## **The Pediatric and Adolescent Hip** - Sattar Alshryda 2019-06-28

This book provides an evidence-based approach to treating the increasing number of children and adolescents presenting with hip disorders. It integrates the most up-to-date data with essential knowledge, gleaned from decades of previous research and practice. Each chapter provides a comprehensive text which integrates relevant pathophysiology, clinical assessment, and imaging, with an evidence-based approach to non-operative and operative management, authored by globally recognized experts in the field of pediatric hip surgery. Detailed surgical techniques, illustrated with original medical drawings and accompanied by their respective indications, anticipated outcomes, and potential complications, are also featured, in this first orthopedic text dedicated solely to the pediatric and adolescent hip. The Paediatric and Adolescent Hip: Essentials and Evidence will be an indispensable resource for wide spectrum of audience including paediatric orthopaedic surgeons, general practitioners, general orthopaedic surgeons, trauma surgeons, orthopaedic residents, emergency department doctors, and physiotherapists seeking a clear and consistent evidence-based guide to treating the paediatric hip.

## **Violence and Mental Health** - Jutta Lindert 2015-02-25

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the

spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

## **Fairies Afield** - Mrs. Molesworth 2022-09-15

Fairies Afield" is a delightful children's book with kind and generous kids doing wonderfully lovely things, for which they receive magical prizes from fairies. It contains four charming stories. "Ask the Robin" deals with two orphaned sisters who need to survive on their own but may require help from fairies. "A Magic Table" is about three poor cousins who must earn the right to inherit their uncle's assets. "The Weather Maiden" revolves around a shy young girl having an awful time adapting to living with her aunt and uncle. "The Enchanted Trunks" deals with a girl who decides to travel with her cousin, but her main concern is being able to pack everything efficiently.

Learning with Information Systems - Simon Bell 2013-02-01

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent.

Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.
