The Palgrave Handbook of Male Psychology and Mental Health -

John A. Barry 2019-03-01

This Handbook represents the first concerted effort to understand male mental health in a way that facilitates a positive step forward in both theory and treatment. An alarming number of men experience serious mental health issues, as demonstrated by high rates of suicide and violent offending. Despite these problems, the study of male psychology has either been overlooked, or viewed as a problem of defective masculinity. This handbook brings together experts from across the world to discuss men's mental health, from prenatal development, through childhood, adolescence, and fatherhood. Men and masculinity are explored from multiple perspectives including evolutionary, cross-cultural, cognitive, biological, developmental, and existential viewpoints, with a focus on practical suggestions and demonstrations of successful clinical work with men. Throughout, chapters question existing models of understanding and treating men's mental health and explore new approaches, theories and interventions. This definitive handbook encapsulates a new wave of positive theory and practice in the field of male psychology and will be of great value to professionals, academics, and those working with males through the lifespan in any sector related to male mental health and wellbeing.

Tract No. 1(-6). - National Currency Reform Association (LONDON) 1851

The Virginian - Owen Wister 2012-01-01

This groundbreaking novel is considered by many to be one of the most important early entries in the western genre. History of Wyoming (Second Edition) - T. A. Larson 1990-08-01

Child Abuse - Laura Hoyano 2010

There is universal agreement that 'something must be done' about child abuse, that the legal and policy frameworks established for the protection of children are inadequate. Time and again this is brought home by cases that reveal major failures in the investigation and prosecution of child abuse suspects. There is much less clarity about

what qualifies as child abuse and what should be done about it. Failings in the law are often invoked by politicians and the media at times of crisis, when a societal response is demanded. The presence of new legislation on the statute book or the creation of rules and protocols which professionals must follow is one socially acceptable sign that the problem has been recognized and that an effective response has been implemented. Are these ad hoc responses helpful? If not, what should be done to address the current weaknesses in the protection of children? This book looks across legal and geographical boundaries to consider the law and policy on child abuse. It examines the whole process of child protection, from complaint investigation to prosecution, and analyzes the legal disciplines of criminal, family, tort and evidence law as they bear on child abuse cases. Material is drawn from over 75 jurisdictions, including major empirical research in the UK, US, Canada, Australia and New Zealand. Throughout the book's focus is on achieving a coherent program for reforming the law and practices responsible for child protection. Its contribution to policy debates was recognized by the Judges of the 2008 Inner Temple Book Prize who, in awarding it the prize for outstanding legal scholarship, heralded it as a 'masterly book on a hugely important subject', one that will 'make an outstanding contribution to the formation and understanding of legal policy'.

Buyology - Martin Lindstrom 2010-02-02

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

The Promise of Adolescence - National Academies of Sciences, Engineering, and Medicine 2019-08-26

Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can

ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence—rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

Contemplating Courts - Lee Epstein 1995

Seventeen thought-provoking essays in this sophisticated yet accessible reader demonstrate how political scientists conduct research on law, courts, and the judicial process, and at the same time answer interesting, substantive questions. Illustrating the breadth and depth of judicial politics studies, the essays convey to students the array of contemporary thinking -- both theoretical and methodological -- at work in the field. The book's five parts cover subjects taught in most judicial politics courses. Because each chapter stands alone, instructors have the flexibility of assigning less than the whole book or chapters in a different order. Topics examined range from information used by voters electing judges to the credibility of victims of sexualized violence. Accessible to both undergraduate and graduate students, *Contemplating Courts* offers fascinating views into both the law and courts field and the research process itself. Epstein provides in the first chapter an overview of the key elements of judicial process research and defines key terms. Technical notes and methodology appendices offer students additional guidance.

Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.
