**Polymyalgia Rheumatica and Giant Cell Arteritis** Jozef Rovensky 2010-05-06 In the present monograph, we offer current insights into polymyalgia rheumatica and giant cell arthritis. Both diseases are typical for advanced age, and their incidences increase with aging. Both diseases are a center point of interest not only for rheumatologists, gerontologists, ophthalmologists or neurologists, but also for general practitioners. Early diagnosis and rapid treatment, mainly with glucocorticoids can save one of the most precious senses-vision. Damage to other organs (heart, aorta, coronary arteries, liver, lungs, kidneys), which are supplied by the arteries affected by ischemic syndrome in the setting of giant cell arthritis, has serious consequences as well. Late diagnosis of giant cell arthritis can have fatal consequences for affected patients. It is a matter of fact that the human population is aging. Therefore, more attention has to be paid not only to diagnosis, clinical course and treatment of rheumatic diseases in elderly, but also to their genetic, immunologic, endocrinologic, chronobiologic mechanisms, and state-of-the-art diagnostic modalities. I am convinced that the interdisciplinary research of the diseases will allow us to diagnose and treat the rheumatic diseases even faster and more effectively in the future.

**Turkey and the Holocaust** Stanford J. Shaw 2016-07-27 The neutrality maintained by Turkey during most of the Second World War enabled it to rescue thousands of Jews from the Holocaust in the Nazi-occupied or collaborating countries of Europe. This book shows how in France, the Turkish consuls in Paris and Marseilles intervened to protect Turkish Jews from application of anti-Jewish laws introduced both by the German occupying authorities and the Vichy government and rescued them from concentration camps, getting them off trains destined for the extermination chambers in the East, and arranging train caravans and other special transportation to take them through Nazi-occupied territory to safety in Turkey. 'an important and unique addition to the vast scholarship available on that tragic era' Rabbi Abraham Cooper

**Language of the Third Reich** Victor Klemperer 2006-07-01 Victor Klemperer was Professor of French Literature at Dresden University. **Quality of Fresh and Processed Foods** Fereidoon Shahidi 2012-12-06 Quality is a composite term encompassing many characteristics of foods. These include color, aroma, texture, general nutrition, shelf-life, stability, and possible presence of undesirable constituents. Obviously deterioration of quality may lead to changes in the attributes that characterize the food in its fresh or freshly processed state. In addition, quality enhancement of products may be carried out using appropriate processing techniques. Interaction of different components present with one another could have a profound effect on sensory quality of products. Meanwhile, presence of extraneous matter such as pesticides and debris may also contribute to a compromise in the quality of foods. In addition, processing often brings about changes in many attributes of food including its nutritional value. Thus, examination of process-induced changes in food products is important. In this book, a cursory account of quality attributes of fresh and processed foods is provided. The book is of interest to food scientists, nutritionists and biochemists in academia, government and industry.

**Women's Property Rights HIV and AIDS & Domestic Violence** Human Sciences Research Council 2008 Revealing how women in many developing countries do not have the right to own or inherit property, this monograph clarifies the role of tenure security in protecting against and mitigating the effects of HIV amongst women and domestic violence. Exploring these linkages in Amajuba, South Africa, and Iganga, Uganda, this qualitative work based on peer-reviewed scientific studies and personal interviews with native women argues that property ownership, while not easily linked to women's ability to prevent HIV infection, can nonetheless mitigate the impact of AIDS and enhance a woman's ability to leave a violent situation. An invaluable resource for policymakers, western donors, nongovernmental organization workers, and academics, this analysis details the current land reform efforts as well as HIV/AIDS and domestic-violence policies in both countries, in Africa as a whole, and beyond.

**My Nest of Silence** Matt Faulkner 2022-10-18 "Evocative prose and illustrations bring to life...[the] heart-wrenching decisions and considerations that Japanese Americans had to face...[and] their endurance, sacrifices, and resilience, even as their loyalty was questioned without cause." —Susan H. Kamei, author of *When Can We Go Back to America?* Told in a brilliant blend of prose and graphic novel, this unforgettable middle grade story about a Japanese American family during World War II is written and illustrated by Asian/Pacific American Award for Literature winner Matt

Faulkner. Manzanar is nothing like home. Yet the relocation center is where Mari and her family have to live, now that the government has decided that Japanese Americans aren't American enough. Determined to prove them wrong, Mari's brother Mak has joined the army and is heading off to war. In protest, Mari has stopped talking for the duration of the war. Or at least until Mak comes home safe. Still, Mari has no trouble expressing herself through her drawings. Mak, too, expresses himself in his letters home, first from training camp and later from the front lines of World War II, where he is fighting with the 442nd Regimental Combat Team. But while his letters are reassuring, reality is not: Mak is facing danger at every turn, from racism within the army to violence on the battlefield. In turns humorous and heartbreaking, Mari and Mak's story will stick with readers long after the last page.

**U.S. Army Signals Intelligence In World War II** James L. Gilbert 2004-06-01 This book is part of the Army historical community's commemoration of the fiftieth anniversary of World War II. American victory in that conflict was brought about not only by the valor of our fighting men and the immensity of our productive capacity, but also by the availability of superb military intelligence. Much of this intelligence came from the ability of our armed forces to intercept and decipher the most secret communications of their adversaries. For many years security considerations prevented any public mention of these successes in the official histories. Now much of the story can be told. To preserve the memory of the Army's role in this intelligence war, the U. S. Army Center of Military History has joined with the History Office, U. S. Army Intelligence and Security Command (INSCOM), to publish this collection of documents on Army signals intelligence in World War II. INSCOM carries on the heritage of the Army's World War II Signal Security Agency, which by breaking the Japanese diplomatic ciphers and military codes helped speed the way of our forces to victory. The book is intended both for an Army audience and for the general public - including those World War II veterans who participated in the signals intelligence war and who for so many years were constrained to keep their contributions secret. The security barriers have now been lifted, and the Army is proud to acknowledge those contributions. Harold W. Nelson Charles F. Scanlon Brigadier General, US Army Major General, US Army Chief of Military History Commanding General, US Army Intelligence and Security Command

*Self-in-Relationship Psychotherapy* Augustine Meier 2022-07-29 In this innovative book, the authors set out their theory of Self-in-Relationship Psychotherapy (SIRP), advocating for the integration of relational, self, and physical intimacy needs in the conceptualization and treatment of psychological problems, placing human needs at the center of treatment. This marks a shift in how psychological and relational problems are understood, currently being perceived in terms of affects, cognitive processes and behaviors. Using numerous illustrations from their own clinical practice, Meier and Boivin contend that this understanding overlooks the pivotal role that needs play in all aspects of peoples' personal lives and relationships. Children, adolescents, and adults do not live primarily from feelings and thoughts, but from basic psychological and relational, needs such as wanting to be in a meaningful relationship, having the autonomy and freedom to make decisions about their lives, experiencing being competent, being regarded as a significant and important person, and experiencing emotional, intimate, and sensual and/or sexual connections. By taking such an approach this book stands out among other books on psychotherapy theories. Authored by two seasoned psychologists who have provided therapeutic services to children, adolescents, and adults for 40 years, this book comprises the foundational theory for practicing Self-in-Relationship Psychotherapy, making it of interest to graduate students, clinicians in training, and practicing psychologists, social workers, and psychotherapists alike.

Absorption and Theatricality Michael Fried 1988-09-15 With this widely acclaimed work, Michael Fried revised the way in which eighteenth-century French painting and criticism are viewed and understood. Analyzing paintings produced between 1753 and 1781 and the comments of a number of critics who wrote about them, especially Dennis Diderot, Fried discovers a new emphasis in the art of the time, based not on subject matter or style but on values and effects.
