My New Roots - Sarah Britton
2015-03-31

At long last, Sarah Britton, called the “queen bee of the health blogs” by Bon Appétit, reveals 100 gorgeous, all-new plant-based recipes in her debut cookbook, inspired by her wildly popular blog. Every month, half a million readers—vegetarians, vegans, paleo followers, and gluten-free gourmets alike—flock to Sarah’s adaptable and accessible recipes that make powerfully healthy ingredients simply irresistible. *My New Roots* is the ultimate guide to revitalizing one’s health and palate, one delicious recipe at a time: no fad diets or gimmicks here. Whether readers are newcomers to natural foods or are already devotees, they will discover how easy it is to eat

healthfully and happily when whole foods and plants are at the center of every plate.

Trainspotting - Irvine Welsh 2011

Irvine Welsh's controversial first novel, set on the heroin-addicted fringe of working-class youth in Edinburgh, is yet another exploration of the dark side of Scottishness. The main character, Mark Renton, is at the center of a clique of nihilistic slacker junkies with no hopes and no possibilities, and only "mind-numbing and spirit-crushing" alternatives in the straight world they despise. This particular slice of humanity has nothing left but the blackest of humor and a sharpness of wit. American readers can use the glossary in the back to translate the slang and dialect--essential, since the

dialogue makes the book. This is a bleak vision sung as musical comedy. Amazon.

Feminism and the Politics of Childhood - Rachel Rosen
2018-02-22

Feminism and the Politics of Childhood offers an innovative and critical exploration of perceived commonalities and conflicts between women and children and, more broadly, between various forms of feminism and the politics of childhood. This unique collection of 18 chapters brings into dialogue authors from a range of geographical contexts, social science disciplines, activist organisations, and theoretical perspectives. The wide variety of subjects include refugee camps, care labour, domestic violence and childcare and education. Chapter authors focus on local contexts as well as their global interconnections, and draw on diverse theoretical traditions such as poststructuralism, psychoanalysis, posthumanism, postcolonialism, political economy, and the ethics of care. Together the

contributions offer new ways to conceptualise relations between women and children, and to address injustices faced by both groups. Praise for *Feminism and the Politics of Childhood: Friends or Foes?* 'This book is genuinely groundbreaking.' – Val Gillies, University of Westminster
'Feminism and the Politics of Childhood: Friends or Foes?' asks an impossible question, and then casts prismatic light on all corners of its impossibility.' – Cindi Katz, CUNY
'This provocative and stimulating publication comes not a day too soon.' – Gerison Lansdown, Child to Child
'A smart, innovative, and provocative book.' – Chandra Talpade Mohanty, Syracuse University
'This volume raises and addresses issues so pressing that it is surprising they are not already at the heart of scholarship.' – Ann Phoenix, UCL
Sexing the Body - Anne Fausto-Sterling 2020-06-30

examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal

definition of normality.

Practising Gender Analysis in Education - Fiona E. Leach 2003

This companion applies the Harvard framework, women's empowerment approach, gender analysis matrix and social relations approach to analysis of a variety of educational contexts, including national education policies and projects, schools, colleges, ministries, teaching and learning materials, and school and teacher training curricula.

The Meaning of Freedom -

Angela Y. Davis 2012-08-14

What is the meaning of freedom? Angela Y. Davis' life and work have been dedicated to examining this fundamental question and to ending all forms of oppression that deny people their political, cultural, and sexual freedom. In this collection of twelve searing, previously unpublished speeches, Davis confronts the interconnected issues of power, race, gender, class, incarceration, conservatism,

and the ongoing need for social change in the United States. With her characteristic brilliance, historical insight, and penetrating analysis, Davis addresses examples of institutional injustice and explores the radical notion of freedom as a collective striving for real democracy - not something granted or guaranteed through laws, proclamations, or policies, but something that grows from a participatory social process that demands new ways of thinking and being. "The speeches gathered together here are timely and timeless," writes Robin D.G. Kelley in the foreword, "they embody Angela Davis' uniquely radical vision of the society we need to build, and the path to get there." *The Meaning of Freedom* articulates a bold vision of the society we need to build and the path to get there. This is her only book of speeches. "Davis' arguments for justice are formidable. . . . The power of her historical insights and the sweetness of her dream cannot be denied."—The New

York Times "One of America's last truly fearless public intellectuals." —Cynthia McKinney, former US Congresswoman "Angela Davis offers a cartography of engagement in oppositional social movements and unwavering commitment to justice." —Chandra Talpade Mohanty, Women's Studies, Hamilton College "Angela Davis deserves credit, not just for the dignity and courage with which she has lived her life, but also for raising important critiques of a for-profit penitentiary system decades before those arguments gained purchase in the mainstream." —Thomas Chatterton Williams, SFGate "Angela Davis's revolutionary spirit is still strong. Still with us, thank goodness!" —Virginian-Pilot "Long before 'race/gender' became the obligatory injunction it is now, Angela Davis was developing an analytical framework that brought all of these factors into play. perhaps the leading public intellectual of our era." —Robin D. G. Kelley author of *Thelonious Monk: The Life and Times of an American Original* "There was a time in America when to call a person an 'abolitionist' was the ultimate epithet. It evoked scorn in the North and outrage in the South. Yet they were the harbingers of things to come. They were on the right side of history. Prof. Angela Y. Davis stands in that proud, radical tradition." —Mumia Abu-Jamal, author of *Jailhouse Lawyers: Prisoners Defending Prisoners v. the U.S.A.* "Behold the heart and mind of Angela Davis, open, relentless, and on time!" —June Jordan "Political activist, scholar, and author Angela Davis confronts the interconnected issues of power, race, gender, class, incarceration, conservatism, and the ongoing need for social change in the U.S. in her book, *The Meaning of Freedom: And Other Difficult Dialogues.*" —Travis Smiley Radio Angela Y. Davis is professor emerita at the University of California and

author of numerous books. She is a much sought after public speaker and an internationally known advocate for social justice. Robin D.G. Kelley is the author of many books and a professor at the University of Southern California.

Slow Violence and the Environmentalism of the Poor - Rob Nixon 2011

"Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war occurs gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Women, Race & Class - Angela Y. Davis 2019-10-03

Ranging from the age of slavery to contemporary injustices, this groundbreaking history of race, gender and class inequality by the radical political activist Angela Davis offers an alternative view of female struggles for liberation.

Tracing the intertwined histories of the abolitionist and women's suffrage movements, Davis examines the racism and class prejudice inherent in so much of white feminism, and in doing so brings to light new pioneering heroines, from field slaves to mill workers, who fought back and refused to accept the lives into which they were born. The Case for Marriage - Linda Waite 2002-03-05

A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. *The Case for Marriage* is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings

dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. *The Case for Marriage* combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear,

essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of *The Book of Virtues* "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal

"The Blue Butterfly is a vibrant period novel that reimagines the controversial love story of a classic film star." —Foreword Reviews
New York 1915, Marion Davies is a shy eighteen-year-old beauty dancing on the Broadway stage when she meets William Randolph Hearst and finds herself captivated by his riches, passion and desire to make her a movie star. Following a whirlwind courtship, she learns through trial and error to live as Hearst's mistress when a divorce from his wife proves impossible. A baby girl is born in secret in 1919 and they agree to never acknowledge her publicly as their own. In a burgeoning Hollywood scene, she works hard making movies while living a lavish partying life that includes a secret love affair with Charlie Chaplin. In late 1937, at the height of the depression, Hearst wrestles with his debtors and failing

High Quality Care for All - Secretary of State for Health 2008

This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2

identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace.

Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the

high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

New Perspectives on the Biology of Nectaries and Nectars

- Clay Carter

2019-08-27

The number of currently known, described and accepted plant species is ca 374,000, of which approximately 295,00 (79%) are angiosperms. Almost 90% of this huge number of flowering plants is pollinated by animals (mostly insects) via

nectar-mediated interactions. Notably, three-fourths of the leading global crop plants produce nectar and are animal pollinated, which is estimated to account for one-third of human food resources. Nectar can also be produced on tissues outside of flowers, by so-called extrafloral nectaries, and commonly mediate interactions with 'body-guard' ants and other pugnacious insects that defend the plant from herbivores. Extrafloral nectar is present in almost 4,000 plant species, a majority of them in the angiosperms. This brief summary on the occurrence of nectar in the plant kingdom is just to highlight that nectar has a fundamental role in two basal functions that allow the maintenance of our ecosystems: sexual plant reproduction and protection of plants from herbivory. Despite playing essential ecological and evolutionary functions, our current knowledge about nectar is largely incomplete; however, new research directions and perspectives on

nectaries and nectars have arisen in recent years. In the last two decades, there were only a few 'moments' in which nectar was the main character in international meetings or in published books. In 2002, the first (and only) international meeting "Nectar and nectary: from biology to biotechnology" dedicated exclusively to nectar and nectaries was held in Italy (Montalcino, Siena) and in 2003 the proceedings were published in a special volume of *Plant Systematics and Evolution* (238, issue 1-4). In 2007, the book *Nectar and Nectaries* was published (Springer) with most of the contributions provided by authors that attended the meeting in Italy. Another book dedicated to nectar was published in 2015 (*Nectar: Production, Chemical Composition and Benefits to Animals and Plants*, Nova Science Publishers) covering aspects mainly related to nectar chemical composition and plant-pollinator interactions. Similarly, symposia focused on nectar

have been organized within the International Botanical Congress in 2011 and 2017. Considering that the last few years has yielded essential developments in the understanding of nectar biology, we thought now is the moment to further stimulate research on this important topic. This aim has been met through 18 papers published in our Research Topic *New Perspectives on the Biology of Nectaries and Nectars*, with subjects spanning evolution and ecology to nectar chemistry and nectary structure.

Discovered amidst a tangle of sea grape trees, Moshe

Fisher's provenance is a thing

of myth and mystery; his unusual appearance, with blueish, translucent skin and duo-toned hair, only serves to compound his mystique.

Equally feared and ridiculed by peers as he grows up, he finds a surprising kindred soul in the striking and bold Arrienne Christie, but their complex relationship is fraught with obstacles that tear them apart as powerfully as they are drawn together. Beginning in the late 1950s, four years before Jamaica's independence from colonial rule, *A Tall History of Sugar's* epic love story sweeps between a rural Jamaica, scarred by the legacies of colonialism, and an England increasingly riven by race riots and class division.
