Couples, Gender, and Power - Carmen Knudson-Martin, PhD
2009-02-16

"[A] comprehensive, critical, empirical, and practical compilation of investigations about how diverse couples are trying to implement change and pursue equality in their relationships." -Katherine R. Allen, PhD Virginia Polytechnic Institute & State University "[A] true gift to couple research. The studies reported in this marvelously disciplined collection hold living implications for couples and their therapists." -Evan Imber-Black Director, Center for Families and Health, Ackerman Institute for the Family While numerous couples strive for equality in their relationships, many are unaware of the insidious ways in which gender and power still affect them—from their career choices to communication patterns, child-rearing, housework, and more. Written for mental health professionals and others interested in contemporary couple relationships, this research-based book shows how couples are able to move beyond the dangers of gendered inequality and the legacy of hidden male power. The book analyzes the relationships of couples from various racial, ethnic, and socioeconomic backgrounds. The contributors present innovative clinical interventions, and suggest strategies therapists can use to help couples transform their relationships from being gender-based to equality-based. Explores these key issues: The risks of being in a relationship ruled by "gender legacy" behavior The differences between couples who get caught in gender legacy patterns and those who do not Gender-based patterns across the life cycle, including newly formed couples; early marriage; child-rearing; mothering and fathering Gendered power in couples dealing with illness; ethnic and racial differences; immigration and displacement issues

Managing Without Power - R Meredith Belbin 2012-08-06

Meredith Belbin, best known for his work on teams, now considers the way in which continuing evolution has produced distinct patterns of behaviour for men and women. Examination of the key stages in the history of homo sapiens reveals * how very early human society was regulated not through power but by organic balance, so allowing women to play a vital role in the community * why women lost their hold over men as more populous and structured societies became dominated by aggressive warriors seeking territorial expansion * how natural selection within competing empires favoured the survival of able professionals and compliant slaves, so diversifying the behavioural roles to which humans were genetically disposed * how, in the present era, power has lost its biological utility as human evolution slowed, and technological evolution favoured the emancipation of women with its premium on communication skills * how in this changing scenario, as women have recovered their status and influence, social progress has brought in its wake a new set of cross-gender problems. Penetrating, original and provocative this book offers suggestions on how men and women can come to terms with their genetic heritage, so restoring much needed balance to business organizations and to the community at large.

Gigolos and Madames Bountiful - Adie Nelson 1994

This unique study of love, sex, gender, intimacy, and power offers a radical new view of the dynamics that inform all intimate partnerships.

Being Married, Doing Gender - Caroline Dryden 2014-02-25

In one of the first psychological studies of women in heterosexual relationships, Caroline Dryden examines the social context of their experiences and emotional struggles. Unlike the developmental literature in which women are studied only as mothers, or the clinical literature which has little theoretical basis, *Being Married, Doing Gender* places

case study material in the context of the power balance between women and men. Caroline Dryden finds that there are contradictions between stereotypical gender roles and the maintenance of an equal partnership that can cause problems for both women and men. *Being Married, Doing Gender* will be valuable to students studying psychology or gender and women's studies and to marriage guidance counsellors and psychotherapists.

Sexuality, Gender and Power - Anna G. Jónasdóttir 2010-12-14

"Including studies of the sexual self and sexual subjectivities, socio-political processes of normativization, and social structures of sexuality and gender in national and transnational contexts, this book offers a view of sexuality as a broad and complex dimension of historically changing social-cultural and human-material reality"--EBL.

Rethinking Misogyny - Anna Arrowsmith 2016-03-03

In this path-breaking book Anna Arrowsmith analyses gendered dating behaviour and shows how men's behaviour is both defined and illustrated by societal norms that require a particular masculine performance, including those desired by potential female performers. Using the case-study of pick-up artistry which is compared to interviews with other men who date women, this book analyses how the men deal with conflicting ideas borne out of living in an age when both hegemonic (harder, historic) and inclusive (softer, modern) masculinities co-exist. It asks whether men acknowledge their own insecurities or whether they focus on perceived external triggers, such as female culpability as a means of ignoring their own concerns, or, whether men respond to insecurities by focusing on an active process of overcoming them. Through exploring male experiences of female beauty, emotions, fertility, strength, female violence and sexual assault, Arrowsmith's findings encourage a new path of enquiry in gender studies which explores and includes men's words as central to interpreting their behaviour and how it is understood. This book has political worth as it differentiates and delineates between emotive and often misogynistic demands for an entire rethink of the gender order by some men's rights activists and a genuine need to incorporate male insecurities and psychological experiences in how we understand gender to be structured and performed, as a means to increase equality.

The Gender of Power - Kathy Davis 1991-11-04

Drawing on feminist theories of women's oppression and on social theories of power, this book offers original analyses of the relationship between gender and power. *The Gender of Power* presents a critique of feminist theories of power as simply top-down models of the oppression of women. The authors argue that this notion presents women as passive victims and ignores the diversity and complexity of women's experiences. The ideas on power of Bourdieu, Giddens, Lukes and Foucault are also evaluated in terms of their usefulness in explaining relations between men and women, which can often be covert, consensual and intimate.

Sport, Gender and Power - Dr Simone Fullagar 2014-11-28

As a new breed of lifestyle sport enthusiasts 'derby grrrls' are pushing the boundaries of gender as they negotiate the nexus of pleasure, pain and power relations. Offering a socio-cultural analysis of the rise and reinvention of roller derby as both a new, globalized women's sport and an everyday creative leisure space, this book explores the manner in which roller derby has emerged as a gendered space for self-transformation, belonging and embodied contest, in which women are invited to experience their emotions differently, embrace pain and overcome limits. *Sport, Gender and Power: The Rise of Roller Derby* presents detailed interview, ethnographic and autoethnographic material, together with a range of media texts to shed new light on the complex relationships of power experienced by women in derby as a sport culture, whilst also examining the darker relationships that characterise the sport, including those of inclusion and exclusion, difference and identity, and competition and participation. A contemporary feminist study of empowerment, sexual difference, gender and affect, this book will appeal to scholars of gender and sexuality, embodiment, feminist thought and the sociology of sport and leisure. *Gender, Power, and Communication in Human Relationships* - Pamela J. Kalbfleisch 1995

This edited volume establishes a state-of-the-art perspective on theory and research on gender, power, and communication in human

relationships. Both theoretical essays and review chapters address issues relevant to female and male differences in power, dominance, communication, equality, and expectations/beliefs. All chapter contributors share two commonalities. First, each provides a 1990s assessment of power and equality in female and male relationships. Second, each reviews respective programs of research and focuses attention on the relevance of this research to understanding the relationships of women and men. Unique because it incorporates a multidisciplinary approach to the study of gender and the communication of power in human relationships, this book includes the original work of intellectuals with national and international reputations in the social sciences. The volume provides both scholastic breadth and centralized treatment of issues that form the very foundation of social and personal relationships. It will appeal to scholars working in the disciplines of communication and psychology as well as other areas of social science research.

Gender Identity and Research Relationships - Michael R. M Ward
2016-05-20

In recent years researchers have begun to reflect on gender identity and how this impacts on the creation of successful qualitative research. In this volume contributors explore these issues by reflecting on their own studies and research careers and address how important or unimportant gender has been in building research relationships.

Gender, Power and Identity in the Early Modern House of Orange-Nassau - Susan Broomhall 2016-08-12

How do gender and power relationships affect the expression of family, House and dynastic identities? The present study explores this question using a case study of the House of Orange-Nassau, whose extensive visual, material and archival sources from both male and female members enable the authors to trace their complex attempts to express, gain and maintain power: in texts, material culture, and spaces, as well as rituals, acts and practices. The book adopts several innovative approaches to the history of the Orange-Nassau family, and to familial and dynastic studies generally. Firstly, the authors analyse in detail a vast body of previously unexplored sources, including correspondence, artwork, architectural, horticultural and textual commissions, ceremonies, practices and individual actions that have, surprisingly, received little attention to date individually, and consider these as the collective practices of a key early modern dynastic family. They investigate new avenues about the meanings and practices of family and dynasty in the early modern period, extending current research that focuses on dominant men to ask how women and subordinate men understood 'family' and 'dynasty', in what respects such notions were shared among members, and how it might have been fractured and fashioned by individual experiences. Adopting a transnational approach to the Nassau family, the authors explore the family's self-presentation across a range of languages, cultures and historiographical traditions, situating their representation of themselves as an influential House within an international context and offering a new vision of power as a gendered concept.

Gender, Power, and Violence - Angela J. Hattery, PHD, Professor, Women and Gender Studies, George Mason University, Author: Policing Black Bodies: How Black Lives Are Surveilled and How to Work for Change 2019-02-06

In the era of #metoo, Gender, Power and Violence provides a better understanding about the ways in which institutional structures shape, or have mishandled, gender based violence.

Feminism and the Power of Love - Adriana García-Andrade
2018-04-17

The power of love has become a renewed matter of feminist and non-feminist attention in the 21st century's theory debates. What is this power? Is it a form of domination? Or is it a liberating force in our contemporary societies? Within *Feminism and the Power of Love* lies the central argument that, although love is a crucial site of gendered power asymmetries, it is also a vital source of human empowerment that we cannot live without. Instead of emphasizing "either-or", this enlightening title puts the dualities and contradictions of love center stage. Indeed, by offering various theoretical perspectives on what makes love such a central value and motivator for people, this title will increase one's understanding as to why love can keep people in its grip - even when practiced in ways that deplete and oppress. In light of such analyses, the contributions within *Feminism and the Power of Love* present new perspectives on the conditions and characteristics of non-oppressive, mutually enhancing ways of loving. Bridging the gap between Feminist Affect Studies and Feminist Love Studies, this book will appeal to undergraduate and postgraduate students, including postdoctoral researchers, interested in fields such as women's and gender studies, sociology, political science, philosophy, cultural studies and sexuality studies.

Gender, Power and Relationships - Charlotte Burck 2006-11-22

Gender, Power and Relationships is a follow-up volume to *Gender and Power in Families* (Routledge 1989) which marked a milestone in the application of feminist thinking to therapeutic work with families, bringing new ideas to students, trainers and professionals. Contributions from leading practitioners demonstrate how feminist ideas have been taken up by therapists in a variety of different settings. The chapters explore and extend previous debates on sexual and physical abuse and ethnicity, addressing the many contradictions and dilemmas inherent in this work for feminist systemic approaches. They also consider changing family structures and the role of men within them, gendered aspects of HIV prevention, and work with women drug addicts, and a variety of other approaches each set in the context of an overview of feminist theories of the family.

Power/Gender - H. Lorraine Radtke 1994-01-01

This book investigates the complex strands that inextricably link gender and power relations, demonstrating how gender is constructed through the practices of power. The contributors argue that female' and male' are shaped not only at the micro-level of everyday social interaction but also at the macro-level where social institutions control and regulate the practice of gender. *Power/Gender* explores: how theorizing on power is affected when gender is taken into account; post-Foucauldian theory of gender and power; whether it is possible to separate gender and power; the connections between gender and the practice of power in political contexts, and how these connections work in the specific contexts of women's lives; and whether the construction of sex or gender is an expression of power relations.

Communicating Power and Gender - Deborah Borisoff 2011-03-30

As a perceptive and outstanding assessment, *Communicating Power and Gender* examines the relationships between gender and power and how they are linked to and transformed by the communication process. Within this discussion a host of correlations emerge, crossing social, cultural, historical, political, and racial spheres. In order to anchor their discussion Borisoff and Chesebro define the terms gender, power, and communication, which provides an operational platform from which to view fundamental issues such as the effects of stereotyping and verbal and nonverbal communication by gender. The authors also consider four contexts that shape and influence gender socialization and sex-role constructions: mediated communication and gender roles in various media systems, early socialization in the home, the educational landscape, and women and men in the workplace. Our environment continually generates new kinds of questions and associations. The more we interact with others the more we realize that our relationships are not fixed they exist in a state of flux. *Communicating Power and Gender*

explores not only how gender-based issues affect us daily, but also how gender-based communication can be more sensitively, usefully, and effectively employed.
