Long Distance Relationship Guide A Simple Guide for Christian with Tips on How to Make A Long Distance Relationship Work This guide will be simple in that it intends to provide practical, understandable advice for those particular Christian (or curious non-Christian) couples who choose to (or are forced to) maintain a long-distance romantic relationship. However, maintaining a thriving romantic relationship of any sort is anything but easy or simple. It takes work. It asks that two people swallow a greater part of their selves in order to contribute to the well-being and functioning of the whole bond. The first half of this guide all about the habits of successful Christian couples. It's about attitudes and behaving in a way that promotes the longevity of the relationship, whether newly formed or bonded for years and years. You might be searching particularly for some ideas on what you can do with your significant other while in a long-distance relationship. For example, practical and creative ways of bonding. You will

find those tidbits in the second half of the guide. This guide, while written specifically for the Christian audience, is still inclusive for any other audience that might read it. While much of the information presented here come from and are reasoned with the Christian perspective, the advice is nonetheless practical whether you subscribe to the Christian faith or not. I invite you to stick around, for there might be something useful for you.

Yes, distance can put an enormous strain on a relationship, but claiming that "distance" is the only reason a relationship didn't work out, or cannot work is putting your hands over your ears and shouting,

"Land" because the truth is, it's too much to handle. I've met many men and women who won't try long distance relationships because according to them "long distance relationships just don't work." That simply isn't true! Long distance relationships Can and do work if the two individuals involved want it to. In my opinion, the question is not "do long distance relationships work?" But rather "Do both of you want to make it work?" If you both want to make it work, distance is just another obstacle that two people who truly love each other can easily overcome if they really want to. These simple to follow tips will help your long distance relationship not only survive distance, they'll also help you lay a strong foundation for a relationship that is fun, fulfilling and successful last? Wired for Love - Stan Tatkin 2012-01-02

"What the heck is my partner thinking?" is a common refrain in romantic relationships, and with good reason. Every person is wired for love differently, with different habits, needs, and reactions to conflict. The good news is that most people's minds work in predictable ways and respond well to security, attachment, and

rituals, making it possible to actually neurologically prime the brain for greater love and fewer conflicts. *Wired for Love* is a complete insider's guide to understanding a partner's brain and promoting love and trust within a romantic relationship. Readers learn ten scientific principles they can use to avoid triggering fear and panic in their partners, manage their partners' emotional reactions when they do become upset, and recognize when the brain's threat response is hindering their ability to act in a loving way. By learning to use simple gestures and words, readers can learn to put out emotional fires and help their partners feel more safe and secure. The no-fault view of conflict in this book encourages readers to move past a "warring brain" mentality and toward a more cooperative "loving brain" understanding of the relationship. Based in the sound science of neurobiology, attachment theory, and emotion regulation research, this book is essential reading for couples and others interested in
