Studies in the Psychology of Sex, Volume 3, is the third of six volumes by English physician Havelock Ellis that explores human sexuality. Subtitled 'Analysis of the Sexual Impulse, Love and Pain, The Sexual Impulse in Women', this book was first published in 1903. Delving into subjects such as sadism and masochism, and more specifically bondage, strangulation, whipping, and biting, Ellis discusses how these preferences and instincts manifest, how they can be explained, and how they can be linked to more fundamental aspects of sexuality. He also discusses women's sexuality and the differences between male and female sexual impulses.

Rare edition with unique illustrations and elegant classic cream paper. Henry Havelock Ellis, known as Havelock Ellis (2 February 1859 - 8 July 1939), was an English physician, writer, progressive intellectual and social reformer who studied human sexuality. He was co-author of the first medical textbook in English on homosexuality in 1897, and also published works on a variety of sexual practices and inclinations, as well as transgender psychology. He is credited with introducing the notions of narcissism and autoeroticism, later adopted by psychoanalysis. Like many intellectuals of his era, he

supported eugenics and he served as president of the Eugenics Society. A concise introduction to sexual psychology primarily intended for medical readers and students but also aimed at a wider audience with its expert guidance and advice on numerous sexual topics. Ellis' *Studies in the Psychology of Sex* is a comprehensive and groundbreaking encyclopaedia of human sexual biology, behaviour, and attitudes. In separate volumes he examined such topics as homosexuality, masturbation, and the physiology of sexual behaviour. Ellis viewed sexual activity as the healthy and natural expression of love, and he sought to dissipate the fear and ignorance that characterized many people's attitudes toward human sexuality. His work helped to foster the open discussion of sexual problems, and he became known as a champion of women's rights and of sex education. Contents Volume 3 include: ANALYSIS OF THE SEXUAL IMPULSE. Studies in the Psychology of Sex, Volume I presents studies that explore the psychology of sex by addressing topics ranging from the evolution of modesty to the phenomenon of sexual periodicity, auto-erotism, and sexual impulse. The relationship between love and pain, sexual impulse in women, and sexual selection are also discussed, along with sexual inversion. Divided into four parts, this volume first deals with the evolution of modesty and variations in modesty among different peoples and in different ages.

The reader is then introduced to the phenomenon of sexual periodicity, with emphasis on menstruation and its relation to ovulation; the various physiological and psychological rhythms; and the predominance of sexual excitement at and around the menstrual period. Subsequent chapters focus on auto-erotism and spontaneous manifestations of the sexual impulse; the link between love and pain; sexual impulse in women; and sexual selection. The book also analyzes the theory and nature of sexual inversion before concluding with an overview of relevant subjects such as homosexuality, castration, psychoanalysis, and marriage. This monograph will be of interest to physicians, psychologists, psychiatrists, criminologists, and educators.

What can psychology teach us about sex? How do different bodies and brains respond sexually? How can we prevent people being stigmatised for their sexuality? The Psychology of Sex takes you on a tour through the different ways that psychologists have created and sustained certain understandings of sex and sexuality. Bearing in mind the subjective nature of sex, the book explores cultural concerns around sexualisation, pornography, and sex addiction, as well as drawing on research from sexual communities and the applied area of sex therapy. When so much of our relationship to sex happens in the mind, The Psychology of Sex shows us how important it is to understand where our ideas about sex come from.

Ellis (1859-1939) challenged the taboos and hypocrisies of Victorian society and paved the way for greater openness that has characterized the modern era. Born on February 2, 1859 in Croydon, England, Havelock Ellis was the son of a prosperous sea captain. Father and son went on a round-the-world voyage when Ellis was only seven years old. Ellis was a child prodigy. Reading soon became his passion. After having gone through the volumes of *Nature Displayed*, which he found at home, he proceeded to make his way through the works of several literary giants. At the age of twelve, he prepared a manuscript titled "The Precious Stones of the Bible," which he intended to publish, but decided the cost of publication was prohibitive. He then planned a second book, about flowers, and wrote various essays.
