[Realigning Research and Practice in Information Systems Development -](#)

Nancy L. Russo 2013-06-29

Given the pervasive nature of information technology and information systems in the modern world, the design and development of IS and IT are critical issues of concern. New research topics continuously emerge in tandem with the latest developments in technology-E-Business, Knowledge Management, Business Process Reengineering, for example. However, when the initial flurry of research abates and the "gloss" of these areas has diminished somewhat, as it inevitably does, the enduring core issue remains as to how to develop systems to fully exploit these new areas. Both information systems and information technology are interpreted fairly broadly in this book. Of particular interest to the editors were research studies that facilitate an understanding of the role and impact of information technology on society, organizations, and individuals, and which strive to improve the design and use of information systems in that context. The contributions to the book are categorized into four broad themes. First is the core issue of developing information systems in the current environment. In this section several fundamental challenges to current assumptions and conventional wisdom in information systems development are posed. The second section considers the management of information systems. Again, the conventional wisdom is challenged. The penultimate section focuses on researching information systems. Here, various issues to do with research methods are surfaced, and the use of leading-edge research methods in information systems development is pioneered and discussed. Finally, a section is devoted to understanding information systems. This section addresses the perennial challenge in the IS field in relation to the conceptual foundations of the field. This volume comprises the proceedings of the Working Conference on Realigning Research and Practice in Information Systems Development: The Social and Organizational Perspective, which was sponsored by the International Federation for Information Processing (IFIP) and held in Boise, Idaho, USA in July 2001. Given the central importance of information systems development in the current age, this eclectic book, which considers the topic from a rich and varied set of perspectives, will be essential reading for researchers and practitioners working in all areas of IS and IT.

Gender and the Politics of the Curriculum - Sheila Riddell

2012-05-16

This book uses detailed case studies of two secondary schools to examine the relationship between curriculum choice and gender identity among fourteen-year-old pupils making their first choices about what subjects to

pursue at exam level. It reveals a two way process. Pupils' decisions on what subject to take are influenced by how they perceive themselves in gender terms, and the curriculum once chosen reinforces their sense of gender divisions. The author looks at the influences on pupils at this stage in their lives from peers, family and the labour market as well as from teachers. She argues that the belief in freedom of choice and school neutrality espoused by many teachers can become an important factor in the reproduction of gender divisions, and that unless the introduction of the national curriculum is accompanied by systematic efforts to eradicate sexism from the hidden curriculum it will fail in its aim of creating greater equality of educational opportunity among the sexes.

[Women and Recession \(Routledge Revivals\) - Jill Rubery 2010-10-18](#)

Originally published in 1988, this book compiles a collection of works investigating the impact of recession on women's employment. The authors argue that the most important explanation of differences in women's experience between the countries is the form of labour market regulation and organisation. They point out that current changes in these forms of regulation, and not displacement of female labour, pose the main threat to any gains that women have made in the labour market in the post- World War II period.

[Gender Transformations - Sylvia Walby 2003-09-02](#)

The answer of course is both. In this lucid and subtle investigation, Sylvia Walby, one of the world's leading authorities on gender shows how undoubted increases in opportunity for women in Europe and America have been accompanied by new forms of inequality. She charts changes in women's employment, education and political representation and the complex relations between gender, class and ethnicity, between local conditions and global pressures which together determine the place of women both in the labour market and in the wider social, political and economic world of today. An eagerly awaited successor to Walby's classic *Theorising Patriarchy*, *Transforming Gender* will be essential reading for anyone with an interest in how questions of gender remake and are remade by the social and economic conditions in which they occur.

[American Studies - Jack Salzman 1990-05-25](#)

This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988. There are more than 6,000 descriptive entries in a wide range of categories: anthropology and folklore, art and architecture, history, literature, music, political science, popular culture, psychology, religion, science and technology, and sociology.

[John Goldthorpe: Consensus And Controversy - Jon Clark 2013-11-26](#)

This volume forms part of a series on contemporary sociologists. The work of each scholar chosen is internationally recognized and relates to

the core of sociology in the 1990s. This text covers the main themes of John Goldthorpe's work, and includes his replies to criticisms of his ideas.

British Women's History - 1996

This is one of a series of bibliographical guides designed to meet the needs of undergraduates, postgraduates and their teachers in universities and colleges of further education. All volumes in the series share a number of common characteristics. They are selective, manageable in size, and include those books and articles which are considered most important and useful. All are edited by practising teachers of the subject in question and are based on their experience of the needs of students. The arrangement combines chronological with thematic divisions. Most of the items listed receive some descriptive comment.

The Sexual Division of Work - Shirley Dex 1985

Considers issues and research in Great Britain and the U.S.

Female Labour Power: Women Workers' Influence on Business Practices in the British and American Cotton Industries, 1780-1860 - Janet Greenlees 2017-03-02

Britain and America were the first two countries with mechanised cotton manufacturing industries, the first major factory systems of production and the first major employers of women outside of the domestic environment. The combination of being new wage earners in the first trans-national industry and their public prominence as workers makes these women's role as employees significant; they set the early standard for women as waged labour, to which later female workers were compared. This book analyses how women workers influenced patterns of industrial organization and offers a new perspective on relationships between gender and work and on industrial development. The primary theme of the study is the attempt to control the work process through co-operation, coercion and conflict between women workers, their male counterparts and manufacturers. Drawing upon examples of women's subversive activities and attitudes toward the discourses of labour, the book emphasizes the variety of women's work experiences. By using this diversity of experience in a comparative way, the book reaches conclusions that challenge a variety of historical concepts, including separate spheres of influence for men and women and related economic theories, for example that women were passive players in the workplace, evolutionary theories with respect to industrial development, and business culture within and between the two industries. Overall it provides the fresh approach that highlights and explains women's agency as operatives and paid workers during industrialization.

The Changing Shape of Nursing Practice - Davina Allen 2002-01-04

Bringing together sociological theories and nursing practice this text develops a dynamic conceptualisation of the nursing role which is rooted in the work setting. It looks at the factors which have shaped nursing work in the past and those which are likely to shape it in the future. Nurses' work is changing in two respects: the place nursing occupies in the health care division of labour and the routine shifting of work boundaries that nurses experience in their daily work. Drawing on her detailed observations of the reality of nursing work in a district general hospital, Davina Allen explores these linked themes, focussing on five key work boundaries: *nurse:doctor *nurse:manager *nurse:support worker *nurse:patient *nurse:nurse The text provides new insight into many of the tensions and dilemmas nurses routinely face and the processes and constraints through which their work is fashioned. It offers a new way of thinking about the nursing role which is particularly relevant at a time when the scope of nursing practice is expanding and when the integrated approach to health and social care is seen as the key to provision and improved services.

The Ann Oakley Reader - Ann Oakley 2005-06-29

This book contains selected extracts by feminist sociologist Ann Oakley, introduced with her own current reflections after 30 years of research and writing on sex, gender, housework, motherhood, women's health and social sciences.

[Women and the Sexual Division of Labour in the Caribbean](#) - Keith Hart 1996

Women and the Sexual Division of Labour in the Caribbean is a report of a series of seminars held in 1987. It consists of a broad essay in evolutionary anthropology, a review of labour market theories, an application of general theory to the social history of the sexual division of labour in Trinidad and Tobago, and four case studies of women's work in Jamaica - the country where the original presentations were made.

Routledge International Encyclopedia of Women - Cheris Kramarae 2000
For a full list of entries and contributors, sample entries, and more, visit the Routledge International Encyclopedia of Women website. Featuring comprehensive global coverage of women's issues and concerns, from violence and sexuality to feminist theory, the Routledge International Encyclopedia of Women brings the field into the new millennium. In over 900 signed A-Z entries from US and Europe, Asia, the Americas, Oceania, and the Middle East, the women who pioneered the field from its inception collaborate with the new scholars who are shaping the future of women's studies to create the new standard work for anyone who needs information on women-related subjects.

Durable Inequality - Charles Tilly 1998-01-31

Exploring representative paired and unequal categories, such as male/female, black/white, and citizen/non-citizen, Tilly argues that the basic causes of these and similar inequalities greatly resemble one another.

The Power to Choose - Naila Kabeer 2020-05-05

In this path-breaking study, social economist Naila Kabeer examines the lives of Bangladeshi garment workers in Bangladesh and Britain to shed light on the question of what constitutes "fair" competition in international trade. She argues that if the unhealthy coalition of multinationals and labor movements is truly seeking to improve the working conditions for women and children in the "Third World," as well as those of western workers, their efforts should be directed away from an attempt to impose labor standards and towards a support for the organization of labor rights. Any attempt to devise acceptable labor standards at an international level which takes no account of the forces of inclusion and exclusion with local labor movements is, she further argues, likely to represent the interests of the powerful at the expense of those of the weak.

Research Handbook on the Future of Work and Employment Relations - Keith Townsend 2011-01-01

ÔThis is an enlightening text on the subject of employment and work relations that will be useful for students in economics, specifically those studying labor relations. Õ Ñ Lucy Heckman, American Reference Books Annual 2012 The broad field of employment relations is diverse and complex and is under constant development and reinvention. This Research Handbook discusses fundamental theories and approaches to work and employment relations, and their connection to broader political and societal changes occurring throughout the world. It provides comprehensive coverage of work and employment relations theory and practice. This up-to-date research compendium has drawn together a range of international authors from diverse disciplinary backgrounds. There are chapters from labour historians, theoreticians, more mainstream industrial relations scholars, sociologists, organizational psychologists, geographers, policy advisors, economists and lawyers. At the heart of each chapter is the notion that the world of work and employment relations has changed substantially since the halcyon days of IR, throughout the Dunlop Era of the 1950s. However, many areas of enquiry remain, and more questions have developed with society and technology. This Handbook reflects this view. As the field of study and practice continues to evolve throughout the twenty-first century, what lessons have we learnt from the past and what can we expect in the future? Academics and postgraduate students researching industrial relations, human resource management, employment relations, industrial sociology and sociology of work will find this important resource invaluable.

[Sociology for Social Workers](#) - Anne Llewellyn 2008-07-08

How can sociology contribute to positive social work practice? This introductory textbook uses pedagogical features such as chapter summaries, numerous examples, a glossary, activities and annotated further reading.

Revisiting Gender and Migration - M. Murat Yüce_ahin 2017

Yucesahin and Yazgan bring together an intriguing collection of essays drawing on a series of research carried out across the world to offer new insights on gender and migration nexus. Recent developments in the field of women's studies have led to a renewed interest in gender studies; nevertheless, these changes are having an effect and a need, which represent different theoretical and analytical tools rather than sex as a dichotomous variable. There is an increasing concern about using theoretical approaches of gender as relational, and spatially and contextually. Therefore, gender is an increasingly important concept in different areas as an analytical tool and research lens to understand how societies function, depending on diversified theoretical orientations. Gender studies not only include women's studies but also cover men's

and LGBTTI-Q studies. The literature on gender has highlighted several issues, specifically gender identity, gendered representations, gender roles, gender politics, femininity and masculinity. West and Zimmerman state that analysing gender involves a complex of socially guided perceptual, interactional and micro political activities that cast particular pursuits as expressions of masculine and feminine "natures". Evidently, the role of gender in the contemporary world is at the heart of understanding migrations. From this point forth, recent developments in human mobility have heightened the need for bringing gendered approaches to all aspects of the issues of conflict and movement regarding states, societies and families from broadening perspectives to the accurate understanding of the whole process.
