

# Sex Change On Nhs

*Gender Dysphoria* - Susan Evans 2021-05-20

In recent years, there has been an explosion in the number of children and young people who diagnose themselves as gender dysphoric, or trans. In the UK, and worldwide, there is a growing tendency to refer them on to 'specialist' gender services almost as soon as they express any confusion or distress about their biological sex or gender identity. Due to the rapidly rising numbers and various pressures on the system, patients are increasingly likely to be offered life-altering medication and/or surgical treatments, often with little exploration of their emotional world. As so little is yet known or understood regarding this increase in gender incongruent patients, it seems precipitous to proceed onto physical treatments before any assessment work is undertaken. Many who present as gender dysphoric have complex needs with comorbid problems such as autism, histories of abuse or trauma, social phobias, depression, eating disorders, and other mental health symptoms. Therefore, all aspects of the individual's life deserve thorough assessment and therapeutic work. This book is aimed primarily at clinicians working in the field to provide a model for understanding, assessing, and treating gender dysphoria. The model uses a psychoanalytic framework to help explain disturbed states of mind and how psychic defences can be enlisted unconsciously to avoid overwhelming psychic pain. This offers professionals a way of trying to think with, and offer understanding to, their trans-identifying clients. Clinical examples are given to illustrate these processes and promote the understanding of transgender children, adolescents, and young people and their internal worlds, their thinking, and their interpersonal relationships. As well as clinical exploration and understanding, the book includes an overview of the current political, social, and clinical environments which have all impacted on the clinical care of trans-identifying individuals. As well as professional and trainee clinicians, this book might also prove useful to parents, other professionals, and possibly the gender dysphoric person too.

**Trans Britain** - Ms Christine Burns 2018-01-25

Over the last five years, transgender people have seemed to burst into the public eye: Time declared 2014 a 'trans tipping point', while American Vogue named 2015 'the year of trans visibility'. From our television screens to the ballot box, transgender people have suddenly become part of the zeitgeist. This apparently overnight emergence, though, is just the latest stage in a long and varied history. The renown of Paris Lees and Hari Nef has its roots in the efforts of those who struggled for equality before them, but were met with indifference - and often outright hostility - from mainstream society. Trans Britain chronicles this journey in the words of those who were there to witness a marginalised community grow into the visible phenomenon we recognise today: activists, film-makers, broadcasters, parents, an actress, a rock musician and a priest, among many others. Here is everything you always wanted to know about the background of the trans community, but never knew how to ask.

**Supporting Transgender and Non-Binary People with Disabilities or Illnesses** - Jennie Kermode 2019-08-21

By drawing on the experience of trans people who are affected by physical disability, chronic illness and mental illness, this book is the definitive guide on providing best practise in approaches to health and care policy. Suggesting solutions to areas where understanding and care provision is poor, Kermode gives advice on topics such as transitioning with a disability, sex-specific service provision and fertility and reproduction. The book also examines how health and care professionals can adapt to cater for transgender and non-binary people's needs and can support those who must use health services due to their condition. Written in an accessible and comprehensive manner, Supporting Transgender and Non-Binary People with Disabilities or Illnesses is an essential guide for practitioners in health and social care positions.

**Sexual Health Medicine** - Darren Russell 2011

Authoritative coverage is offered of the biological, clinical, laboratory, psychosocial, and public-health aspects of sexual health medicine. A feature of the book is its holistic approach, with the client seen as a

whole person, rather than simply the owner of a set of malfunctioning genitalia.

*CORROSIVE IMPACT OF TRANSGENDER IDEOLOGY.* - JOANNA. WILLIAMS 2020

**Management of Gender Dysphoria** - Carlo Trombetta 2015-03-03

This book is especially focused on the surgical aspect on Gender Dysphoria. Male to female surgery is widely discussed as well as the female to male conversion. Full information on hormone administration and surgical procedures are provided. Mental health issues are also described, as well as ethics, the law and psychosocial issues. The text is extensively referenced and includes numerous photos, tables and figures to clearly illustrate information. Based on collaboration between international experts in transgender health, this book is an essential guide for health care professionals, educators, students, patients and patients' families concerning the psychological, hormonal, surgical and social support of transgender individuals. [Transgender Experiences](#) - Great Britain. National Health Service 2009

*The Gender Games* - Juno Dawson 2017-06-01

\*WINNER OF THE UK BLACK PRIDE LITERARY PRIZE FOR NON-FICTION DIVA AWARDS 2017\* \*AS SEEN ON TRANSFORMATION STREET\* 'Opens minds, breaks down myths and vaporises prejudice - I loved it!' Rebecca Root, star of Boy Meets Girl 'Funny, thoughtful and honest' Stylist 'It's a boy!' or 'It's a girl!' are the first words almost all of us hear when we enter the world. Before our names, before we have likes and dislikes - before we, or anyone else, has any idea who we are. And two years ago, as Juno Dawson went to tell her mother she was (and actually, always had been) a woman, she started to realise just how wrong we've been getting it. Gender isn't just screwing over trans people, it's messing with everyone. From little girls who think they can't be doctors to teenagers who come to expect street harassment. From exclusionist feminists to 'alt-right' young men. From men who can't cry to the women who think they shouldn't. As her body gets in line with her mind, Juno tells not only her own story, but the story of everyone who is shaped by society's expectations of gender - and what we can do about it. Featuring insights from well-known gender, feminist and trans activists including Rebecca Root, Laura Bates, Gemma Cairney, Anthony Anaxagorou, Hannah Witton, Alaska Thunderfuck and many more, The Gender Games is a frank, witty and powerful manifesto for a world in which everyone can truly be themselves. The Gender Games has been optioned by SunnyMarch Productions to be turned into an original television series, written by Rose Lewenstein.

**Fifty Years of the Tavistock Clinic (Psychology Revivals)** - H.V. Dicks 2014-10-14

Originally published in 1970 this title commemorates the men and ideas that started, inspired and established a pioneer institution in British psychiatry. Based on the impetus of Freudian and related innovations after the First World War, the Tavistock Clinic offered treatment, training and research facilities in the field of neurosis, child guidance and later on group relations. Dr Dicks, who had been associated for nearly forty years with the work and personalities that helped to develop the Tavistock venture, describes the struggles and capacity for survival of the clinic. He shows how, belonging neither to the older classical psychiatry nor to orthodox psychoanalysis, and suspect to both, the Clinic nevertheless became increasingly used by the rest of the profession as a psychotherapeutic resource. Dr Dicks describes the influence of the Tavistock on the medical, psychological and social work scene both before and after the Second World War, and assesses its achievements as a centre of psycho- and socio-dynamic thinking. The Tavistock is shown as a pioneer sui generis, launching psychosomatic research and initiating the exciting ventures in social psychiatry associated with the Army in the Second World War. As the Tavistock was the outcome of work with shell-shock victims in the first war, so its offspring, the Institute of Human Relations, was the natural continuation of the military effort in man-management, morale and group dynamic studies.

The book includes an account of the inter-relationship between the Clinic, now part of the National Health Service, and the Institute, a private corporation. Still going strong as part of the Tavistock and Portman NHS Foundation Trust today this is an opportunity to revisit its early history.

**Trans** - Juliet Jacques 2015-09-22

In July 2012, aged thirty, Juliet Jacques underwent sex reassignment surgery—a process she chronicled with unflinching honesty in a serialised national newspaper column. *Trans* tells of her life to the present moment: a story of growing up, of defining yourself, and of the rapidly changing world of gender politics. Fresh from university, eager to escape a dead-end job and launch a career as a writer, she navigates the treacherous waters of a world where, even in the liberal and feminist media, transgender identities go unacknowledged, misunderstood or worse. Revealing, honest, humorous, and self-deprecating, *Trans* includes an epilogue with Sheila Heti, author of *How Should a Person Be?*

**Understanding Trans Health** - Pearce, Ruth 2018-06-06

What does it mean for someone to be 'trans'? What are the implications of this for healthcare provision? Drawing on the findings of an extensive research project, this book addresses urgent challenges and debates in trans health. It interweaves patient voices with social theory and autobiography, offering an innovative look at how shifting language, patient mistrust, waiting lists and professional power shape clinical encounters, and exploring what a better future might look like for trans patients.

**Inventing Transgender Children and Young People** - Heather Brunskell-Evans 2019-10-08

The essays in this volume are written by clinicians, psychologists, sociologists, educators, parents and de-transitioners. Contributors demonstrate how 'transgender children and young people' are invented in different medical, social and political contexts: from specialist gender identity development services to lobby groups and their school resources, gender guides and workbooks; from the world of the YouTube vlogger to the consulting rooms of psychiatrists; from the pharmaceutical industry to television documentaries; and from the developmental models of psychologists to the complexities of intersex medicine. Far from just investigating how they are invented the authors demonstrate the considerable psychological and physical harms perpetrated on children and young people by transgender ideology, and offer tangible examples of where and how adults should intervene to protect them.

*Trans and non-binary gender healthcare for psychiatrists, psychologists, and other health professionals* - Christina Richards 2020-08-27

A concise, practical guide for mental health professionals working with transgender and non-binary people.

**Supporting Young Transgender Men** - Matthew Waites 2018-03-21

There is currently a lack of information available regarding the specific needs of young transgender men, and the barriers that they face. This can lead to professionals having to give generic advice, which may not be appropriate for the situation. Written to address this shortfall, this book provides professionals with the guidance they need to effectively and supportively work with young transgender men. It looks at some of the obstacles that trans men face across health and care services. Addressing topics such as the social impact of transitioning, the potential impact on mental health and emotional wellbeing and common myths and misconceptions about transitioning, this guide is essential for anyone working with young transgender men.

*Transition Denied* - Jane Fae 2018-05-21

Trans people in the UK currently face widespread prejudice and discrimination, from how they are described in the media to the lack of healthcare support they receive. This institutional bias is illustrated by the tragic case of Synestra de Courcy, who died following neglect and rejection from the NHS, leading her to sex work to fund her transition and dangerous self-medication. Charting Syn's life from childhood through to her untimely death aged just 23, Jane Fae exposes the gross institutional and societal discrimination trans people experience on a daily basis and its impact on the lives of trans people young and old. Promoting honest discussion and bringing these hidden issues into the light of day, this book is a must read for anyone interested in trans rights, and NHS accountability.

*Time to Think* - Hannah Barnes 2023-02-23

SHORTLISTED FOR THE ORWELL PRIZE FOR POLITICAL WRITING 2023 'This is what journalism is for' - Observer Time to Think goes behind the headlines to reveal the truth about the NHS's flagship gender

service for children. The Gender Identity Development Service (GIDS), based at the Tavistock and Portman Trust in North London, was set up initially to provide — for the most part — talking therapies to young people who were questioning their gender identity. But in the last decade GIDS has referred more than a thousand children, some as young as nine years old, for medication to block their puberty. In the same period, the number of young people seeking GIDS's help exploded, increasing twenty-five-fold. The profile of the patients changed too: from largely pre-pubescent boys to mostly adolescent girls, who were often contending with other difficulties. Why had the patients changed so dramatically? Were all these distressed young people best served by taking puberty blockers and then cross-sex hormones, which cause irreversible changes to the body? While some young people appeared to thrive after taking the blocker, many seemed to become worse. Was there enough clinical evidence to justify such profound medical interventions in the lives of young people who had so much else to contend with? This urgent, scrupulous and dramatic book explains how, in the words of some former staff, GIDS has been the site of a serious medical scandal, in which ideological concerns took priority over clinical practice. Award-winning journalist Hannah Barnes has had unprecedented access to thousands of pages of documents, including internal emails and unpublished reports, and well over a hundred hours of personal testimony from GIDS clinicians, former service users and senior Tavistock figures. The result is a disturbing and gripping parable for our times.

**Transgender Health** - Benjamin Vincent 2018-06-21

The number of people coming out as transgender continues to rise, and this book shows healthcare and medical practitioners how to deliver excellent primary and secondary care to gender diverse patients. This guide provides accessible and practical advice on tailoring the social and ethical aspects of practice to the needs of each individual. Beyond setting out how clinical procedures should work for gender reassignment, it explains how to use language and pronouns in a respectful way, provides information on transgender services and resources, and offers insights into the challenges commonly faced by transgender people in both medical and social contexts. Based on cutting edge research and the lived experience of the author as a non-binary person, this is essential reading for all those working to meet the needs of transgender people in healthcare settings.

**The Trans Partner Handbook** - Jo Green 2017-08-21

Individuals who transition from one gender to another are often in some degree of a relationship, and over 55% of these relationships endure through the transition process. While more resources are emerging for trans people themselves, there is very little information available for their partners. Through first-hand accounts and vignettes of successful partnerships, this book presents detailed descriptions of everything involved in the transition process, with specific guidance for those supporting a partner in transition.

Topics include disclosure, mental health, coming out, loss and grief, sex and sexuality and the legal, medical and social practicalities of transitioning. In this essential guide, people whose partners are across the transgender spectrum speak out on their own experiences with personal advice and support for others.

*Transgender Behind Prison Walls* - Sarah Jane Baker 2017-05-08

After explaining 'What is transgender?' this first book on transgender in a prison setting looks at the entire HM Prison Service regime for such people. Ranging from hard information about rules and regulations, the transition process and how to access it to practical suggestions about clothing, wigs and hairpieces, make-up and coming out, the book also deals with such matters as change of name, gender identity clinics, hormones, medication and use of prison showers and toilets. Covering the entire transition process the book contains contributions from a number of transgender prisoners as well as extracts from reports showing how those in transition still tend to attract a negative portrayal. Also included are the special security implications of related procedures and descriptions of the attitudes to transgender inmates of other prisoners and staff. It contains a number of appendices dealing with the latest 2016 HM Prison Service Instruction on transgender prisoners and a range of support mechanisms including a list of specialists in the field and other useful reference sources and contacts. It also contains Sarah Jane Baker's account of her own male-to-female transition and the difficulties she has faced behind bars. The first book of its kind. Written by a transgender life-sentence prisoner. Includes key extracts from official publications. With a graphic account of the author's own transition journey. Contains practical information and tips. Reviews 'An important contribution to current debates on the treatment of transgender prisoners'— Mia

Harris, Oxford University. 'I was heartbroken. It felt like a bereavement. The young man I had come to love as a son had disappeared overnight, and been replaced by a girl who was not my daughter, but, I felt, a stranger'— Pam Stockwell (From the Foreword)

**Delusions of Gender: How Our Minds, Society, and Neurosexism Create Difference** - Cordelia Fine

2011-08-08

Using findings from the latest information in developmental psychology, neuroscience and education, this book debunks the assumed differences between male and female brain function and reveals the brain's remarkable plasticity and the influence of culture on identity. Reprint.
