Indigenous Fermented Foods for the Tropics - Oluwafemi Ayodeji Adebo 2023-01-21

Indigenous Fermented Foods for the Tropics provides insights on fermented foods of the Tropics, particularly Africa, Asia and South America, highlighting key aspects and potential developments for these food products. Sections provide an overview on the production and composition (nutritional, physicochemical, health beneficial and microbiota) of these indigenous fermented foods in the tropics, innovative techniques for investigating the composition of these fermented food products and improvement of the fermentation process to yield better nutritional constituents, health

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

beneficial components and sensory qualities, and safety aspects to be considered in fermented foods. Other sections provide insights into the packaging and marketing of these food products as well as future prospects of fermented foods in the tropics. This book provides new perspectives and recent information to complement existing texts on indigenous fermented foods serving as a valuable reference text for detailed insights into indigenous fermented foods of the tropics.

Discusses fermented foods from the Africa, Asia, and South America based on the raw materials used Offers innovative techniques for improving these indigenous products and investigating their composition as well as upgrading traditional technologies used in the production of fermented products Covers the role of technology and innovations in the quest for enhancing quality, and safety of fermented foods as demand for fermented food and beverage products is increased

Reptile Biodiversity - Roy W. McDiarmid

2012-01-10

“Authoritative and comprehensive—provides an up-to-date description of the tool box of methods for inventorying and monitoring the diverse spectrum of reptiles. All biodiversity scientists will want to have it during project planning and as study progresses. A must for field biologists, conservation planners, and biodiversity managers.”—Jay M. Savage, San Diego State University “Kudos to the editors and contributors to this book. From the perspective of a non-ecologist such as myself, who only occasionally needs to intensively sample a particular site or habitat, the quality and clarity of this book has been well worth the wait.”—Jack W. Sites, Jr.

Reimagining our futures together -

International Commission on the Futures of Education 2021-11-06

The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

reimagine our futures.

Gaia in Turmoil - Eileen Crist 2010

Essays link Gaian science to such global environmental quandaries as climate change and biodiversity destruction, providing perspectives from science, philosophy, politics, and technology.

Biodiversity Conservation and Phylogenetic Systematics - Roseli Pellens 2016-02-24

This book is about phylogenetic diversity as an approach to reduce biodiversity losses in this period of mass extinction. Chapters in the first section deal with questions such as the way we value phylogenetic diversity among other criteria for biodiversity conservation; the choice of measures; the loss of phylogenetic diversity with extinction; the importance of organisms that are deeply branched in the tree of life, and the role of relict species. The second section is composed by contributions exploring methodological aspects, such as how to deal with abundance, sampling effort, or conflicting

trees in analysis of phylogenetic diversity. The last section is devoted to applications, showing how phylogenetic diversity can be integrated in systematic conservation planning, in EDGE and HEDGE evaluations. This wide coverage makes the book a reference for academics, policy makers and stakeholders dealing with biodiversity conservation.

[The contributions of the MUNA network to CUCS Naples 2022. Proceedings of MUNA sessions: CUCS_Coordinamento Universitario per la Cooperazione allo Sviluppo, Naples 21st-23rd April 2022](#) - Gilberto Sammartino 2022-04-22

[Italiano]: Il Consortium Muna (Mediterranean and Middle East University Network Agreement) è stato fondato nel 2015 e rinnovato nel 2021, quando 30 Università provenienti da tutti i Paesi dell'area mediterranea e alcune altre dal Medio Oriente hanno firmato l'Accordo Quadro. Come scritto nell'Accordo Quadro, anche in questo spazio Muna della Conferenza CUCS,

*Downloaded from
legacy.opendemocracy.net on

proponiamo tre diversi temi principali: MARE NOSTRUM (il nostro Mare, il Mediterraneo), PERSONA (l'Uomo) e ORBIS (la Terra), per riassumere le proposte di Cooperazione tra le Università di Muna Network. La prima sessione è dedicata al campo di ORBIS per condividere la sostenibilità, attraverso la biodiversità come elemento chiave per lo sviluppo del suolo in diversi aspetti come la gestione sostenibile dell'agricoltura, della fauna e della flora, con impatto nel campo della veterinaria. Tuttavia, un focus è anche legato all'inclusione e all'integrazione nelle città sostenibili in questo periodo di pandemia e flussi migratori rispetto al problema dei cambiamenti climatici nell'area mediterranea. La seconda sessione è incentrata su PERSONA, per condividere le esperienze nell'immunodeficienza primaria innata con i contributi di diverse Università di diverse aree del Mediterraneo, esaminando approcci di prevenzione e cura, anche attraverso la proposta di uno studio comparativo. Vengono discusse le

differenze culturali in questo periodo di pandemia e la situazione dei diritti umani nel bacino mediterraneo. L'ultimo punto è MARE NOSTRUM, incentrato sullo sfruttamento delle risorse mediterranee proposto dalla Cooperazione Internazionale tra Muna Partners. Oltre allo sfruttamento, vengono ulteriormente sviluppati i temi del miglioramento della qualità dell'acqua, della salvaguardia del settore ittico e dell'obbligatoria migliore organizzazione delle aree portuali. In conclusione, una tavola rotonda discute le opportunità della Cooperazione, soprattutto per capire quali proposte possono essere seguite nella Cooperazione Universitaria e magari per definire progetti futuri./[English]:

The Muna Consortium (Mediterranean and Middle East University Network Agreement) was founded in 2015 and renewed in 2021, when 30 Universities coming from all Countries of Mediterranean area and some others from Middle East signed the Framework Agreement. As written in the Framework Agreement, also in

this Muna space in the CUCS Conference, we propose three different main themes: MARE NOSTRUM (our Sea, the Mediterranean), PERSONA (Man) and ORBIS (the Earth), to summarize the proposals of Co-operation between Muna Network Universities. The first session is dedicated to the field of ORBIS to share the sustainability, through the biodiversity as a key element for the development of soil in different aspects as agriculture, fauna and flora sustainable management, with impact in the field of veterinary. Nevertheless, a focus is also related to the inclusion and integration in the sustainable cities during this time of pandemia and migration flows with regard to the problem of climate changes in the Mediterranean area. The second session is focused on PERSONA, to share the experiences in the primary immunodeficiency inborn with the contributions of different Universities of different mediterranean area, examining approaches of prevention and treatment, also

through the proposal of a comparative study. Culture differences in this pandemic period and the situation of human rights in the mediterranean basin are discussed. The last item is MARE NOSTRUM, focused on exploitation of the Mediterranean resources proposed by International Cooperations among Muna Partners. Besides the exploitation, the themes of improving the quality of water, the safeguarding of the ittic sector and the mandatory better organization of port areas are further developed. In conclusion, a round table discusses the opportunities of the Cooperation, especially to understand which proposals can be followed in the Universities Cooperation and maybe to establish future projects.

Nature of Nature - Enric Sala 2020-09-17

In this inspiring manifesto, an internationally renowned oceanographer makes the provocative case for why protecting nature makes economic sense. Enric Sala wants to change the world-- and in this groundbreaking book, he shows us

Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest

how. Once we appreciate how nature works, he asserts, we will understand why its preservation is economically practical and essential to our survival. In this highly readable narrative, Sala, director of National Geographic's Pristine Seas project, tells the story of his scientific awakening, the colorful mentors whose work inspired him, and his transition from academic to activism--because, as he put it, he was tired of writing the obituary of the ocean. His revelations are surprising, and sometimes counterintuitive: Lots of sharks are actually the best indicator of a healthy ocean ecosystem, and crop diversity, rather than intensive monoculture farming, is the key to planetary abundance. For decades, Sala has spearheaded ocean protection, convincing world leaders to protect areas amounting to five times the size of Texas--and he is still passionately pushing for more. Using fascinating examples from his own expeditions and groundbreaking findings from other scientists, Sala builds the case for the economic

wisdom of making room for nature, even as the population builds to eight million and grows more urbanized by the decade. Both relatable and inspiring, this powerful book will change the way you think about the world--and the future. *Plant Biodiversity Science in the Era of Artificial Intelligence* - Pierre Bonnet 2022-11-15

Human-Computer Interaction. Theoretical Approaches and Design Methods - Masaaki Kurosu 2022-06-16

The three-volume set LNCS 13302, 13303 and 13304 constitutes the refereed proceedings of the Human Computer Interaction thematic area of the 24th International Conference on Human-Computer Interaction, HCII 2022, which took place virtually in June-July 2022. The 132 papers included in this HCI 2022 proceedings were organized in topical sections as follows: Part I: Theoretical and Multidisciplinary Approaches in HCI; Design and Evaluation Methods, Techniques and Tools; Emotions and Design;

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

Children-Computer Interaction, Part II: Novel Interaction Devices, Methods and Techniques; Text, Speech and Image Processing in HCI; Emotion and Physiological Reactions Recognition; and Human-Robot Interaction, Part III: Design and User Experience Case Studies, Persuasive Design and Behavioral Change; and Interacting with Chatbots and Virtual Agents. *Remote Sensing of Plant Biodiversity* - Jeannine Cavender-Bares 2020-09-18

This Open Access volume aims to methodologically improve our understanding of biodiversity by linking disciplines that incorporate remote sensing, and uniting data and perspectives in the fields of biology, landscape ecology, and geography. The book provides a framework for how biodiversity can be detected and evaluated—focusing particularly on plants—using proximal and remotely sensed hyperspectral data and other tools such as LiDAR. The volume, whose chapters bring together a large cross-section of the biodiversity

community engaged in these methods, attempts to establish a common language across disciplines for understanding and implementing remote sensing of biodiversity across scales. The first part of the book offers a potential basis for remote detection of biodiversity. An overview of the nature of biodiversity is described, along with ways for determining traits of plant biodiversity through spectral analyses across spatial scales and linking spectral data to the tree of life. The second part details what can be detected spectrally and remotely. Specific instrumentation and technologies are described, as well as the technical challenges of detection and data synthesis, collection and processing. The third part discusses spatial resolution and integration across scales and ends with a vision for developing a global biodiversity monitoring system. Topics include spectral and functional variation across habitats and biomes, biodiversity variables for global scale assessment, and the prospects and pitfalls in

remote sensing of biodiversity at the global scale.

Managing Plant Genetic Diversity - V. Ramanatha Rao 2001-12-13

This book contains edited and revised papers from a conference on 'Science and Technology for Managing Plant Genetic Diversity in the 21st Century' held in Malaysia in June 2000, organised by the International Plant Genetic Resources Institute (IPGRI). It includes keynote papers and some 40 additional ones, covering ten themes. The major scientific challenges to developing a global vision for the next century are identified and key research objectives are also discussed.

The Species-Area Relationship - Thomas J. Matthews 2021-03-18

Provides a comprehensive synthesis of a fundamental phenomenon, the species-area relationship, addressing theory, evidence and application.

The Green Book - Great Britain. Treasury 2003

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Seascape Ecology - Simon J. Pittman 2017-12-18

Seascape Ecology provides a comprehensive look at the state-of-the-science in the application of landscape ecology to the seas and provides guidance for future research priorities. The first book devoted exclusively to this rapidly emerging and increasingly important discipline, it is comprised of contributions from researchers at the forefront of seascape ecology working around the world. It presents the principles,

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

concepts, methodology, and techniques informing seascape ecology and reports on the latest developments in the application of the approach to marine ecology and management. A growing number of marine scientists, geographers, and marine managers are asking questions about the marine environment that are best addressed with a landscape ecology perspective. Seascape Ecology represents the first serious effort to fill the gap in the literature on the subject. Key topics and features of interest include: The origins and history of seascape ecology and various approaches to spatial patterning in the sea The links between seascape patterns and ecological processes, with special attention paid to the roles played by seagrasses and salt marshes and animal movements through seascapes Human influences on seascape ecology—includes models for assessing human-seascape interactions A special epilogue in which three eminent scientists who have been instrumental in

shaping the course of landscape ecology offer their insights and perspectives Seascape Ecology is a must-read for researchers and professionals in an array of disciplines, including marine biology, environmental science, geosciences, marine and coastal management, and environmental protection. It is also an excellent supplementary text for university courses in those fields.

[Towards Interoperable Research Infrastructures for Environmental and Earth Sciences](#) - Zhiming Zhao 2020-07-24

This open access book summarises the latest developments on data management in the EU H2020 ENVRIplus project, which brought together more than 20 environmental and Earth science research infrastructures into a single community. It provides readers with a systematic overview of the common challenges faced by research infrastructures and how a 'reference model guided' engineering approach can be used to achieve greater interoperability

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

among such infrastructures in the environmental and earth sciences. The 20 contributions in this book are structured in 5 parts on the design, development, deployment, operation and use of research infrastructures. Part one provides an overview of the state of the art of research infrastructure and relevant e-Infrastructure technologies, part two discusses the reference model guided engineering approach, the third part presents the software and tools developed for common data management challenges, the fourth part demonstrates the software via several use cases, and the last part discusses the sustainability and future directions.

Biology with Mastering Biology Virtual Lab Full Suite - Jane B. Reece 2014

This package includes a physical copy of Biology: A Global Approach, 10/e by Campbell as well as access to the eText and MasteringBiology. Your instructor will need to provide you with a course ID in order for you to access the eText and MasteringBiology. This is a Pearson Global

Edition. The Pearson Editorial team worked closely with educators around the world to include content especially relevant to students outside of the United States. The Tenth Edition of the best-selling text Campbell BIOLOGY helps launch students to success in biology through its clear and engaging narrative, superior pedagogy, and innovative use of art and photos to promote student learning. The Tenth Edition helps students develop a deeper understanding of biology by making connections visually across chapters and building the scientific skills needed for success in upper-level courses. New Make Connections Figures pull together content from different chapters visually, helping students see "big picture" relationships. New Scientific Skills Exercises in every chapter use real data to build key skills needed for biology, including data analysis, graphing, experimental design, and math skills. New examples show students how our ability to sequence DNA and proteins rapidly and inexpensively is transforming every subfield

*Downloaded from
legacy.opendemocracy.net on
2023-04-18 by guest*

of biology. Mastering brings learning full circle and is the most effective and widely used online homework, tutorial, and assessment system for the sciences. Over three million science students are currently using Mastering for the following features: Before class, reading quizzes, pre-lecture quizzes, and formative assessments test students' knowledge of the material and ensure

they come to class prepared. During class, Learning Catalytics and existing Mastering media like simulations, Flix, Videos, etc, keep your students engaged and bring tough topics to life. After class, "traditional" homework, quizzes, and testing automatically assess your students' comprehension of the material and provide opportunities for remediation.
