**Islamic Masculinities** Lahoucine Ouzgane 2013-07-04 This innovative book outlines the great complexity, variety and difference of male identities in Islamic societies. From the Taliban orphanages of Afghanistan to the cafés of Morocco, from the experience of couples at infertility clinics in Egypt to that of Iraqi conscripts, it shows how the masculine gender is constructed and negotiated in the Islamic Ummah. It goes far beyond the traditional notion that Islamic masculinities are inseparable from the control of women, and shows how the relationship between spirituality and masculinity is experienced quite differently from the prevailing Western norms. Drawing on sources ranging from modern Arabic literature to discussions of Muhammad's virility and Abraham's paternity, it portrays ways of being in the world that intertwine with non-Western conceptions of duty to the family, the state and the divine.

*Multicultural Challenges and Redefining Identity in East Asia* Nam-Kook Kim 2016-04-15

Globalization and increased migration have brought both new opportunities and new tensions to traditional East Asian societies. *Multicultural Challenges and Redefining Identity in East Asia* draws together a wide range of distinguished local scholars to discuss multiculturalism and the changing nature of social identity in East Asia. Regional specialists review specific events and situations in China, Korea, Japan, Thailand, Vietnam, Singapore, Taiwan, Malaysia, Indonesia, and the Philippines to provide a focus on life as it is lived at the local level whilst also tracing macro discourses on the national issues affected by multiculturalism and identity. The contributors look at the uneven multicultural development across these different countries and how to bridge the gap between locality and universality. They examine how ethnic majorities and minorities can achieve individual rights, exert civic responsibility, and explain how to construct a deliberative framework to make sustainable democracy possible. This book considers the emergence of a new cross-national network designed to address multicultural challenges and imagines an East Asian community with shared values of individual dignity and multicultural diversity. With strong empirical support it puts forward a regulative ideal by which a new paradigm for multicultural coexistence and regional cooperation can be realized.

*What Does Your Wife Do?* Leonard Beeghley 2018-02-07 In the past, a woman would routinely be asked what her husband did for a living. Increasingly, a man is likely to be asked what his wife does for a living. It's a small switch, but it signifies a revolution in gender roles and family life. Leonard Beeghley uses historical and international data to explain the dramatic changes in the way women and men organize their lives together. Beeghley looks at four issues—premarital sex, abortion, divorce, and employment and income—and discusses how gender roles and family life affect and are affected by changes in each. The key to his analysis is the distinction between individual and structural levels of explanation. At the individual level Beeghley shows how personal characteristics and experiences influence individuals' decisions. At the structural level he shows how changes in social organization—such as industrialization, urbanization, increasing participation of women in the labor force, decreasing fertility rate, and the rise of feminism—have altered the range of available choices. Speculating about the future, Beeghley discusses the way fundamental structural changes in American society are transforming gender relations and family life.

**Contemporary Families at the Nexus of Research and Practice** Scott W. Browning 2017-04-21

*Contemporary Families at the Nexus of Research and Practice* integrates current research with clinical theory to establish the most up-to-date, evidence-supported treatment options for unique contemporary families. Each chapter begins with a case study and genogram. A research section that explains family experiences outlined in the case study follows. Finally, a treatment section presents clinical theory and provides an evidence-supported practice. Together, each chapter demonstrates how theory gets translated into practice. Family forms discussed include families of

divorce, stepfamilies, families of addiction, impoverished families, families of incarceration, families of cyberbullying, and families of murder victims. Whether you're a professional or a student, this book will provide both relevant research findings and explicit instruction and case material to augment your practice.

Healthy American Families John H. Scanzoni 2010-04-22 This fascinating book compares progressive and more religiously conservative views and their differing impacts on the health of families.

Rejecting the definition of family promulgated by the Religious Right, *Healthy American Families: A Progressive Alternative to the Religious Right* offers an innovative approach to understanding 21st-century families. Proactive rather than reactive, it explores the ways families have changed over the past 200 years and builds on that to elucidate the larger forces that continue to redefine male and female roles and the shape of the modern family unit. Part one of the book shows that the Religious Right's claim that a Golden Age of Families existed when our country began is fallacious. Instead families have been changing since the days of the Puritans. Part two picks up the threads to show how, in the wake of those changes, most of today's families are "healthier" than families at the time of our country's founding. Healthy families, the book asserts, spring from a blend of "conservative" ideals (responsibility and accountability) and "liberal" ideals (innovation and change). The result is "responsible change" that benefits both the individual and society.

Never a Matter of Indifference Peter Berkowitz 2013-09-01 The contributors reveal how public policy in the United States has weakened the institutions of civil society that play a critical role in forming and sustaining the qualities of mind and character crucial to democratic self-government. The authors show what can be done, consistent with the principles of a free society, to establish a healthier relationship between public policy and character.

**Redefining Family Policy** Joyce M. Mercier 2008-02-28 Aimed at social scientists, this book discusses family policy in general and the New Federalism in particular, and experimental implementation of the Personal Responsibility and Work Opportunity Reconciliation Act (PRWOA) in the United States. Here, emphasis in family policy is shifted from a centralized entitlement approach to an exchange of personal responsibility, work, and training for better support services.

**Reinventing Human Services** Kristine Nelson 2011-12-31 Dissatisfaction with a human services system that is unresponsive, stigmatizing, and ineffective has led to a ferment of experimentation in recent years. *Reinventing Human Services* examines the historical and economic context of current efforts to reinvent human services, showing the urgency and the difficulty of the task. It draws on successful examples in Britain, Canada, and the United States to develop a new paradigm for social work practice, one that integrates individual, family, and community levels of practice and reconceptualizes professional-community relations. The interdisciplinary team of authors includes scholars, researchers, and practitioners from the disciplines of economics, urban planning, communications, criminal justice, psychology, marriage and family therapy, education, and social work.

*Redefining Families* Adele Eskeles Gottfried 2013-06-29 Families are undergoing dramatic changes in our society. Our traditional views are being challenged by new family arrangements. These new family arrangements are forcing redefinitions of what constitutes a family and raising significant issues regarding the potential developmental consequences for children in these families, if such exist. Moreover, the ramifications of redefined families and their bearing on children's development extend into the legal, political, and societal arenas. This book focuses on the relationships between diverse family arrangements and children's development, as well as on legal and social implications. Our interest in this area emanates from our experience in directing the Fullerton Longitudinal Study. In the course of this investigation, we observed families undergoing transformation, most commonly in maternal employment and marital status. Our initial research on the role of maternal employment in children's development provided the scientific foundation for our interest. Just as we feel that maternal employment and dual-earner families should be comprehensively researched regarding their relationships to children's development, we also believe that other contemporary family arrangements should receive extensive attention in the developmental literature. Hence, the

idea for this book emerged.

*Reinventing Art of Everyday Making* Terttu Tuomi-Gröhn 2008 The word 'everyday' is usually loaded with decidedly negative connotations. However, domestic everyday activities are not merely routine work, but also include complex, demanding tasks to solve. Even though everyday problem solving does not necessarily follow logical pathways, it is sensible and effective in handling practical problems. The studies presented in this book explore domestic everyday making, in terms of the kinds of cognitive, social, and practical tasks being faced and the types of skills needed in solving these tasks. The studies also illustrate the different research strategies appropriate to the investigation of the art and skills of domestic everyday making. The target audience of this book includes researchers and students of family and consumer studies, home economics and craft sciences, cultural studies and sociology. Because of the twofold aim of the book, it can be used as a textbook for both content as well as methodological studies.

*The Rise of Involved Fatherhood: Working Dads Redefining Parenting* Aurora Brooks 101-01-01

*The Reinvention of Primitive Society* Adam Kuper 2017-02-17 Adam Kuper's iconoclastic intellectual history argues that the idea of "primitive society" is a western myth. The "primitive" is imagined as the opposite of the "civilised". But this is a protean myth. As ideas about civilisation change, so the image of primitive society must be adjusted. By way of fascinating account of classic texts in anthropology, ancient history and law, Kuper reveals how this myth underpinned academic research and inspired political programmes. Its ancestry is traced back to classical western beliefs about barbarians and savages, and Kuper also tackles the latest version of the myth, the idea of a global identity of "indigenous peoples". *The Reinvention of Primitive Society* is a key text in the history of anthropology, and will interest anyone who has puzzled about the very idea of "primitive society" - and so, by implication, about "civilisation".

**The Handbook of Sexuality in Close Relationships** John H. Harvey 2004-04-26 Although sexuality is an integral part of close romantic relationships, research linking these two constructs has been less systematic than other areas pertaining to close relationships. To date, researchers in communication, sociology, family studies, psychology, and psychiatry, have made significant advances in both of these fields. The editors' goal is to integrate this research into one volume. They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality. The emphasis is on theoretical integration and stimulation, methodological rigor, and critical analysis. This volume explores: \*early sexual experiences and their impact on late life sexuality; \*how life's stresses impact sexuality and satisfaction with closeness; \*the affect of postpartum depression on sexuality; and \*the relationship between control, power, anger, as well as revenge and sexual processes in couples. The Handbook of Sexuality in Close Relationships is intended for students and researchers in the disciplines of social, clinical, developmental, and health psychology; family studies; counseling; and interpersonal, family, and health communication. An excellent reference in advanced courses in close relationships taught in psychology, communications, sociology, anthropology, and family studies, the material in Part V will also appeal to clinical psychologists, health professionals, and policymakers.

**Parenting Matters** National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Feminist and Queer Legal Theory** Martha Albertson Fineman 2016-04-15 Feminist and Queer Legal Theory: Intimate Encounters, Uncomfortable Conversations is a groundbreaking collection that brings together leading scholars in contemporary legal theory. The volume explores, at times contentiously, convergences and departures among a variety of feminist and queer political projects. These explorations - foregrounded by legal issues such as marriage equality, sexual harassment, workers' rights, and privacy - re-draw and re-imagine the alliances and antagonisms constituting feminist and queer theory. The essays cross a spectrum of disciplinary matrixes, including jurisprudence, political philosophy, literary theory, critical race theory, women's studies, and gay and lesbian studies. The authors occupy a variety of political positions vis-à-vis questions of identity, rights, the state, cultural normalization, and economic liberalism. The richness and vitality of

*Pioneering Paths in the Study of Families* Gary W Peterson 2014-03-18 Meet the men and women whose groundbreaking work elevated the field of family studies! In *Pioneering Paths in the Study of Families: The Lives and Careers of Family Scholars*, you'll find 40 autobiographies written by leading scholars in sociology, family studies, psychology, and child development. Their fascinating stories demonstrate how their family experiences, educational opportunities, and occupational endeavors not only shaped the disciplines they chose but also shaped the theoretical perspectives they utilized and the topics they researched. From the editors: "These autobiographies document the experiences of scholars from the early twentieth century to the present. The descriptions of early influences on their education, of their graduate school experiences, and of their academic career paths, provides a wealth of valuable material. Since four of these scholars have died and a number are in their eighties or older, these histories provide rich case studies on factors that influence the decision to go to college, get married, pursue an advanced degree, make specific occupational choices, and investigate certain topics. These autobiographies also detail the barriers that early women scholars in the social sciences faced." *Redefining Family Law in India* Archana Parashar 2020-11-29 This volume is a collection of articles by scholars across disciplines to create a discourse of family law independent of Religious Personal Law, whilst striving for fairness and justice to all. It demonstrates the artificiality of the public-private divide and seeks the systematic development of ideas for a fair and just family law in contemporary India. The book does not merely document the pathologies of power within the family but also makes proposals for remedying these inequities. It is not confined to considering what changes need to be inducted into existing family law to make it more just, but also strategises on the means and methods of effecting the change. It lifts the familial veil and scrutinises the status, rights and disabilities of some of the subordinated members of the family. The volume is an invitation to redefine family law with the twin tools of reflection and responsibility. It will interest those in law judges, legislators, law reformers as well as those in women and family studies, policy makers and policy analysts, apart from the general reader.

**Stability and Change in Relationships** Anita L. Vangelisti 2002-04 Understanding interpersonal relationships requires understanding actors, behaviors, and contexts. This 2002 volume presents research from a variety of disciplines that examine personal relationships on all three levels. The first section focuses on the factors that influence individuals to enter, maintain, and dissolve relationships. The second section emphasizes ongoing processes that characterize relationships and focuses on issues such as arguing and sacrificing. The third and final section demonstrates that the process of stability and change are embedded in social, cultural, and historical contexts. Chapters address cultural universals as well as cross-cultural differences in relationship behaviors and outcomes. The emergence of relational forms, such as the interaction between people and computers, is also explored. *Stability and Change in Relationships* will be of interest to a broad range of fields, including psychology, sociology, communications, gerontology, and counselling.

**Reinventing the Family** Elisabeth Beck-Gernsheim 2002-04-22 The traditional image of the family as a life-long unit is fading fast. There are fewer marriages, more divorces, and ever more children born to unmarried or single parents. The forms of our private life are changing rapidly, and people are embarking on new lifestyles based on cohabitation, separation and same-sex partnerships. In this lively and accessible new book, Elisabeth Beck-Gernsheim looks at the future of our lives after the family. Examining the breakdown of the conventional family unit, she explores the new choices that are open to individuals, and analyses our anxiety over the ensuing loss of stability. In *Reinventing the Family*, Beck-Gernsheim describes how men and women are being confronted with competing and often incompatible demands. Our areas of personal choice have been redrawn, but in a space that involves new social regulations and controls. The talk of 'family values' sits uneasily with the reality of long working-hours, business trips, weekend seminars and career moves. At work, we are encouraged to pursue competition, speed and change; at home we are expected to find community and conciliation. Beck-Gernsheim examines the impact of these conflicting expectations on the relationships between men, women and children, and searches for possible solutions. *Reinventing the Family* is an important and timely contribution to the growing debate about the family and its future. It will be ideal reading for students of sociology and gender studies, but will also appeal to a wide general readership.

*Fathers across Cultures* Jaipaul L. Roopnarine 2015-08-26 This volume offers a comprehensive, up-to-date synopsis of fathering and father-child relationships in diverse regions of the world, helping students and practitioners alike understand cultural variations in male parenting. Interest in the role of the father and his influence on children's development and economic well-being has grown considerably. This edited volume uses detailed accounts to provide culturally situated analysis of fathering in cultures around the world. The book's contributors, a multidisciplinary group of scholars, bring together the most recent theoretical thinking and research findings on fatherhood and fathering in cultural communities across developed, recently developed, and developing societies. They address such issues as fathering and gender equality in caregiving, concepts of masculinity in contemporary societies, fathering in various ethnic groups, immigrant fathers, fathering and childhood outcomes, and social policies as they affect and are affected by issues related to fathering. Organized geographically, the book scrutinizes major sociocultural, demographic, economic, and other factors that influence men's relationships within families. It shows how economic conditions impact men's involvement with children and considers the effects of ideological belief systems and views of spousal/partner roles and responsibilities. The analysis is

underpinned by recent data that underscores the significance of fathers' involvement with and investment in the well-being of their children.
