**Investing in the Health and Well-Being of Young Adults** - National Research Council 2015-01-27

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

**Rooting Out Relationship Killers** - Stephen Matthew 2013-02-12

"Nothing matters like relationships. In this practical book Stephen shares down-to-earth wisdom to help us protect, strengthen and restore them." - ROB PARSONS, Founder and Chairman, Care for the Family PASTOR GARY CLARKE, Lead Pastor, Hillsong Church London: "A great read for everyone, regardless your age or stage of life, as we all want meaningful, thriving relationships." Healthy relationships enrich our lives like nothing else We all want them and can have them if we embrace the principles explored by Stephen Matthew in this practical book. He unpacks the idea that nurturing and maintaining a healthy relationship is much like gardening. The soil of the relationship must be cultivated by rooting out any "weeds" that may threaten to stifle or kill the relationship in question. And it must also be nourished with appropriate relationship "feeds" to ensure fruitfulness and continued health. This life-affirming, positive book aims to strengthen and enrich all our relationships, keeping them healthy and strong. It is both positive - in that it focuses on relationship building - and it is preventative, because if we take the advice offered here, we can avoid the pain of major relationship dysfunction. Stephen's book will make you a better friend, husband, wife, mother, father, brother, sister, team member, business partner, leader, manager or employee. As a result, your life will enrich those you relate to and do them good too. Everyone wins when we build relationships God's way. About the author: STEPHEN MATTHEW is a gifted Bible teacher and committed church builder. He is Senior Associate Pastor of LIFE Church Bradford, Principal of the LIFE Church Leadership Academy and the author of BUILDING CHURCH.

**Financial Intimacy** - Jacqueline M. Timmons 2009-10

Addressing the common reasons people don't discuss personal finances in detail and in-depth with their partner, this unique approach to managing money goes beyond the superficial to the substantial and significant conversations couples should have about money. In part one, personal profiles of 19 women reflect the financial and emotional challenges every woman, to some degree, eventually faces when the relationships she has with herself, her money, and her mate converge. The second section reviews key individual thoughts, behavior, and expectations concerning money and examines how these affect the expectations of a significant other. The love-and-money dance is the focus of the third part, providing a framework for asking questions and exchanging information that allow any couple to know and understand each other's personal financial history. Assessing and improving the emotional impact of managing money in a romantic relationship, this guidebook elevates the conversation about money and provides women with the tools to take the lead.

**Intuitive Eating** - William Robertson 2020-03-17

Diet hopping has become something that is normal in our culture today. We see new diets popping up every few months promising us the world but never delivering. The problem is that all of these diets are focused on changing the outside first. The truth is that there can be no external change if the inside has not undergone some shifting first. The aim of intuitive eating is to wipe away the idea of diets and being skinny and introduce a new way of thinking and living. Instead of promising a quick fix so that you can drop a few pounds in a short amount of time, intuitive eating allows you to change your mindset to one that is at peace with yourself and food, aiming to be healthy and have a healthy mental state rather than focusing on what your body looks like. This is a much healthier approach compared to what diet culture teaches us. This book will teach you how to look at yourself in a different light and help you to train your mind to enjoy food and really tune in to your body's needs instead of relying on outside influences to tell you how your body should look and feel. Learn to take control of your life and partner with your body to create a better and healthier life instead of being at constant war with your body and food. Once you have peace with food and start enjoying it, you will see amazing benefits in all other areas of your life. Let's take it back to basics; it all starts with getting to know your body and your mind.

*Love's Mystery Solved* - Joseph A. Smith 2006-08

Literally all healthy relationships will benefit by understanding and appreciating this historically first true clarification of love eliminating confusion over what it is and how to find and build upon it. This useful descriptive definition of love is invaluable for those interested in increasing the success of any relationship. One of a host of interesting insights is that genuine love is more than emotion. Janet Ackerman-Smith BSN, MA, MS During a fifty-year ministry this is one of my very few "absolute endorsements" because Dr. Joseph Smith has put together a manuscript of such thoughtful and practical concern. Most of the books on the counters of our local bookstores are not of the same caliber that he offers. Reading this manuscript was, for me, an adventure of discovery. I find his book not only fulfilling but exciting. The organization quickly brings the reader to an appreciation that "love defined" can really have an impact on not only the way we understand and then react with others, but how we may do this responsibly. This is the secret genius of this book Reverend William J. Murphey

**Unf\*ck Your Life and Relationships** - Anita Astley 2022-12-06

Unf\*ck Your Life and Relationships combines Anita's personal story and the culmination of twenty-five years of clinical experience with individuals, couples, and families. She demonstrates that building healthy relationships starts from the inside out and calls for a "back to basics" of love and life that have become lost in a culture driven by electronic communication and social media attachment. Experiencing conflict in relationships is an unavoidable fact of life. When our relationships are messed up, our lives feel messed up. Likewise, our hearts and minds hurt—the two are intricately linked. Drawing on over twenty-five years of clinical experience with individuals, couples, and families, psychotherapist Anita Astley will walk you through practical steps to unf\*ck yourself from the inside out in order to establish healthy relationships. Her approach takes you back to the basics of love and life that have become lost in a culture consumed by electronic communication and social media attachment. Anita will help guide you through your journey of transformation by identifying various

psychological dynamics that serve to do more harm than good to you and your relationships. In addition, she will provide tools to help you hone your communication skills through active listening and effective speaking as a means of working through conflict to arrive at solutions. These practices have helped countless patients and have proven to be effective for Anita personally. In this book, she shares her childhood journey from India to Germany (and then to Canada), reuniting with her father. However, his expectation for Anita to follow a culturally traditional path and consent to an arranged marriage destroyed her confidence and self-worth and left deep emotional scars. As she pursued higher education and individual psychotherapy, Anita found her voice through mentors who enabled her to break free, find her path to healing and inner strength, and eventually unlock the skills needed to help others. In these pages, Anita Astley now acts as your mentor and guide so you can do the same and learn to maintain inner emotional balance and form healthy, fulfilling relationships with those you love.

**"Doing things together"** - Therése Bielsten 2020-03-13

Background: Most people with dementia live in their own homes, often together with their partners, who become informal caregivers. Relationship quality and sense of couplehood can be threatened as a result of the transition from a mutually interdependent relationship to a caregiver-care-receiver relationship. This, in turn, may lead to many negative consequences for both partners. Support provided for couples is often divided into different types for the person with dementia and for the partner without dementia and lacks couple-based support that targets the relationship, resources and the couple's everyday life together. Aim: The overall aim of this thesis is to explore couple-centred interventions in dementia and to develop and test a salutogenic, resource-oriented and couple-based intervention among couples in which one partner has dementia living at home. Methods and findings: This thesis comprises three parts: The first part Exploring involves two linked reviews, one narrative review (study I A) and one scoping review (study I B) that aim to identify and describe what previous couple-centred interventions comprised and why they were conducted. The results of the reviews revealed a knowledge gap in and a need for easily accessible support that targets couple relationships, resources and everyday life. The second part Developing (study II) refers to the development of an easily accessible resource-oriented couple-management intervention. The first step was to identify priority topics for such an intervention through a co-researcher process with couples living with dementia. This included a comprehensive literature review, interviews with couples in which one partner has dementia, and consultation meetings with expert groups of people with dementia and partners in both Sweden and the UK. The co-researcher process and the expert meetings informed four main themes with corresponding sub-themes that couples with dementia considered as important to their wellbeing in their everyday lives: (1) Home and Neighbourhood, (2) Meaningful Activities and Relationships, (3) Approach and Empowerment, and (4) Couplehood. The themes were further developed and integrated into the multimedia application DemPower, which was developed for the delivery of the intervention. The third part Testing and Evaluating describes a feasibility study (study III) in which the DemPower application was tested for feasibility and acceptability among couples in Sweden and the UK. The results of the feasibility study indicated that the DemPower intervention was feasible and acceptable among couples in which one partner has dementia living at home. The testing and evaluating part also comprise a qualitative study (study IV) that explores the experiences of engaging with DemPower together as a couple living with dementia in Sweden. The findings resulted in the three themes: (1) Growth of the relationship, (2) We are not alone, and (3) Positive approach, which the couples appreciated and associated with the resource-oriented and salutogenic approach of DemPower. The overall findings of the thesis are presented in a concluding synthesis at the end of the thesis. The concluding synthesis, focused on "Meaningfulness", "Empowering health promotion", "Normalization" and "Transitions and couplehood", represents the core findings of this thesis. What this thesis adds: This thesis contributes to research, healthcare and the public by highlighting the need for a salutogenic approach toward couples living with dementia. The DemPower application, with its focus on couples' relationships, resource-orientation and everyday life, has proven feasibility and acceptability and has meaningfully addressed a gap in the literature and in practice. As researchers, healthcare professionals and the public, we need to support couples where one partner has dementia to continue to live as normal life as possible. This can best be achieved by focusing on what couples can do, by inclusion and by valuing them as the experts

within dementia research and of their life experiences. Bakgrund: Majoriteten av personer med demens bor i sitt eget hem och ofta tillsammans med sin partner som blir en informell vårdgivare. Relationens kvalitet och känsla av parskap hotas ofta till följd av övergången från en ömsesidig beroenderelation till en vårdgivare-vårdtagar-relation allt eftersom demenssjukdomen fortskrider. Detta kan innebära många negativa konsekvenser. Stöd för par där ena partnern har demens delas ofta upp i olika former för personen med demens och för partnern utan demens, vilket innebär att det saknas parbaserat resursorienterat stöd med inriktning på att främja parrelationen och parets vardagliga liv. Syfte: Syftet med denna avhandling är att utforska parcentrerade interventioner inom demens och att utveckla och testa ett parbaserat, salutogent och resursorienterat stöd för par där ena partnern har en demenssjukdom och som bor tillsammans i det egna hemmet. Metoder och fynd: Denna avhandling består av tre delar. Den första delen att utforska inkluderar två länkade litteraturoversikter, en narrativ översikt och en kartläggande översikt (studie I) som beskriver tidigare interventioner för par som lever med demens och varför de genomförts. Resultaten av översikterna visade ett kunskapsgap i, och ett behov av lättillgängligt stöd som riktar sig till parförhållanden, parens resurser och att främja det vardagliga livet. Den andra delen, att skapa (studie II) involverar utvecklingen av ett lättillgängligt resursorienterat och parbaserat stöd. Det första steget var att identifiera prioriterade ämnen för en sådan intervention tillsammans med par som lever med demens, genom en så kallad medforskarprocess. Detta inkluderade en omfattande litteraturgenomgång, intervjuer med par där ena partnern har demens, och konsultationsmöten med expertgrupper bestående av personer med demens och partners i Sverige och i Storbritannien. Medforskarprocessen och expertmötena resulterade i fyra huvudteman med motsvarande underteman vilka par med demens ansåg vara viktiga för deras relation och för välbefinnande i vardagen: (1) Hem och grannskap, (2) Meningsfulla aktiviteter och relationer, (3) Förhållningssätt och empowerment och (4) Parskap. Dessa teman vidareutvecklades och integrerades i multimedia-applikationen DemPower, som utvecklades i syfte att erbjuda interventionen till par som lever med demens. Den tredje delen att testa och att utvärdera beskriver genomförbarhetsstudien (studie III) där applikationen DemPower testades med avseende på genomförbarhet och acceptabilitet

hos par där en partner har demens i Sverige och i Storbritannien. Resultaten av studien visade att DemPower-interventionen var genomförbar och acceptabel bland par där ena partnern har demens. Denna delen av avhandlingen inkluderar även en kvalitativ studie (studie IV) som undersökte parens erfarenheter av att testa DemPower tillsammans som ett par. De samlade upplevelserna resulterade i tre teman: (1) Utveckling av parrelationen, (2) Vi är inte ensamma och (3) Positivt förhållningssätt. De övergripande resultaten från avhandlingen presenteras även i en konkluderande syntes i slutet av avhandlingen. Den konkluderande syntesen med fokus på Meningsfullhet, Empowerment, Normalisering och Parskap representerar kärnan i denna avhandling. Avhandlingens slutsatser och kunskapsbidrag: DemPower-applikationen med fokus på parförhållanden, hälsofrämjande resurser och vardagen har bidragit med ett stöd som vilar på en genuin parbaserad grund tillämpad i det vardagliga livet för par som lever med demens. Denna avhandling bidrar även med kunskap till forskning, vård och allmänheten genom att lyfta fram ett salutogent förhållningssätt till par som lever med demens. Som forskare, vårdpersonal och allmänhet bör vi stödja par där ena partnern har demens för att de ska kunna fortsätta leva ett så normalt liv som möjligt. Detta kan bäst uppnås genom att fokusera på parens resurser, genom inkludering och genom att värdera dem som experter inom demensforskning och i deras livserfarenheter.

Advancing Relationship-Based Cultures - Mary Koloroutis 2017-05-19

Advancing Relationship-Based Cultures explains and expands a fundamental and often overlooked truth in health care: It is the confluence of relational and clinical competence that advances relationship-based healing cultures. A relationship-based culture is one in which a critical mass of people provides care and service with relational competence. In these cultures, the skills that foster relational competence are actively developed, nurtured, practiced, reinforced, and evaluated. While countless thought leaders have championed the importance of improving relationships, this book provides a practical how-to for the creation and nurturance of healthy relationships in health care. Readers of this book will understand that a strategy that includes improving all relationships will improve all other measures as well. When you empower people, giving them the tools to take excellent care of themselves, one another, and the patients and families in their care, organizations thrive.
