Social Perspectives in Lesbian  
and Gay Studies - Peter M.

Nardi 2013-09-13

This comprehensive reader brings a social science perspective to an area hitherto dominated by the humanities. Through it, students will be able to follow the story of how sociology has come to engage with gay and lesbian issues from the 1950s to the present, from the earliest research on the underground worlds of gay men to the emergence of queer theory in the 1990s. Bringing together classic readings and the best work of younger scholars from all parts of the English-speaking world, this reader will be an invaluable resource for courses at undergraduate and graduate level in all areas of the

sociology of sexuality and gender. Separate sections cover: \* theoretical foundations \* identity and community making \* institutions and social change \* challenges for the future. Each section begins with an introduction giving readers a brief guide to the readings in that section, contextualises them and relates them to one another and the book ends with an afterword by Ken Plummer summing up the present state of play and looking forward to the future.

Queer Religion [2 volumes] -

Donald Boisvert 2011-12-13

This ground-breaking and eye-opening book examines the intersections of religion and same-sex desire, from St. Augustine to Hinduism to contemporary LGBT and queer culture. Queer Religion provides a systematic and detailed overview of the challenges and issues that the intersections of religion, same-sex desire, and gender variance have generated, both now and in the past. It focuses upon the development of these areas of overlap through three distinct historical periods: modern religious history, LGBT liberation movements, and the

emergence of queer theory and analysis. This two-volume collection of eclectic essays investigates the experiences of queer people and religion, providing a broad, unique, and invaluable analysis of this important cultural and theological encounter. As a group, the contributors offer brave insights and diverse perspectives on a variety of topics dealing with religion, same-sex desire, and gender expression. Some of these essays are explicitly historical in focus or scholarly articles, while others provide autobiographical viewpoints and personal reminiscences. This book provides a comprehensive look at the queer dimensions of religious practice and belief—essential reading for religious scholars; those within the LGBT community; and anyone interested in human spirituality and sexuality.

Handbook of LGBT Communities, Crime, and Justice - Dana Peterson

2013-12-04

Contemporary scholars have begun to explore non-normative sexual orientation, gender identity, and gender expression in a growing victimization literature, but very little research is focused on LGBTQ communities' patterns of offending (beyond sex work) and their experiences with police, the courts, and correctional institutions. This Handbook, the first of its kind in Criminology and Criminal Justice, will break new ground by presenting a thorough treatment of all of these under-explored issues in one interdisciplinary volume that features current empirical work.

Get a unique insight into the attitudes of mental health professionals working outside the United States! *The Mental Health Professions and Homosexuality: International Perspectives* examines historical and contemporary attitudes toward homosexuality in the theory and practice of mental health professionals working in Europe and Asia. Edited by two noted authors, educators, and practitioners, Drs. Vittorio Lingiardi and Jack Drescher, the book's unique insights are an important step in keeping pace with current international mental health literature about homosexuality. *The Mental Health Professions and Homosexuality* addresses the relationship between psychiatric institutions and homosexuality; the history of

current theoretical frameworks for thinking about homosexuality; the emergence of an international gay, lesbian, and bisexual psychiatric movement; and how changes in psychoanalytic theory and practice both mirror and are influenced by the changing legal and societal status of homosexuality. The Mental Health Professions and Homosexuality: International Perspectives asks three questions of practitioners working in China, India, Italy, Germany, Switzerland, Finland, Norway, and the United Kingdom: 1) what are the prevailing theoretical models about homosexuality found in professional literature in your country; 2) what is known about the actual clinical experiences of gay and lesbian clients; and 3) what is the status of openly gay and lesbian mental health practitioners in your country? The responses reveal insights on a variety of topics, including: the changing views within British psychiatry a survey of German

psychoanalytic institutes regarding their admission policies toward gay and lesbian applicants a detailed review of anti-homosexual biases in Italian scientific literature from 1930 to present the struggle for civil rights of the Chinese tongzhi community the emergence of gay and lesbian civil rights in India efforts to open the World Psychiatric Association and the International Psychoanalytical Association to gay and lesbian mental health professionals The Mental Health Professions and Homosexuality: International Perspectives provides first-hand perspectives on how different cultures have created different ways to view homosexuality and different ways to include—or exclude—gays and lesbians from social and public health policy. The book is an essential resource for psychiatrists, psychologists, psychoanalysts, physicians, social workers, anthropologists, and historians. Gay and Lesbian Literature Since World War II chronicles the multifaceted explosion of gay and lesbian writing that has taken place in the second half of the twentieth century. Encompassing a wide range of subject matter and a balance of gay and lesbian concerns, it includes work by established scholars as well as young theoreticians and archivists who have initiated new areas of investigation. The contributors' examinations of this rich literary period make it easy to view the half-century from 1948 to 1998 as the Queer Renaissance. Included in Gay and Lesbian Literature Since World War II are critical and social analyses of literary movements, novels, short fiction, periodicals, and poetry as well as a look at the challenges of establishing a repository for lesbian cultural history. Specific chapters in this groundbreaking work trace the development of gay poetry in America after World War II; examine how AIDS is represented in the first four

Latino novels to deal with the subject matter; and chronicle the birth of lesbian-feminist publishing in the 1970s--showing how it created a flourishing gay literature in the 1980s and 1990s. Other chapters: outline the history of The Ladder from its initial publication in 1956 as the official vehicle of the Daughters of Bilitis to its final issue as a privately published literary magazine in 1972 examine Baldwin's 1962 novel Another Country and discuss the complicated critical history of this work and its relation to Baldwin's literary reputation--racial, sexual, and political factors are taken into account chart how Other Voices, Other Rooms, by Truman Capote, and The House of Breath, by William Goyen, reveal contradictory genderings of male homosexuality--suggesting an absence of a unified model of mid-twentieth-century male homosexuality argue that the 1976 novel Lover, by Bertha Harris, can be considered an exemplary novel within discussions of both

postmodern fiction and lesbian theory. (The author calls for Harris to be added to the group of writers such as Wittig, Anzaldúa, Lorde, and Winterson, who are discussed within the context of a postmodern lesbian narrative.) examine the short fiction of Canadian lesbian novelist Jane Rule in an effort to shed light on lesbian creative practice in the homophobic climate of postwar North America argue for an understanding of Dale Peck's novel *Martin* and John as an attempt to link two apparently different processes of import to contemporary male subjects through examination of the novel alongside selected passages from Nietzsche and Freud focus on the pragmatic issues of developing and maintaining accessible research venues from which to cultivate the study of racial and cultural diversity in lesbian lives Document the history of the Lesbian Herstory Archives, one of the first lesbian-specific collections in the world, from its birth in the early 1970s to

**Public Discourses About Homosexuality and Religion in Europe and Beyond -**

Marco Derks 2020-10-01

This volume addresses three things many people do not discuss candidly with strangers or mere acquaintances: God, sex, and politics. These can easily become topics of fierce debate, particularly when taken together, as has been the case with same-sex marriage legislation, the Vatican's criticism of "gender ideology," or the repeatedly asserted claim that Islam, homosexuality, and gender equality are essentially incompatible. This volume investigates what is at stake in these constructions of religion and homosexuality in public discourses. Starting with the Netherlands as a special case study, it proceeds with contributions on other predominantly postsecular countries in central, northern, and southern Europe as well as several postcommunist and postcolonial countries "beyond Europe." Combining

#### **Gay and Lesbian Asia -**

Gerard Sullivan 2013-09-13

How do Asian cultures construct queer genders, sexualities, and eroticism? *Gay and Lesbian Asia* demonstrates the astonishing diversity of gay, lesbian, bisexual, and transgendered identities in countries including Korea, Thailand, Malaysia, China, India, Indonesia, Singapore, and the Philippines. Although many Asian cultures borrow the language of the West when discussing queerness, the attitudes, relationships, and roles described are quite different. *Gay and Lesbian Asia* discusses cultural issues as well as the unique political

position of gays in Asian societies. For example, the Thai concept of phet--eroticized gender--is quite different from the Western view that classifies people by the sex of the partners they desire, not by their level of masculine or feminine traits. Similarly, some gay and lesbian Chinese people "come home" rather than "come out." By bringing their partners into the extended family, they can maintain the filial relationships that define them while being able to love whom they choose. The essays in *Gay and Lesbian Asia* cover a broad range of approaches and subjects: globalization theory exploring the political and cultural ramifications of the Western gay identity movement Foucauldian discourse on sexuality and sharply distinct erotic cultures political and cultural analyses of gay and lesbian comradeship and filial relationships in Chinese societies research on the "T" and "po" lesbians (similar to butch and femme) in Malaysian bars the formation of gay cybercommunities in

*Homosexuality in Modern*

*France* - Jeffrey Merrick

1996-08-15

This volume explores the realities and representations of same-sex sexuality in France in the eighteenth, nineteenth, and twentieth centuries, the period that witnessed the emergence

of "homosexuality" in the modern sense of the word.

Based on archival research and textual analysis, the articles examine the development of homosexual subcultures and illustrate the ways in which philosophes, pamphleteers, police, novelists, scientists, and politicians conceptualized same-sex relations and connected them with more general concerns about order and disorder. The contributors--Elizabeth Colwill, Michael David Sibalis, Victoria Thompson, William Peniston, Vernon Rosario II, Francesca Canade-Sautman, Martha Hanna, Robert A. Nye, and the editors Bryant T. Ragan, Jr. and Jeffrey Merrick--use the methods of intellectual and cultural history, the history of science, literary studies, legal and social history, and microhistory. This collection shows how the subject of homosexuality is related to important topics in French history: the Enlightenment, the revolutionary tradition, social discipline, positivism, elite and popular culture, nationalism,

feminism, and the construction of identity. Given the role of gays and lesbians in modern French culture and the work of French scholars on the history of sexuality, this collection fills an important gap in the literature and represents the first attempt in any language to explore this subject over three centuries from a variety of perspectives.

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of

Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.
