Smart Village Infrastructure and Sustainable Rural Communities - Khan, Mohammad Ayoub 2023-06-13

Smart village infrastructure and Industry 5.0 attempt to improve internet connectivity in rural and remote locations by delivering broadband infrastructure. Smart village is a locally led, integrated, and holistic approach to giving all people of rural communities access to digital services, with digital technology development-related services for everyone. Smart Village Infrastructure and Sustainable Rural Communities presents state-of-the-art and innovative ideas on empowering rural communities through the concepts of smart village and Industry 5.0 from experts in the domain of agriculture process improvement, sustainability, irrigation systems, and more. Covering topics such as rural development, machine learning applications, and agriculture analysis, this premier reference source is a dynamic resource for engineers, agronomists, computer scientists, government officials, public health officials, students and educators of higher education, librarians, researchers, and academicians.

Biological Control of Weeds in Australia - Jim Cullen 2012-03-05

Biological control of weeds has been practised for over 100 years and Australia has been a leader in this weed management technique. The classical example of control of prickly pears in Australia by the cactus moth *Cactoblastis cactorum*, which was imported from the Americas, helped to set the future for biocontrol of weeds in many countries. Since then there have been many projects using Classical Biological Control to manage numerous weed species, many of which have been successful. Importantly, there have been no serious negative non-target impacts -

the technique, when practised as it is in Australia, is safe and environmentally friendly. Economic assessments have shown that biocontrol of weeds in Australia has provided exceedingly high benefit-to-cost ratios. This book reviews biological control of weeds in Australia to 2011, covering over 90 weed species and a multitude of biological control agents and potential agents. Each chapter has been written by practising biological control of weeds researchers and provides details of the weed, the history of its biological control, exploration for agents, potential agents studied and agents released and the outcomes of those releases. Many weeds were successfully controlled, some were not, many projects are still underway, some have just begun, however all are reported in detail in this book. Biological Control of Weeds in Australia will provide invaluable information for biological control researchers in Australia and elsewhere. Agents used in Australia could be of immense value to other countries that suffer from the same weeds as Australia. The studies reported here provide direction to future research and provide examples and knowledge for researchers and students.

Integrated Pest Management - D. P. Abrol 2012

Providing a critical evaluation of the management strategies involved in ecologically-based pest management, this book presents a balanced overview of environmentally safe and ecologically sound approaches. Topics covered include biological control with fungi and viruses, conservation of natural predators, use of botanicals and how effective pest management can help promote food security. In the broader context of agriculture, sustainability and environmental protection, the book provides a multidisciplinary and multinational perspective on integrated

pest management useful to researchers in entomology, crop protection, environmental sciences and pest management.

Proceedings of the 11th International Symposium on Insect-Plant Relationships - Jens Kvist Nielsen 2013-06-29

The 11th International Symposium on Insect-Plant Relationships (SIP11), held on August 4-10, 2001, in Helsingør, Denmark, followed the tradition of previous SIP meetings and covered topics of different levels from chemistry, physiology, and ethology to ecology, genetics, and evolution of insect-plant relationships. The present volume includes a representative selection of fully refereed papers as well as a complete list of all the contributions which were presented at the meeting. Reviews of selected topics as well as original experimental data are included. The book

provides valuable information for students and research workers interested in chemical and biological aspects of interactions between individuals and populations of different organisms.

Quantitative Genetics, Genomics and Plant Breeding, 2nd Edition - Manjit S. Kang 2020-04-01

This book presents state-of-the-art, authoritative chapters on contemporary issues in the broad areas of quantitative genetics, genomics and plant breeding. Section 1 (Chapters 2 to 12) emphasizes the application of genomics, and genome and epigenome editing techniques, in plant breeding; bioinformatics; quantitative trait loci mapping; and the latest approaches of examining and exploiting genotype-environment interactions. Section 2 (Chapters 13 to 20) represents the intersection of breeding, genetics and genomics. This section describes the use of cutting-edge molecular breeding and quantitative genetics techniques in wheat, rice, maize, root and tuber crops and pearl millet. Overall, the book focuses on using genomic information to help evaluate traits that can combat biotic/abiotic

stresses, genome-wide association mapping, high-throughput genotyping/phenotyping, biofortification, use of big data, orphan crops, and gene editing techniques. The examples featured are taken from across crop science research and cover a wide geographical base.

Plant Protection - Ravindra Soni 2022-10-24

Phyto-pathogens are one of the dominating components which badly affect crop production. In light of the global food demand, sustainable agricultural plans utilizing agrochemicals became necessary. The role of beneficial microbes in the defense priming of host plants has been well

documented. This book details new aspects of microbial-assisted plant protection and their role in agricultural production, economy, and environmental sustainability.
