Talking to the Girls Edvige Giunta 2022-03-22 "Candid and intimate accounts of the factory-worker tragedy that shaped American labor rights. On March 25, 1911, a fire broke out on the eighth floor of the Asch Building in Greenwich Village, New York. The top three floors housed the Triangle Waist Company, a factory where approximately 500 workers, mostly young immigrant women and girls, labored to produce fashionable cotton blouses, known as "waists." The fire killed 146 workers in a mere 15 minutes but pierced the perpetual conscience of citizens everywhere. The tragedy of the fire, and the resulting movements for change, were pivotal in shaping workers' rights and unions. This book is a collection of stories from writers, artists, activists, scholars, and family members of the Triangle workers. Nineteen contributors offer a collective testimony: a written memorial to the Triangle victims"--

The Virus, Vitamins and Vegetables Kerry Cullinan 2009 This collection of essays by some of South Africa's foremost HIV/AIDS writers, doctors and activists takes us down the rabbit hole of AIDS denialism. It is a lively reconstruction of one of the most bewildering events of post-apartheid South Africa, when the democratic government questioned the link between HIV and AIDS and disputed the efficacy of antiretroviral drugs. During this period, thousands of people died unnecessarily as their treatment became the subject of intellectual debate by politicians.

The Reconstruction of Palestinian Nationalism Helena Lindholm Schulz 1999 This text deals with the task of shedding light in the creation of Palestinian nationalism(s) and national identity. It will be of interest to students and specialists concerned with the politics of nationalism and the politics of identity.

Out of the Shadows Jo Fisher 1993 Since the early 1970s women across South America have been uniting to confront the brutality and repression of military rule. In *Out of the Shadows*, author Jo Fisher interviews women in Argentina, Chile, Uruguay and Paraguay to show how they have moved into the vacuum left by the military's destruction of the male-dominated left. Chapters describe how women have organised - in communal kitchens in Chile's shantytowns, as trade unionists in Uruguay, peace activists in Paraguay, mothers of the disappeared and self-help groups in Argentina, as grassroots feminists in Chile - ending the isolation of home life. While built around the traditional female concerns such as providing food and care for their families, the new women's movements have developed a grassroots feminism that is strikingly different from the middle class feminism of the city centres and have had a seismic impact on gender consciousness throughout the region.

Small Town in Modern Times David M. Rayside 1991-04-01 Rayside conducted informal interviews with more than 150 Glengarrians and attended numerous meetings of local councils, school boards, planning boards, and conservation authorities. This field research provides the basis for a detailed examination of the self-image of the town as a friendly, caring, united community, and of the unequal power relations that exist between different social classes, language groups, and men and women. Working-class life is disadvantaged in Alexandria much as it is in large cities, French-English relations are strained, and the experience of women has not been affected to any great extent by the challenges of feminism. Local government in Alexandria may be more accessible to the ordinary citizen than it is elsewhere but, as Rayside shows, the local council rarely engages in issues of genuine concern to residents, who themselves largely ignore municipal politics. Most local politicians seem inclined to avoid controversy and innovation, hoping to retain an environment favourable to business investment. Rayside examines the impact of the external world on a small community. He situates this impact and the resulting changes in historical context and reveals economic and social relationships that differ from what many of Alexandria's inhabitants believe to be the case. *A Small Town in Modern Times* will be of interest not only to students and scholars of political science, sociology, history, and Canadian studies but also to residents of Alexandria and any other small community in transition.

Women Winning Office Peggy Nash 2022-05-02 When Peggy Nash first decided to run for elected office, she had no idea where to start, who to contact, or what the rules were. For those who are underrepresented in political life, politics can seem like a secret society designed to shut them out. *Women Winning Office* is a practical handbook for activist women on how to open doors and take their place in the political process. Find out how to build a team, get nominated, inspire volunteers, and canvass voters. Nash draws on her experience in five federal campaigns, as well as the stories of many inspiring Canadian women who have run for office at all levels of government. Some succeeded; some did not. Some faced difficult and painful experiences. Every one of them would do it again. To make real progressive change, we need to change not only who gets elected in Canada, but how our democracy functions. If you want to find out how to take your desire for a better world into elected office, this book is for you.

The Problem with Men Richard Herring 2020-11-05 'The problem with *The Problem with Men* is that I do believe men will have less trouble with it than the title suggests as it is actually a glorious, funny book written by a glorious funny man' AISLING BEA 'Very moving, one of the few things I've consumed in 2020 that has left me with a sense of hope... but one thing wasn't made clear, when is International Men's Day?' JOHN ROBINS For the past decade, Richard Herring has been answering sexist trolls on International Women's Day when they ask 'when is International Men's Day?' in the mistaken belief there isn't one. If only the trolls had learned to use Google they would realise that there is an International Men's Day - it's on November 19th. In *The Problem with Men* Richard expands on his Twitter discussions and tackles some of the big questions surrounding the problems of toxic masculinity - for women, but also for men - including: - Should men fear feminism? - Is society sexist against men? - Could you win a point against Serena Williams? *spoiler* The answer to all of these is no. With Richard's signature humour and insight, *The Problem with Men* is a book for anyone striving for an equal society, all year round. 'This is a great book but I think the last thing it needs is a quote by yet another man' JAMES ACASTER

Speak Out! Brixton Black Women's Group 2023-10-10 "We came to Britain in search of better opportunities or to get some of the wealth which had been misappropriated from the Caribbean, but what in reality did we find?" *Speak Out* brings together the writings of Brixton Black Women's Group

for the first time, in a landmark collection. Established in response to the lack of interest in women's issues experienced in male-dominated Black organisations, the Brixton Black Women's Group's aim was to create a distinct space where women of African and Asian descent could meet to focus on political, social and cultural issues as they affected black women. BBWG published its own newsletter, *Speak Out*, which kept alive the debate about the relevance of feminism to black politics and provided a black women's perspective on immigration, housing, health and culture.

Victims of Time, Warriors for Change Evelyn A. Clark 2014-09-26 This book explores how women in the Chilean workforce and social activists describe and understand globalization and neoliberalism and their impact on their nation and the lives of Chilean women. By examining national policies, quantitative measures of development, and how various women in the labor force and political and community organizations perceive and live within the Chilean economy, Clark shows the dynamic relationship between national and international policies and gender inequality and women's empowerment. In addition to historic and contemporary data analysis on Chile's economic commitment to neoliberalism since the 1970s, Clark discusses how women have benefited in neoliberal Chile through wage labor and how that has impacted their relationships within the home and within their communities. In addition to working full-time, these women were committed to full-time activism to promote equality and provide a backlash against neoliberal economic policies. Overall, therefore, globalization and neoliberalism have had a profound impact on women in Chilean society. On the one hand, opportunities have been opened for many women, but, on the other, limitations and suffering have been imposed on just as many, if not more. An unfortunate consequence of these processes is that class differences among women have been exacerbated. In particular, most women have become Victims of Time. Still, many women remain Warriors for Change whose political and social activism provide hope for a better Chile.

Code Switching Claire Damken Brown 2009 Mars and Venus head to work... Day-to-day, face-to-face workplace communication between men and women is often dysfunctional because each gender employs different speech patterns. When careers and paychecks are on the line, clear communication is crucial - from the mailroom to the boardroom. Code Switching explains what to say, how to say it, how to be taken seriously, and how to act while speaking with the opposite sex for maximum effectiveness in the workplace. Included are: 'How men and women manage conversation, and the value of 'chitchat' prior to a meeting. 'How men use language to impart information and women use language to build or indicate relationship. 'How men use e-mail to emphasize control while women use it to share and build rapport. 'How women can use language to build their credibility. 'How humor is used as a power play, to build territory, or to exclude others. 'How gender talk creates and shapes work relationships.

Blood on the Page Lizzy Attree 2010-03-08 The fourteen interviews in this book form an unprecedented wealth of material on authors' responses to HIV/AIDS in South Africa and Zimbabwe. They comprise a valuable archive which documents and contextualises the variety of views and opinions of different authors on their often ground-breaking choices in writing about HIV/AIDS. Each author ranks among the first to publish fiction on HIV/AIDS in their respective countries. These interviews are of particular merit as these issues have not been discussed at length with any of the authors before. Collectively they offer a unique range of approaches and opinions in response to the HIV/AIDS pandemic in southern Africa. Their significance lies in their specific literary, as well as their broader social, cultural and political perspectives on a disease which continues to spread despite extensive NGO, medical and government intervention. In both South Africa and Zimbabwe, government responses have failed to address the urgent need for new political and economic solutions to the challenge of HIV infection. Responses among the population have varied from widespread silence, shame and fear to political activism and outspoken critiques of government inaction. Writers give voice to this silence and contextualise the disparate reactions amongst diverse peoples. Globally, AIDS killed approximately 2 million in 2008. In 1998, AIDS was the largest killer in southern Africa, nearly double the one million deaths from malaria and eight times the 209,000 deaths from tuberculosis. It has long been the case that of those dying globally of AIDS, the majority live in southern Africa. When the associated social and cultural implications of infection with HIV are considered, fictional representations contribute significantly to our understanding of the impact of HIV/AIDS on communities and individuals, and provide a much-needed basis for 'humanising' an epidemic which is unimaginable statistically. It has been said that the feelings and reactions that HIV/AIDS inspires are often 'too unreal for words,' and it is this very notion, that certain diseases are taboo, unmentionable, and hardly even named as such, that makes verbalisation of this epidemic a modern imperative.

Women on War Daniela Gioseffi 2003 An international anthology of women's writings from antiquity to the present.

Lean In Sheryl Sandberg 2013-03-12 Sheryl Sandberg's *Lean In* is a massive cultural phenomenon and its title has become an instant catchphrase for empowering women. The book soared to the top of bestseller lists internationally, igniting global conversations about women and ambition. Sandberg packed theatres, dominated opinion pages, appeared on every major television show and on the cover of *Time* magazine, and sparked ferocious debate about women and leadership. Ask most women whether they have the right to equality at work and the answer will be a resounding yes, but ask the same women whether they'd feel confident asking for a raise, a promotion, or equal pay, and some reticence creeps in. The statistics, although an improvement on previous decades, are certainly not in women's favour - of 197 heads of state, only twenty-two are women. Women hold just 20 percent of seats in parliaments globally, and in the world of big business, a meagre eighteen of the Fortune 500 CEOs are women. In *Lean In*, Sheryl Sandberg - Facebook COO and one of *Fortune* magazine's Most Powerful Women in Business - draws on her own experience of working in some of the world's most successful businesses and looks at what women can do to help themselves, and make the small changes in their life that can effect change on a more universal scale.

Developing a Gender Policy in Secondary Schools Jean Rudduck 1994 The book opens with extracts from conversations with individuals, both women and men, who talk about the origin of their commitment to working for equality. This is followed by the stories of a number of 'gender leaders' - the people whose vision and commitment helped to launch work on gender in their schools. The stories recall the periods of frustration, the critical incidents, the excitement of progress.

Digital, Diverse & Divided David Livermore 2022-09-06 In a world of increasing polarization, *Digital, Diverse & Divided* shows us how to use cultural intelligence to bridge our divides and authentically connect with those around us. The divides between us seem to keep growing no matter the issue-politics, race relations, religion, and the list goes on. Tackling polarization isn't easy, but this book gives us tools to bridge our divides without forcing everyone to conform to the same thinking and behavior. Cultural intelligence, a scientific model originally designed for working with people from different cultures, is ideally suited to bridge our polarizing differences. In *Digital, Diverse & Divided*, David Livermore, the leading expert on cultural intelligence, teaches us how to use the method he has taught global executives and foreign diplomats to navigate difficult conversations with anyone. Livermore uses his renowned work in cultural intelligence to address everyday challenges such as these: How should I respond to a racist comment? What should I do when someone is completely closed to a different perspective? How can I persuade polarized groups to move beyond agree to disagree? How do I handle the emotional fatigue that comes with polarizing conversations and relationships? *Digital, Diverse & Divided* combines groundbreaking research, riveting stories, and practical strategies that are proven to build a more culturally intelligent world for all of us.

Writing Women Sonia Randhawa 2022-07-21 This book examines how women journalists in Malaysia negotiated male power structures, in particular structures determined by the keystone party of the ruling coalition, the United Malays National Organisation. Through both oral histories and content analysis, it looks at how women journalists in the women's pages of the newspapers found spaces to advocate for their readers. It is thus the first work to look at the importance of the women's pages in the Malay-language newspapers, and how apparently monolithic institutions of the authoritarian state hid diverse contests for resources and prestige. In this contest, the concept of news values, the perception of the reader and the ways in which women constructed themselves as journalists all come into play, and are examined here. The book contributes to the field of feminist media studies by examining how gendered newsroom practices paradoxically allowed women journalists in the women's pages more editorial freedom than those in the malestream press.
