The Unwritten Diary of Israel Unger Carolyn Gammon 2014-07-22 At the beginning of the Nazi period, 25,000 Jewish people lived in Tarnow, Poland. By the end of the Second World War, nine remained. Like Anne Frank, Israel Unger and his family hid for two years in an attic crawl space. Against all odds, they emerged alive. Now, after decades of silence, here is Israel's "unwritten diary." Nine people lived behind that false wall above the Dagnan factory in Tarnow. Their stove was the chimney that went up through the attic; their windows were cracks in the wall. Survival

depended on the food the adults leaving the hideout at night were able to forage. Even at the end of the war, however, Jewish people emerging from hiding were still not safe. After the infamous postwar Kielce pogrom, Israel's parents sent him and his brother as "orphans" to France in a program called Rescue Children, a Europe-wide attempt to find Jewish children orphaned by the Holocaust. When the family was finally reunited, they lived a precarious existence between France—as people sans pays—and England until the immigration papers for Canada came through in 1951. In Montreal, in the world described so well by Mordecai Richler, Israel's father, a co-owner of a factory in Poland, was reduced to sweeping factory floors. At the local yeshiva (Jewish high school), Israel discovered chemistry, and a few short years later he left poverty behind. He had a stellar academic career, married, and raised a family in Fredericton, New Brunswick. The Unwritten Diary of Israel Unger is as much a Holocaust story as it is a story of a young immigrant making every possible use of the opportunities Canada had to offer.

Known Aubrey Sampson 2021-09 "So much is tied up in our longing to know who we are: our worth, whether we're loved, what we're meant to do with our lives. But there's a powerful truth that settles every question: God has named us, and the names he has spoken over us settle every question and pain we have experienced in our search for identity ... But we also carry other names--painful, damaging names that we have spoken over ourselves or that others have branded on us. Too often, in times of low self-worth, grief, or failure, we exchange our God-given identity for those false names. When we believe God's names for us, we will discover a life lived with purpose and passion. Are you ready to accept God's invitation to silence the inner voice that keeps you from living freely, joyfully, and confidently?"--Tyndale House website

interested in a guy. An introverted woman may become even shy and closed up around a guy she's attracted to, while a more extroverted woman may become overly catty and mean-natured with her teasing towards the man she's smitten with. Sadly, most guys have no idea that an interested woman may act in any of these ways unless they've had considerable experience with the opposite sex. So although different women act very differently when they're interested in a man, in general, men tend to read signs of romantic interest in a very uniform way. Because of this, a woman can place the odds of meeting Mr. Right more in her favor by adopting a seduction strategy that speaks directly to the masculine subconscious. The dating advice for women presented in this short book is designed specifically for single women who want to meet more quality guys in social environments, indicate their interest in a ladylike way, and entice their handsome observers to pursue them"--Back cover

Judith Zack Budryk 2016-12-13 Katherine Kinneavy is an NYPD homicide detective with a drinking problem, an Irish temper and an unflagging commitment to any case she's assigned. Wendell Roane is an ambitious reporter specializing in stories about violence against women. Joe Cataldo is an overworked Mafia underboss desperate to keep things on an even keel, lest New York's underworld regress into the wars and bloodbaths of the '30s and '70s. When a mob lieutenant and a bar owner, both with a history of unspeakable crimes against women, turn up dead on the same cold autumn morning, a vigilante group styling itself "Judith" takes credit for both killings and promises more. These three vastly different people crash into each other's orbit in search of the group, and no matter how the search ends, it may leave everything they think they know about themselves and the worlds they live in shaken to the very core.

The Guyde Howie Reith 2016-11-19 The Guyde is the most comprehensive men's dating and self-improvement book ever written, designed to be everything you need to transform into the most

confident version of yourself. There are no lines or routines; instead you'll find exercises and information to improve your self-esteem, social skills, and other elements integral to social success. Everything in these pages is backed with scientific evidence, and when I say scientific evidence, I mean cited peer-reviewed literature, not pop evolutionary psychology or the "law of attraction." You won't be reading anecdotes telling you about my "successes" or opinions; you'll be learning the practical steps necessary for the specific changes you want to manifest in your life. The Guyde is divided into four sections: Part I - Psychology Part I focuses on the internal elements of social interaction. How do you overcome your toxic self-limiting beliefs that keep you from being authentic with people? How do you overcome your fears? How can you stay motivated to make your changes? You will learn clinically effective approaches to all of these and more. Part II - Social Skills For many men, the biggest barrier between themselves and social success is a lack of social skills and awareness. In Part II, you'll learn how to shore up this weakness. You will learn how to listen, banter, share stories, and assert yourself with others. You'll learn how to improve your body language and vocal tonality to project confidence and charisma. Part III - Physical Attractiveness Part III will teach you how to improve your physical features. The first two chapters detail the most clinically effective approaches to diet and exercise. We'll also discuss the basics of fashion and how to dress to impress. Master Part III, and when you go out, you will turn heads. Part IV - Dating The final portion of The Guyde deals with dating, in this version, in a heterosexual male context. You'll learn the best places to meet potential dates, how to flirt, and how to ask someone out. You'll learn how to plan brag-worthy romantic evenings and how to address problems like rude cancellations and "ghosting." You'll learn how to interact physically while being sensitive to your date's wishes, as well as how to perform better in bed. You'll learn why relationships fail and how to avoid the pitfalls most

How to Get a Girl to Like You Alex Leandres 2014-10-16 According to scientists, biology and chemistry both play big roles in the attraction between people. Pheromones, chemicals released by the body, allow animals of the same species to 'communicate' with each other. Studies further reveal that pheromones subconsciously affect the behavior of insects and animals. Insects that work in colonies such as bees and ants communicate by using these chemicals and skunks ward off other animals by releasing a very unpleasant pheromone-related scent. Animals that belong to the same species send out chemical signals to each other to give the message that they are compatible genetically and that they can be good reproductive mates. In view of all these studies, does it mean that people should just leave it to their pheromones to find their partners? Experts say no. Humans, after all, are gifted with intellect and free will - a combination that insects and other animals don't possess. Every person has a conscious decision when it comes to choosing potential mates. So although biology plays a big role in human attraction, there are still other factors that lead people to be attracted to each other. This book will show you exactly how to attract a girl, impress her, and get her to like you. You'll find out what it really takes for a man to get the girl of his dreams to like him back. A lot of men often wonder why some individuals of their gender have more success at

2023-06-19 Jessie Norwood, gaily excited, came bounding into her sitting room waving a slit envelope over her sunny head, her face alight. She wore a pretty silk slip-on, a sports skirt, and silk hose and oxfords that her chum, Amy Drew, pronounced "the very swellest of the swell." Beside Amy in the sitting room was Nell Stanley, busy with sewing in her lap. The two visitors looked up in some surprise at Jessie's boisterous entrance, for usually she was the demurest of creatures. "What's happened to the family now, Jess?" asked Amy, tossing back her hair. "Who has written you a billet-doux?" "Nobody has written to me," confessed Jessie. "But just think, girls! Cultivating Joyful Learning Spaces for Black Girls Monique W. Morris 2022-06-23 Build learning environments that support Black girls' excellence and academic achievement. In this thought-provoking and illuminating book, former educator and social justice advocate Monique W. Morris addresses the harmful policies, practices, conditions, and assumptions that too often criminalize Black girls' behavior and steer them down "school-to-confinement pathways" in disproportionate numbers. The key to disrupting such punitive pushout is for educators to develop meaningful relationships with Black girls—connections that are grounded in cultural understanding and focused on helping Black girls develop their identities as valued individuals and contributors to the larger community. Such relationships, Morris argues, can shift Black girls' schooling from a punishment-oriented experience to one that is joyful, healing, and transformative. Along with her own research and experience, Morris explores the topic through in-depth conversations with three distinguished educators and clinical practitioners: Venus Evans-Winters, Janice Johnson Dias, and Kakenya Ntaiya, who provide insights about the challenges of educating Black girls and uplifting accounts of success in promoting their excellence and achievement. These conversations and takeaways for practice are

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For

instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
