The European Union and the Evolving Architectures of International Economic Agreements - Ottavio Quirico 2023-07-25

The European Union ('EU') is promoting a suite of innovations in international economic regulation—among them, reforms for secure and sustainable investment, a comprehensive approach to the mutual recognition of professional qualifications, a viable carbon border adjustment mechanism, heightened intellectual property rights protection, the arm's length principle in taxation, and an increased commitment to non-economic values. Through a critical analysis of key regulations and policies, this volume explores the evolving architectures of international economic agreements in light of EU practice. A comprehensive analysis indicates that novelties are rooted in geoeconomic

considerations, through which a fundamental shift is underway towards the adoption of comprehensive bilateral trade agreements. Whilst innovation has the potential to significantly harmonise cross-border regulatory frameworks, it can also trigger significant fractures, particularly when applied restrictively and asymmetrically. Arguably, the 'Brussels effect' will to a certain extent foster a progressive development of international economic regulation, while in some respects being constrained by the status quo of the international economic regime. This volume is part of the Jean Monnet project Third Country Engagement with EU Trade Policy led by the ANU Centre for European Studies at the Australian National University, and supported by the European Commission under the Erasmus+

actions. The project seeks to explore and improve understanding of the EU's evolving trade policy and its implications for third countries, including Australia and countries in the Asia-Pacific region.

Mapping Transatlantic Security Relations - Mark B. Salter 2010-04-15

This book examines how legal, political, and rights discourses, security policies and practices migrate and translate across the North Atlantic. The complex relationship between liberty and security has been fundamentally recast and contested in liberal democracies since the start of the 'global war on terror'. In addition to recognizing new agencies, political pressures, and new sensitivities to difference, it is important that not to over-state the novelty of the post-9/11 era: the war on terror simply made possible the intensification, expansion, or strengthening of policies already in existence, or simply enabled the shutting down of debate. Working from a common theoretical frame, if

different disciplines, these chapters present policy-oriented analyses of the actual practices of security, policing, and law in the European Union and Canada. They focus on questions of risk and exception, state sovereignty and governance, liberty and rights, law and transparency, policing and security. In particular, the essays are concerned with charting how policies, practices, and ideas migrate between Canada, the EU and its member states. By taking 'field' approach to the study of security practices, the volume is not constrained by national case study or the solipsistic debates within subfields and bridges legal, political, and sociological analysis. It will be of much interest to students of critical security studies, sociology, law, global governance and IR in general. Mark B. Salter is Associate Professor at the School of Political Studies, University of Ottawa.

The China Challenge - Huhua Cao 2011-05-28

With the exception of Canada's relationship with

*Downloaded from
legacy.opendemocracy.net on
2021-12-28 by guest*

the United States, Canada's relationship with China will likely be its most significant foreign connection in the twenty-first century. As China's role in world politics becomes more central, understanding China becomes essential for Canadian policymakers and policy analysts in a variety of areas. Responding to this need, The China Challenge brings together perspectives from both Chinese and Canadian experts on the evolving Sino-Canadian relationship. It traces the history and looks into the future of Canada-China bilateral relations. It also examines how China has affected a number of Canadian foreign and domestic policy issues, including education, economics, immigration, labour and language. Recently, Canada-China relations have suffered from inadequate policymaking and misunderstandings on the part of both governments. Establishing a good dialogue with China must be a Canadian priority in order to build and maintain mutually beneficial relations with this emerging power, which will last into

the future.

Le Canada et l'Europe - 1989

Canada's Modern-Day Aboriginal Peoples -

Dr. David Bercuson

Long before the first European settlers crossed the Atlantic, Canada's original inhabitants had a culture based on respect for all forms of life. These vibrant and practical values enriched Canada's formation. In fact, the early settlers from Europe might not even have survived if not for the help and support of Canada's Aboriginal peoples.

Between Actor and Presence - George Andrew MacLean 2001

This collection of essays situates Canadian interests within the larger context of political change taking place in Europe and provides a context for the changing nature of this historical relationship and the relative influence of existing institutions. Published in English.

Parliamentary Cooperation and Diplomacy

in EU External Relations - Kolja Raube 2019

In today's increasingly complex and interdependent world, the role of parliaments in external affairs remains a relatively under explored topic of research. The multiple patterns of global governance are mostly dominated by the executive branches of government, with parliaments relegated to the sidelines. This insightful book aims to challenge this dominant perspective and demonstrate the increased networking of parliaments both within the EU and with external actors outside the EU. It not only sheds light on EU parliamentary cooperation and networking, but also reveals the growing scope and role of parliamentary scrutiny, control and conflict mediation.

The Global Evolution of Industrial Relations - Bruce E. Kaufman 2004

This publication examines the history and practice of industrial relations around the world to date, as well as considering potential future prospects and developments. Issues discussed

include: early industrial relations in Europe and North America; key aspects that have shaped industrial relations during the post World War II period, including the role and impact of the International Labour Organization and the International Industrial Relations Association (IIRA); and modern industrial relations in the United States, Australasia, Canada, the UK, continental Europe, Africa, Asia and Latin America.

States which prevailed over the early postwar period. It examines how FTA rules and dispute settlement procedures create an effective basis for managing bilateral economic relationships in the context of more decentralized policy processes. It also explores the potential impact on the bilateral trading regime of the changing nature of international competition, the adjustments taking place in the structure of the Canadian and American economies, and the challenges posed by continuing technological change.

The New Canadian Political Economy - Wallace Clement 1989

Studies in political economy are now at a crossroads. The revival of political economy as an important area of research in Canada began in the early 1970s with the publication of Kari Levitt's *Silent Surrender*. In 1976 it was launched in earnest by the fi

The EU and the Eurozone Crisis - Finn Laursen 2016-02-17

The global financial crisis, which started in the United States in 2007, spread to Europe in 2009. It especially hit Portugal, Ireland, Italy, Greece, and Spain, countries which have introduced the single currency, the euro. These eurozone countries no longer have monetary policy autonomy, so they do not have the option of devaluation to increase competitiveness. The crisis has shown that the Economic and Monetary Union (EMU) created in 1993, and which led to the single currency in 1999, is faulty. Its built-in asymmetry, with centralised monetary policy and decentralised fiscal policy, should be expected to create problems. Part of the response to the crisis so far has been incremental moves towards fiscal and banking union, which will mean a deepening of European integration at a time when many observers believed that a certain equilibrium had been reached after the entry into force of the Lisbon Treaty in 2009. This book focuses on these developments as well as analysing other

economic policies that affect the general economic welfare of the EU, including agriculture, trade and immigration policies. The book puts the eurozone crisis into the wider context of deepening and widening.

The Evolving Relationship between China, the EU and the USA - Jing Men 2019-11-27

This book closely scrutinizes the individual and collective roles played by China, the EU and the USA in contemporary world politics. Examining the three actors' respective strategic and policy positions on and behaviour towards the flux of the contemporary global order, the analysis focuses on three major issues and challenges: foreign and security policy; economics and trade; and climate change and energy.

Discussing their relative power, as well as their interests, beliefs and positions on a set of decisive issues, this book explores bilateral relations between the three powers and the ways in which they may interact trilaterally in a broader global context to shape international

politics. Written by a stellar line-up of experts from the fields of politics and international relations, *The Evolving Relationship between China, the EU and the USA* will be of huge interest to students and scholars from within these fields, as well as policy-makers and practitioners more generally.

The Evolving Role of Sub-National Actors in International Economic Relations - Ohiocheoya Omiunu 2017

Using the Canada-European Union Comprehensive Economic and Trade Agreement (CETA) as a case study, this paper identifies and analyses evidence of shifting forms of cooperation observable in the design and negotiation of new styled (mega-regional) Preferential Trade Agreements (PTAs) springing up in the world trade and investment system. The analysis focuses on the different strategies adopted by Canada and the EU to engage their sub-national governments and civil societies in the CETA negotiation/ratification process, and

the possible implications for future mega-regional trade agreements.

Canada Et L'Europe: Une Relation en Constante Evolution - 1988

Playing in the "bush-league" - Canadian Institute of Strategic Studies 2001

In April of each year, the Canadian Institute of Strategic Studies (CISS) conducts a seminar on a topic of contemporary interest to the Canadian public. The Spring 2001 seminar dealt with the issue of how the election of George W. Bush could herald a new phase in Canada's evolving relationship with the United States. Under a cloud of several trade disputes, heightened discourse surrounding the proposed US ballistic missile defence plan, and on the eve of the Summit of the Americas in Quebec City, the CISS brought together a distinguished panel of speakers to assess what the policies of the new American administration could mean for Canada and Canadians. Participants asked themselves:

What place will Canada occupy in an increasingly continentalist environment?

Britain and Canada - Peter Lyon 2013-11-26
First Published in 1976. This volume, the fourth in the series Studies in Commonwealth Politics and History, looks at one of the oldest bilateral relationships between two Commonwealth countries. It is a group of essays in the general field of international relations and a fitting contribution to Studies in Commonwealth History and Politics. By bringing together studies of individual states, particular institutions, cross-national comparisons or relations between states, the series aims to make its contribution to our understanding of the contemporary world.

Trans-Atlantic Partners - Evan H. Potter
1999-11-19

The study concentrates on changes in Canada's approach to European integration after the watershed of 1989, examining the 1990 EC-Canada Transatlantic Declaration and the

Canada And Europe An Evolving Relationship

emergence of a Single European Market in 1993. Finally, it outlines the choices available to Canadian policy makers in the late 1990s as they sought to widen relations with the EU by proposing a trans-Atlantic free trade zone. This book details important stages in the evolution of Canada-EU economic, political, and security relations, a bilateral relationship that is destined

to grow closer in the years ahead.
