Family Violence from a Communication Perspective

- Dudley D. Cahn 1996-04-16
"Although an anecdotal association between communication and family violence was noted early in the family violence literature, a communication approach to family violence has been underrepresented in the literature. This book is a welcome contribution to the literature because it demonstrates that the connection between communication and family violence is much more complex than a skills deficit of one or more members of a violent relationship." --Gail

Whitchurch, Department of Communication Studies, Indiana University Adding an innovative perspective to traditional psychological and sociological approaches, Family Violence from a Communication Perspective lays out a new theoretical framework for understanding and resolving abusive family interactions. This exceptional volume features contributions from a variety of disciplines that examine the interactional processes at the core of domestic abuse, aggression, and violence. The contributors explore the development of violence in the family, beginning with courtship violence, proceeding through marital violence, and perpetuated through parent-child violence. Providing keen insight, the chapters examine

the commonalities and differences inherent in emotional, psychological, verbal, and sexual abuse and how they all stem from basic communication problems. An essential resource for students and scholars in communication, family studies, relationship studies, psychology, sociology, and women's studies, *Family Violence from a Communication Perspective* also offers a refreshing viewpoint for professionals in the human services.

[Interpersonal Communication](#) - Teri Kwal Gamble 2013-01-04
Written in a conversational style for students living in today's world of ever-evolving media and new technology, this hands-on skills guide by Teri Kwal Gamble and Michael W. Gamble puts students at the center of interpersonal communication. To help them become better, more successful communicators, married author team Teri Kwal Gamble and Michael Gamble shed new light on the dynamics of students' everyday interactions and relationships, and give

students the tools they need to develop and cultivate effective communication skills. Using an applied, case-study approach that draws from popular culture and students' own experiences, Gamble and Gamble go beyond skill building by encouraging readers to critically reflect on their own communication patterns and actively apply relevant theory to develop and maintain healthy relationships with family, friends, romantic partners, and co-workers. Designed to promote self-reflection and develop students' interpersonal communication skills, each chapter of this engaging text examines how media, technology, gender, and culture affect the dynamics of relationships and self-expression.

Conflict - Roxane Salyer Lulofs 2000

Providing the most complete coverage of conflict available, this book represents a total approach to the study of conflict. Solid research and theory help readers better

understand the nature of conflict, while practical material helps them make better communication choices. In addition to considering what people bring into a conflict in terms of their attitudes, beliefs, values, and personal characteristics, the book offers new ideas and attitudes to help readers approach conflict more effectively. The extensive use of suggestions, applications, narratives and case studies makes this volume an accessible and useful resource. The book deals with conflict from beginning to end -- from perception of the problem to agreement that it has been resolved or managed. It introduces the idea that conflict is inevitable, explores its consequences, then looks at conflict in the context of values, attitudes, and beliefs, followed by gender and culture. Next the book describes types of conflict; its phases and cycles; and conflict styles, strategies, and tactics, with special attention to collaboration as the preferred strategy. The last half of the

book covers social psychological and communication perspectives, research on conflict and intimacy, choosing among the communication options available, effectively confronting others, cooperative negotiation in win-lose situations, the escalation of conflict into anger and stress, and impression management. The book ends with a discussion of conflict, forgiveness, and reconciliation.

For anyone interested in understanding and dealing with conflict more effectively.

Family Violence - Dudley D. Cahn 2008-01-09

Contributors engage the communication issues associated with violence in families, including interspousal violence and violent parents and children.

Conflict in Intimate Relationships - Dudley D. Cahn 1992-09-26

Why is the potential for conflict so great for intimate partners? This volume integrates research from psychology, sociology, communications, and

family studies to provide a comprehensive, practical synthesis of findings concerning conflict in close personal relationships. Combining discussion of both theory and practice, the volume illuminates why conflict occurs frequently between friends, romantic partners, distressed couples, and divorcing spouses, and also offers professionals a framework for understanding conflict as they try to help defuse strife. The book establishes conflict as a process that lies dormant in any mutually dependent relationship. Depending on the partners' strategies in conflict, the potential for disagreement can quickly become a real obstacle between them and can even threaten to end the relationship. To better determine the source of stress, three different research paradigms are presented to explain the conflict process and why it occurs, as well as to suggest what can be done to help partners manage conflict and preserve intimacy. The

systems-interactionists' approach is presented first. This section discusses methods used to characterize destructive and constructive communication behavior patterns and strategies for dispute resolution. Next, the rules-interventionist approach examines ways in which a mediator can help divorcing couples end one relationship and begin another. Finally, the cognitive-exchange approach is considered. Methods used to determine the antecedent conditions which influence partners' reactions during conflict are presented and approaches for helping them modify destructive communication strategies are discussed. Throughout, terminology and measurements are made to correspond across disciplines so that the work is accessible to all. In addition to relating particular studies and research programs to their appropriate research approaches, the book shows how conflict is uniquely handled when distressed partners engage in problem

solving, when disputing partners engage in mediation, and when same and opposite sex partners participate in developing relationships. Comparison and contrast emphasize the role played by conflict communication behavior, rules, and strategies found in developing intimate relationships, the destructive conflict characteristic of emotionally distressed couples, and the bargaining/negotiation characteristic of formal mediation. Drawing together the wide array of research on the topic in a user-friendly format, this book is an ideal resource for any investigator interested in distressed relationships. Offering practical methodology firmly founded in theory, it is invaluable reading for clinicians working with people in conflict. The book also serves as a text for advanced undergraduate and graduate students of conflict in interpersonal relationships, and as supplementary reading for a variety of courses where conflict is a focus of study.

Communication in Interpersonal Relationships

- Donald P. Cushman
1985-06-30

This book discusses communication principles, processes, and skills from four different perspectives by explaining four related propositions. First, human communication is guided by socially established rules, the knowledge of which allows interacting persons to exert influence over the outcome of their interactions. Second, self concepts are formed and sustained in our interactions with others. Third, the formation of sustained interpersonal relations depends

upon the attraction resulting from reciprocal self concept support. And fourth, organizations and the cultural system provide the parameters within which self concepts and interpersonal relations are formed. The implications of these propositions are examined in chapters two through ten. The authors develop their system in terms of results. What patterns of communication□what patterns of signal exchange□increase the probability of the development of affective relationship? What patterns erode interpersonal systems or prevent them from forming? The book also examines patterns of communication within task-oriented organizations and in situations involving cultural differences. *Resources in Education* - 1994

Conflict in Personal Relationships - Dudley D. Cahn 2013-12-16

In keeping with a broad conception of interpersonal conflict, this book is organized into two parts. The first focuses on conflict on different types of couple relationships -- homosexual, cross cultural, dating but violent, engaged, and married -- and group relationships -- student peers, parents and their young children, and adult children and their aging parents. The

chapters not only review past research on conflict in some relationships, but also take a significant step forward in introducing a variety of other relationship types for future research on conflict. These chapters also offer evidence that conflict is experienced differently in different types of interpersonal relationships. The second part of this book describes basic underlying principles and programs for dealing with interpersonal conflicts. Chapters in this section discuss patterns of argument in everyday life, issues associated with competence in interpersonal conflict, and mediation as a form of intervention for resolution.

Family Violence from a Communication Perspective

- Dudley D. Cahn 1996-04-16
Going beyond the traditional psychological and sociological approaches, this groundbreaking volume presents a new theoretical framework for understanding and resolving abusive family interactions: it takes a communication

perspective to examine the interactional processes at the core of domestic abuse, aggression and violence. Covering spouse, child, elderly parent and courtship abuse, the contributors explore both commonalities and differences in emotional, psychological,

verbal and sexual abuse. They illustrate how these different types of abuse stem from problematic communication patterns integral to the power imbalance inherent in abusive relationships. The contributors also suggest ways of modifying these patterns.
