Split-Second Persuasion - Kevin Dutton 2011-02-03

An “entertaining” look at the psychology and neuroscience behind the act of influencing others (Kirkus Reviews). People try to persuade us every day. From the news to the Internet to coworkers and family, everyone and everything wants to influence our thoughts in some way. And in turn, we hope to persuade others. Understanding the dynamics of persuasion can help us to achieve our own goals—and resist being manipulated by those who don’t necessarily have our best interests at heart. Psychologist Kevin Dutton has identified a powerful strain of immediate, instinctual persuasion, a method of influence that allows people to disarm skepticism, win arguments, and close deals. With a combination of astute methods and in-depth research in the fields of psychology and neuroscience, Dutton’s fascinating and provocative book: Introduces the natural super-persuaders in our midst: Buddhist monks, magicians, advertisers, con men, hostage negotiators, and even psychopaths. Reveals which hidden pathways in the brain lead us to believe something even when we know it’s not true. Explains how group dynamics can make us more tolerant or deepen our extremism. Illuminates the five elements of SPICE (simplicity, perceived self-interest, incongruity, confidence, and empathy) for instantly effective persuasion. “[Split-Second Persuasion] offers some powerful insights into the art and science of getting people to do what you want.” —New Scientist

Multiplatform Media in Mexico - Paul Julian Smith 2019-05-23

Multiplatform Media in Mexico is the first book to treat the exciting, interconnected fields of cinema, television, and internet in Mexico over the last decade, fields that combine to be called multiplatform media. Combining industrial analysis of a major audiovisual field at a time of growth and change with close readings of significant texts on all screens,

acclaimed author Paul Julian Smith deftly details these new audiovisual trends. The book includes perspectives on local reporting on the ground, as covered in the chapter documenting media response to the 2017 earthquake. And, for the first time in this field, the book draws throughout on star studies, tracing the distinct profiles of actors who migrate from one medium to another. As a whole, Smith’s analyses illustrate the key movements in screen media in one of the world’s largest media and cultural producing nations. These perspectives connect to and enrich scholarship across Latin American, North American, and global cases.

Swoon: Great Seducers and Why Women Love Them - Betsy Prioleau 2013-02-04

"Lose yourself: Swoon has wicked fun answering that age-old query: What do women want?"—Chicago Tribune Contrary to popular myth and dogma, the men who consistently beguile women belie the familiar stereotypes: satanic rake, alpha stud, slick player, Mr. Nice, or big-

money mogul. As Betsy Prioleau, author of *Seductress*, points out in this surprising, insightful study, legendary ladies' men are a different, complex species altogether, often without looks or money. They fit no known template and possess a cache of powerful erotic secrets. With wit and erudition, Prioleau cuts through the cultural lore and reveals who these master lovers really are and the arts they practice to ensnare women. What she discovers is revolutionary. Using evidence from science, popular culture, fiction, anthropology, and history, and from interviews with colorful real-world ladykillers, Prioleau finds that great seducers share a constellation of unusual traits. While these men run the gamut, they radiate joie de vivre, intensity, and sex appeal; above all, they adore women. They listen, praise, amuse, and delight, and they know their way around the bedroom. And they've finessed the hardest part: locking in and revving desire. Women never tire of these fascinators and often, like Casanova's conquests, remain besotted for life. Finally, Prioleau takes stock of the contemporary culture and asks: where are the Casanovas of today? After a critique of the twenty-first-century sexual malaise—the gulf between the sexes and women's record discontent—she compellingly argues that society needs ladies' men more than ever. Groundbreaking and provocative, *Swoon* is underpinned with sharp analysis, brilliant research, and served up with seductive verve.

Finally, the book contemplates the future of Scotland's theatrical renaissance. It is essential reading for anyone interested in contemporary theatre and/or the modern history of live drama in Scotland.

Contemporary Hollywood Masculinities - Susanne Kord 2013-12-04
Kord and Krimmer investigate the most common male types - cops,

killers, fathers, cowboys, superheroes, spies, soldiers, rogues, lovers, and losers - by tracing changing concepts of masculinity in popular Hollywood blockbusters from 1992 to 2008 - the Clinton and Bush eras - against a backdrop of contemporary political events, social developments, and popular American myths. Their in-depth analysis of over sixty films, from *The Matrix* and *Iron Man* to *Pirates of the Caribbean* and *The Lord of the Rings*, shows that movies, far from being mere entertainment, respond directly to today's social and political realities, from consumerism to "family values" to the War on Terror.

Cultural China 2020 - Séagh Kehoe 2021-11-29

Cultural China is a unique annual publication for up-to-date, informed, and accessible commentary about Chinese and Sinophone languages, cultural practices, politics and production, and their critical analysis. It builds on the University of Westminster's Contemporary China Centre Blog, providing additional reflective introductory pieces to contextualise each of the eight chapters. The articles in this Review speak to the turbulent year that was 2020 as it unfolded across cultural China. Thematically, they range from celebrity culture, fashion and beauty, to religion and spirituality, via language politics, heritage, and music. Pieces on representations of China in Britain and the Westminster Chinese Visual Arts Project reflect our particular location and home. Many of the articles in this book focus on the People's Republic of China, but they also draw attention to the multiple Chinese and Sinophone cultural practices that exist within, across, and beyond national borders. The Review is distinctive in its cultural studies-based approach and contributes a much-needed critical perspective from the Humanities to the study of cultural China. It aims to promote interdisciplinary dialogue and debate about the social, cultural, political, and historical dynamics that inform life in cultural China today, offering academics, activists, practitioners, and politicians a key reference with which to situate current events in and relating to cultural China in a wider context.

When Kala Stonechild, one of Rouleau's former officers from Ottawa, suddenly appears in Kingston, Rouleau enlists her to help. Stonechild isn't sure if she wants to stay in Kingston, but agrees to help Rouleau in the short term. While she struggles with trying to decide if she can make a life in this new town, a ghost from her past starts to haunt her. As the detectives delve deeper into the cases, it seems more questions pop up than answers. Who murdered Leah Sampson? And why does Della Monroe's name keep showing up in the murder investigation? The Scientific Imaginary in Visual Culture - Anneke Smelik 2010

Popular media, art and science are intricately interlinked in contemporary visual culture. This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination,

and conversely, of the imagination in and upon science. As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives, cultural theorists have explored the notion of the posthuman. The *Scientific Imaginary in Visual Culture* analyses figurations of the posthuman in history and philosophy, as well as in its utopian and dystopian forms in art and popular culture. The authors thus address the blurring boundaries between art and science in diverse media like science fiction film, futurist art, video art and the new phenomenon of bio-art. In their evaluations of the scientific imaginary in visual culture, the authors engage critically with current scientific and technological concerns.
