**You Look Like a Thing and I Love You** Janelle Shane 2019-11-05 As heard on NPR's "Science Friday," discover the book recommended by Malcolm Gladwell, Susan Cain, Daniel Pink, and Adam Grant: an "accessible, informative, and hilarious" introduction to the weird and wonderful world of artificial intelligence (Ryan North). "You look like a thing and I love you" is one of the best pickup lines ever . . . according to an artificial intelligence trained by scientist Janelle Shane, creator of the popular blog AI Weirdness. She creates silly AIs that learn how to name paint colors, create the best recipes, and even flirt (badly) with humans—all to understand the technology that governs so much of our daily lives. We rely on AI every day for recommendations, for translations, and to put cat ears on our selfie videos. We also trust AI with matters of life and death, on the road and in our hospitals. But how smart is AI really... and how does it solve problems, understand humans, and even drive self-driving cars? Shane delivers the answers to every AI question you've ever asked, and some you definitely haven't. Like, how can a computer design the perfect sandwich? What does robot-generated Harry Potter fan-fiction look like? And is the world's best Halloween costume really "Vampire Hog Bride"? In this smart, often hilarious introduction to the most interesting science of our time, Shane shows how these programs learn, fail, and adapt—and how they reflect the best and worst of humanity. You Look Like a Thing and I Love You is the perfect book for anyone curious about what the robots in our lives are thinking. "I can't think of a better way to learn about artificial intelligence, and I've never had so much fun along the way." —Adam Grant, New York Times bestselling author of Originals

**Nordau to NASDAQ** Miryam Yahil 2012 So how much are we worth, in your opinion? I asked. Just in case someone, maybe you, wants to buy us tomorrow morning, how much are we worth? Rick Gardner, obviously delighting in the wine's clarity as he held it up against the light, replied, In my estimation, New Dimension is worth six hundred, maybe six hundred and twenty million dollars. Then he laughed, and emptied his glass. This exchange, which took place in a meeting in Germany, marks a turning point in the history of The New Dimension Software, one of the most successful software companies in Israel in 1999 which was subsequently sold to Texas-based BMC Software for 675 million dollars. Nordau to NASDAQ is the moving story of Roni Einav, a pioneer entrepreneur in Israeli high-tech, whose journey to success began in the modest environments of an apartment on Tel-Aviv's Nordau Boulevard. Encouraged to believe that free enterprise, determination and perseverance are the keys to real achievement, he started to make his way. The book exposes the power struggles, moves and bold decisions that led to the extraordinary success of The New Dimension from its earliest beginnings. Mr. Einav describes his considerable experience and raises the curtain on trade secrets: How do you recognize a good idea? How do you cope with bureaucracy or inner dissent? How do you identify or create a significant share for your software products in the global market? Where can you find financing and what can you do if you are not successful in your search? The book offers an insight into how to balance family and professional life, and still achieve significant success. Mr. Einav, whose personal journey coincides with that of the State of Israel, has served his country in a weapons development unit, and participated in major new urban planning and construction in Iran of the Shah. Nordau to NASDAQ highlights the amazing talents, vision, leadership and dedication of one man, who played an integral role in the development of the Israeli high-tech industry, helping transform this small nation into a land of start-ups, with the largest number of companies traded on Wall Street after the U.S. and Canada.

When Tate Collins meets airline pilot Miles Archer, she doesn't think it's love at first sight. They wouldn't even go so far as to consider themselves friends. The only thing Tate and Miles have in common is an undeniable mutual attraction. Once their desires are out in the open, they realize they have the perfect set-up. He doesn't want love, she doesn't have time for love, so that just leaves the sex. Their arrangement could be surprisingly seamless, as long as Tate can stick to the only two rules Miles has for her. Never ask about the past. Don't expect a future. They think they can handle it, but realize almost immediately they can't handle it at all. Hearts get infiltrated. Promises get broken. Rules get shattered. Love gets ugly.

**Flirting** David Copperson 2020-02-16 Flirting is an art. Some people are good at it. Some people are awful. And some only do it when they want to. Some may have been big flirts before their marriage, only to become a constant complainer once the ring was on their finger. How do you make others constantly fall in love with you? That's the question. In this book, you will be shown several flirting tips, techniques, and methods. Pickup lines are a part of it, but they're definitely not everything. People often overvalue the importance of a pickup line. Building trust takes time. Therefore, in one of the chapters, we will focus on building that trust. We will also go over possible questions, compliments, and other important things like a flirting style, that will determine the outcome of your dates. Are you ready to learn more?
