Philippine Short Stories, 1925-1940 -

Leopoldo Y. Yabes 1997

This anthology puts together some sixty-six short stories in English written by Filipino authors within forty years following the introduction of English in the Philippines. Originally published in periodicals now long out of circulation, they have been given this more enduring form through the efforts of Leopoldo Y. Yabes, a well-known literary critic, scholar, and educator. Students of Philippine literature will find this anthology invaluable as a reference and will appreciate the discussion and information provided by the editor in his introductory essays.

Understanding Filipino Values on Sex, Love and Marriages - Tomas Donato Andres 1987

The Palgrave Handbook of Critical Menstruation Studies - Chris Bobel 2020-07-24

This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

Sexual Harassment of Women - National Academies of Sciences, Engineering, and Medicine 2018-09-01

Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of

women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Somatechnics - Samantha Murray 2016-04-01

Downloaded from
legacy.opendemocracy.net on 2020-04-29
by guest

Somatechnics highlights the reciprocal bond between the *sôma* and the *techné* of 'the body' and the techniques in which bodies are formed and transformed as crafted responses to the world around us. Structured around the themes of the governance of social bodies, the gendering of sexed bodies and the techniques associated with the formation of the self, Somatechnics presents a groundbreaking study of body modification. Its contributions to the work of Spinoza, Nietzsche, Merleau-Ponty, Deluze and Guattari make it a must read for scholars of sociology, cultural and queer studies and philosophy.

World and Its Peoples - 2007

Most of what is known about the outside world remains superficial and stereotypical. *World and Its Peoples: Eastern and Southern Asia* brings a long, rich story to light about ethnic groups, the impact of terrain and natural resources, and the influence of history. This unique reference work maps out how the nations of the modern world became what they are today through photographs of the geography and people of foreign lands, through discussion of ancient and contemporary works of art and events, and through scores of maps detailing geographical features, historic and modern places, natural habitats, rainfall, locations of ethnic and linguistic groups, natural resources, and centers of industry and transportation. No single resource assembles such comprehensive insight into the world and the people who live in it.

[The Promise of Adolescence](#) - National Academies of Sciences, Engineering, and Medicine 2019-08-26

Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these

developmental opportunities to harness the promise of adolescence "rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

Census of the Philippine Islands - United States. Bureau of the Census 1905

Sexual Diversity in Asia, c. 600 - 1950 -

Raquel A.G. Reyes 2012-07-26

Non-reproductive sex practices in Asia have historically been a source of fascination, prurient or otherwise, for Westerners, who being either Catholic or Protestant, were often struck by what they perceived as the widespread promiscuity and licentiousness of native inhabitants. Graphic descriptions, and pious denunciations, of sodomy, bestiality, transvestitism, and incest, abound in Western travel narratives, missionary accounts, and ethnographies. But what constituted indigenous sexual morality, and how was this influenced by Hinduism, Buddhism, Confucianism, Islam, and Christianity over time and place? What sex practices were tolerated or even encouraged by society, community, and religious ritual, and what acts were considered undesirable, transgressive and worthy of punishment? *Sexual Diversity in Asia, c. 600-1950* is the first book to foreground same-sex acts and pleasure seeking in the histories of India, China, Japan, the Philippines, Thailand, and Indonesia. Drawing on a range of indigenous and foreign sources, the contributors, all renowned experts in their fields, shed light on indigenous notions of gender and the body, social hierarchies, fundamental ideas concerning morality and immorality, and episodes of seduction. The book illuminates - in striking case studies - attitudes toward non-procreative sex acts, and representations and experiences of same-sex pleasure seeking in the histories of Asia. This path-breaking book is an important contribution to the study of gender and sexuality in Asian cultures and will also interest students and scholars of world history.

Official Gazette - Philippines 1963

Adolescent Development and the Biology of Puberty - National Research Council and Institute of Medicine 1999-08-20

Adolescence is one of the most fascinating and complex transitions in the human life span. Its breathtaking pace of growth and change is second only to that of infancy. Over the last two decades, the research base in the field of adolescence has had its own growth spurt. New studies have provided fresh insights while theoretical assumptions have changed and matured. This summary of an important 1998 workshop reviews key findings and addresses the most pressing research challenges.

Philippine Gay Culture - J. Neil C. Garcia 2009-06-01

The book is a descriptive survey of popular and academic writings on and by Filipino male homosexuals, as well as a genealogy of discourses of male homosexuality and the bakla and/or gay identities that emerged in urban Philippines from the 1960s to the present. This conceptual history engages recent events in the Philippines' sexually self-aware present, but also explores colonial history in showing how modernity implanted a new sexual order of "homo/hetero" and further marginalized the effeminate local identity of bakla.

Census of the Philippine Islands: Population - 1905

Census of the Philippine Islands, 1903 - United States. Bureau of the Census 1905

Disease Control Priorities, Third Edition (Volume 8) - Donald A. P. Bundy 2017-11-20

More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. *Child and Adolescent Health and Development* explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.
