**14 Days to a Wellness Lifestyle** Donald B. Ardell 1982 Abstract: A systematic approach to good health focuses on providing information and motivation. Exercises and checklists encourage participation. The wellness lifestyle is based upon self-responsibility, nutritional awareness, physical fitness, stress management, and environmental sensitivity. Topics include perspectives on the medical system, hazardous cultural norms, creating a healthy self-image, self-responsibility, and physical fitness. A lesson on eating for performance encourages the use of fruits, vegetables, and whole grains. Salt, refined sugars, caffeine, soft drinks, and alcohol are not positive foods in a wellness supportive environment. Successful wellness programs from around the US are described. An annotated list of recommended readings is included; a list of music recommended to accompany the program also is included. (rkm).

**Sperm Competition and the Evolution of Animal Mating systems** Robert L. Smith 2012-12-02 Sperm Competition and the Evolution of Animal Mating Systems describes the role of sperm competition in selection on a range of attributes from gamete morphology to species mating systems. This book is organized into 19 chapters and begins with the conceptualization of sperm competition as a subset of sexual selection and its implications for the insects. The following chapter describes the relationship between multiple mating and female fitness, with an emphasis on determining the conditions under which selection on females is likely to counteract selection on males for avoiding sperm competition. Other chapters consider the female perspective on sperm competition; the evolutionary causation at the level of the individual male gamete; and the correlation of high paternal investment and sperm precedence in the insects. The remaining chapters are arranged phylogenetically and explore the sperm competition in diverse animal taxa, such as the *Drosophila*, Lepidoptera, spiders, amphibians, and reptiles. These chapters also cover the evolution of direct versus indirect sperm transfer among the arachnids or the problem for kinship theory presented by multiple mating and sperm competition in the Hymenoptera. This book further discusses the remarkable potential for sperm competition among certain temperate bat species whose females store sperm through winter hibernation and the mixed strategies and male-caused female genital trauma as possible sperm competition adaptations in poeciliid fishes. The concluding chapter examines the predictions concerning testes size and mating systems in the primates and the possible role of sperm competition in human selection. This book is of great value to reproductive biologists and researchers.

*Human Motivation, a Guide to Information Sources* Charles Norval Cofer 1980

Journey to Brotherhood Frank D. Cardelle 1990 The author believes men today are left with the task of learning how to step into the future arena as a new kind of person. Lacking guideposts and health models that free them from the learned and inherited self-denial, isolation and falsehood, the journey is long and difficult. For some men this is a celebrated opportunity for unshackling unhealthy image of maleness and for other men this is a terrifying prospect and is met with resistance. The author sees this journey as needed for reshaping the psyche and heart of the 20th century male. The book offers an insight and analysis of male upbringing in modern society. Loaded with exercises, activities, vignettes and alternatives for men dealing with the transition they find themselves in, this book is intended to be a definitive step toward raising men's consciousness.

*Sperm Competition in Humans* Todd K. Shackelford 2006-11-22 In species with internal fertilization, sperm competition occurs when the sperm of two or more males simultaneously occupy the reproductive tract of a female and compete to fertilize an egg (Parker, 1970). A large body of empirical research has demonstrated that, as predicted by sperm competition theory, males and females in many species possess anatomical, behavioral, and physiological adaptations that have evolved to deal with the adaptive challenges associated with sperm competition. Moreover, in recent years, evolutionary biologists and psychologists have begun to examine the extent to which sperm competition may have been an important selective pressure during human evolution. Some research has suggested that male humans, like males of many bird, insect, and rodent species, might be able to adjust the number of sperm they inseminate according to the risk of sperm competition. Other research has examined whether such responses might be accompanied by psychological changes that motivate human males to pursue copulations when the risk of sperm competition is high. Furthermore, there is research suggesting that aspects of human penile anatomy might function to enhance success in sperm competition. Much of this work has been controversial; some of the findings have been disputed and others have been greeted with skepticism. However, the idea that some aspects of human psychology and behavior might best be understood as adaptations to sperm competition remains intriguing and, in certain cases, very persuasive.

The Emerging Mind Karen Nesbitt Shanor 2001-03-07 Is your big toe capable of thinking? Who's driving your car while you're busy daydreaming? What goes on in your mind while you sleep? Can our thoughts really influence others, or create physical objects? Karen Shanor's *The Emerging Mind* answers these questions and more. Drawing on the contributions of Deepak Chopra, Karl Pribram, and others who participated in her acclaimed Smithsonian Institution lecture series, Dr. Shanor delves into such fascinating areas as hypnosis, the development of the "self", multiple personalities, and our many states of consciousness during sex, sports, or while watching television. Dr. Shanor can help us with some of the problems we face every day, including: --improving self-esteem --alleviating depression --creating the relationships we truly desire and deserve --overcoming addictions

to alcohol, drugs, or both --living a complete and fulfilling life The mind and body are linked in so many strange and powerful ways that a true understanding of one's own mind is difficult at best. The Emerging Mind offers the first step toward that understanding.

Denn Eifersucht ist genetisch und kulturell bestimmt und deshalb ein persönliches, ein gesellschaftliches und ein Beziehungsproblem. Die unterschiedlichen Umgangsweisen mit Untreue und Eifersucht in den verschiedensten menschlichen Kulturen und Gesellschaften berücksichtigend, zeigt der Autor, welche Möglichkeiten der Eifersuchtsbewältigung es gibt - aber auch, welche Grenzen sie hat. Angeführt und im einzelnen erörtert werden die konkreten Wege und Strategien, die es erlauben, Eifersucht auszuhalten, zu reduzieren oder sogar zu überwinden. Das Buch bietet somit das erforderliche Wissen, um den Umgang mit Untreue und Eifersucht zu verbessern."(...)
