Opportunity in Crisis - 2011

Today, around the world, there are 5 million young men and women living with HIV. *Opportunity in Crisis: Preventing HIV from early adolescence to young adulthood* examines the state of the HIV epidemic among young people, highlighting the challenges they face and presenting solutions informed by evidence of what works with different age groups and in different epidemic settings. The report outlines key steps towards building a continuum of HIV prevention that can help keep children HIV-free as they develop into young adults.

In Her Lifetime - Institute of Medicine 1996-03-06

The relative lack of information on determinants of disease, disability, and death at major stages of a woman's lifespan and the excess morbidity and premature mortality that this engenders has important adverse social and economic ramifications, not only for Sub-Saharan Africa, but also for other regions of the world as well. Women bear much of the weight of world production in both traditional and modern industries. In Sub-Saharan Africa, for example, women contribute approximately 60 to 80 percent of agricultural labor. Worldwide, it is estimated that women are the sole supporters in 18 to 30 percent of all families, and that their financial contribution in the remainder of families is substantial and often crucial. This book provides a solid documentary base that can be used to develop an agenda to guide research and health policy formulation on female health—both for Sub-Saharan Africa and for other regions of the developing world. This book could also help facilitate ongoing, collaboration between African researchers on women's health and their U.S. colleagues. Chapters cover such topics as demographics, nutritional status, obstetric morbidity and mortality, mental health problems, and sexually transmitted diseases, including HIV.

INSPIRE Handbook - World Health Organization 2019-02-26

INSPIRE is a resource to help governments, international agencies, and non-government organisations prevent and respond to violence against children. It was developed by 10 international and U.S.-based agencies and includes strategy documents and implementation tools. This handbook provides guidance on how to choose and implement interventions based on specific needs and context, and is organised around the 7 key INSPIRE strategies: implementation and enforcement of laws; norms and values; safe environments; parent and caregiver support; income and economic strengthening; response and support services; and education and life skills. The handbook also provides an overview of implementation and impact indicators, drawn from the companion document 'INSPIRE indicator guidance and results framework'.

Family and Community Interventions for Children Affected by AIDS - Linda M. Richter 2004

This report forms part of a project funded by the W. K. Kellogg Foundation to implement a strategy for the care of orphans and vulnerable children in Botswana, South Africa, and Zimbabwe with a review of the available scientific information on interventions aimed at children, families, households, and communities.

Emerging evidence, lessons and practice in comprehensive sexuality education - UNESCO 2015-12-21

International technical guidance on sexuality education - UNESCO 2018-01-15

Disease Control Priorities, Third Edition (Volume 6) - King K. Holmes 2017-11-06

Infectious diseases are the leading cause of death globally, particularly

among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. *Major Infectious Diseases* identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

World Drug Report 2018 (Set of 5 Booklets) - United Nations Publications 2018-07-30

The 2018 World Drug Report will include an updated overview of recent trends on production, trafficking and consumption of key illicit drugs as well as highlighting a thematic area of concern. The Report contains a global overview of the baseline data and estimates on drug demand and supply and it provides the reference point of information on the drug situation worldwide. The thematic focus of the 2018 Report will present information and issues related to drugs and women, youth and older people.

Methodological Challenges in Biomedical HIV Prevention Trials - Institute of Medicine 2008-05-13

The number of people infected with HIV or living with AIDS is increasing at unprecedented rates as various scientists, organizations, and institutions search for innovative solutions to combating and preventing the disease. At the request of the Bill & Melinda Gates Foundation, *Methodological Challenges in Biomedical HIV Prevention Trials* addresses methodological challenges in late-stage nonvaccine biomedical HIV prevention trials with a specific focus on microbicide and pre-exposure prophylaxis trials. This book recommends a number of ways to improve the design, monitoring, and analysis of late-stage clinical trials that evaluate nonvaccine biomedical interventions. The objectives include identifying a beneficial method of intervention, enhancing quantification of the impact, properly assessing the effects of using such an intervention, and reducing biases that can lead to false positive trial results. According to *Methodological Challenges in Biomedical HIV Prevention Trials*, the need to identify a range of effective, practical, and affordable preventive strategies is critical. Although a large number of promising new HIV prevention strategies and products are currently being tested in late-stage clinical trials, these trials face a myriad of methodological challenges that slow the pace of research and limit the ability to identify and fully evaluate effective biomedical interventions.

Preventing and Mitigating AIDS in Sub-Saharan Africa - National Research Council 1996-03-28

The AIDS epidemic in Sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda

Desk Study On Sexual Behaviour And Reproductive Health Of Children And Young People In Zimbabwe Awareness Versus Behaviour Change Hiv Infection And Child Sexual Abuse The Role Of Stigma And Discrimination In Increasing The Vulnerability Of Children with far-reaching implications. This book details the current state of the community-based work, and VCT (voluntary counseling and testing)

AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

Monitoring the Declaration of Commitment on HIV/AIDS - Joint United Nations Programme on HIV/AIDS. 2005

On cover and title page: United Nations General Assembly Special Session on HIV/AIDS

HIV/AIDS in South Africa 25 Years On - Poul Rohleder 2009-09-01

Much has happened since the first appearance of AIDS in 1981: it has been identified, studied, and occasionally denied. The virus has shifted host populations and spread globally. Medicine, the social sciences, and world governments have joined forces to combat and prevent the disease. And South Africa has emerged as ground zero for the pandemic. The editors of *HIV/AIDS in South Africa 25 Years On* present the South African crisis as a template for addressing the myriad issues surrounding the epidemic worldwide, as the book brings together a widely scattered body of literature, analyzes psychosocial and sexual aspects contributing to HIV transmission and prevention, and delves into complex intersections of race, gender, class, and politics. Including largely overlooked populations and issues (e.g., prisoners, persons with disabilities, stigma), as well as challenges shaping future research and policy, the contributors approach their topics with rare depth, meticulous research, carefully drawn conclusions, and profound compassion. Among the topics covered: The relationship between HIV and poverty, starting from the question, "Which is the determinant and which is the consequence?" Epidemiology of HIV among women and men: concepts of femininity and masculinity, and gender inequities as they affect HIV risk; gender-specific prevention and intervention strategies. The impact of AIDS on infants and young children: risk and protective factors; care of children by HIV-positive mothers; HIV-infected children. Current prevention and treatment projects, including local-level responses,

programs. New directions: promoting circumcision, vaccine trials, "positive prevention." South Africa's history of AIDS denialism. The urgent lessons in this book apply both globally and locally, making *HIV/AIDS in South Africa 25 Years On* uniquely instructive and useful for professionals working in HIV/AIDS and global public health.

Disease Control Priorities in Developing Countries - Dean T. Jamison 2006-04-02

Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

Reaching Out to Africa's Orphans - K. Subbarao 2004-01-01

This title makes a substantial contribution to our understanding of the many risks and vulnerability faced by orphans and the ameliorating role played by the actions of governments and donors.

Historical Perspectives on the State of Health and Health Systems in Africa, Volume II - Mario J. Azevedo 2017-01-24

This book focuses on Africa's challenges, achievements, and failures over the past several centuries using an interdisciplinary approach that combines theory and fact and evidence-based practices and interventions in public health, and argues that most of the health problems in Africa are not a result of scarce or lack of resources, but of the misconceived and misplaced priorities that have left the continent behind every other on the globe in terms of health, education, and equitable distribution of opportunities and access to (quality) health as agreed by the United Nations member states at Alma-Ata in 1978.
