The Ethics of Interpersonal Relationships - Joyce Catlett 2018-03-28
Writing this book springs from a deep feeling for people and a grave concern that without a proper understanding of the reasons for their inhumanity in relation to one another and the development of a compassionate world view, it is likely that human beings may eventually destroy themselves and life on the planet. This work is an attempt to explain the source of destructive behaviour and how it manifests itself in personal relationships between men, women, couples, and families, and in the social arena. The author presents a position that offers a hope of altering the destiny of humankind's unethical behavior through better psychological understanding and education. Understanding the source of a person's aggressiveness in defending the fantasy bond and learning to cope with the voice process have strong implications for child-rearing and better mental health practices.

Exploring the Gray Zone - Andrea DeSantis Kerr 2016-08-15

Veterinary technicians face difficult situations on a daily basis. They dedicate their lives to aiding in the treatment of animals and relieving suffering, serving as each patient's main advocate and caretaker. The

veterinary technician holds a unique role in patient care. Acting as the intermediary between the veterinarian prescribing treatment and the patient, they play a large part in the communication and education of clients. Veterinary technicians have greatly expanded their roles and find themselves not only an integral part of veterinary practice, but in research institutions, animal shelters, and universities as well. This text explores difficult situations veterinary technicians face on a daily basis through the use of case examples and dialogue. Each case scenario describes a real-life situation for a veterinary technician, poses thought-provoking questions, and provides commentary that focuses on the legal aspect of the scenario, the social or personal ethics of the parties involved, and/or the welfare of the animal (s). The case scenarios encompass clinical situations in a practice setting as well as situations involving business ethics and interpersonal relationships between colleagues. The case format of the book lends itself to discussion and can be utilized in veterinary technology courses that focus on ethics, communications, management, and leadership. The real-life case examples make the book an enjoyable read for practicing veterinary technicians as well. There currently are over two hundred veterinary technology programs and thousands of practicing veterinary technicians within the United States and Canada.

Oxford Studies in Agency and Responsibility - David Shoemaker
2013

"Oxford studies in agency and responsibility" is a series of volumes presenting outstanding new work on a set of connected themes, investigating such questions as: what does it mean to be an agent?; what is the nature of moral responsibility? Of criminal responsibility? What is the relation between moral and criminal responsibility (if any)?; What is the relation between responsibility and the metaphysical issues of determinism and free will?; what do various psychological disorders tell us about agency and responsibility?; how do moral agents develop? How does this developmental story bear on questions about the nature of moral judgment and responsibility?; what do the results from neuroscience imply (if anything) for our questions about agency and

responsibility? OSAR thus straddles the areas of moral philosophy and philosophy of action, but also draws from a diverse range of cross-disciplinary sources, including moral psychology, psychology proper (including experimental and developmental), philosophy of psychology, philosophy of law, legal theory, metaphysics, neuroscience, neuroethics, political philosophy, and more. It is unified by its focus on who we are as deliberators and (inter)actors, embodied practical agents negotiating (sometimes unsuccessfully) a world of moral and legal norms" -- Provided by publisher.

Dilemmas of Trust - Trudy Govier 1998-10-13

Trust facilitates communication, love, friendship, and co-operation and is fundamentally important to human relationships and personal development. Using examples from daily life, interviews, literature, and film, Govier describes the role of trust in friendship and in family relationships as well as the connection between self-trust, self-respect, and self-esteem. She examines the reasons we trust or distrust others and ourselves, and the expectations and vulnerabilities that accompany those attitudes. But trust should not be blind. Acknowledging that distrust is often warranted, Govier describes strategies for coping with distrust and designing workable relationships despite it. She also examines situations in which the integrity of interpersonal relationships has been violated by serious breaches of trust and explores themes of forgiveness, reconciliation, and the restoration of trust. By encouraging reflection on our own attitudes of trust and distrust, this fascinating book points the way to a better understanding of our relationships and ourselves.

In the wake of this development a number of ethical questions have been raised and debated. *Ethics in Cyberspace* focuses on the consequences for ethical agency of mediating interaction by means of computers, seeking to clarify how the conditions of certain kinds of interaction in cyberspace (for example, in chat-rooms and virtual worlds) differ from the conditions of interaction face-to-face and how these differences may come to affect the behaviour of interacting agents in terms of ethics.
