health Educational And Health Promotional Practice As It relates to women.; The volume is theoretical and practical - suggesting theoretical models for understanding and challenging the social factors which are conducive to the spread of HIV among women and among men, as well as offering models of good practice for working with and for women.
