enigmatic creatures. This engagingly illustrated book takes the same cat's-eye view of the world that infuses the Discovery Channel television series Wild Discovery. It emphasizes the untamed roots of almost every aspect of a domesticated cat's conduct: the crouch-and-pounce string-chase games that mirror stalking prey in the wild, the furniture-scratching preoccupation that echoes the territorial scent deposits a wild cat claws onto trees. Written in an accessible, authoritative style, Wild Discovery Guide to Your Cat generously mixes the fundamentals of basic care with compelling explorations into cats' physical and psychological traits. Included in this comprehensive primer are detailed insights into all aspects of cat design, from the intricate structure of the feline form to the cat's heightened senses and remarkable agility. The guide explores why cats do the things they do—addressing such issues as grooming, sleep patterns, marking and defending territory, cat language, and learning and intelligence. In addition to probing the tiger within, Wild Discovery Guide to Your Cat offers a host of practical tips on choosing a cat to suit your lifestyle, providing responsible care, cat-proofing your home, and ensuring a smooth transition during the first days at home. Once the cat is a member of the family, the book explains how to bond and play with your new pet, and even how to train and travel with it. Everything you need to know to keep your cat healthy and happy is covered, including the latest information on feeding and nutrition, litter boxes, cleaning and grooming, common health problems, fighting fleas, pregnancy and birth, caring for an aging cat, vet visits, and emergency care. A breed breviary rounds out the book, with the spotlight on the top cat breeds as well as other common feline pedigrees. This section also presents information on body type, common colors, coat type, grooming requirements, and temperament. An informative cat owner's resource guide follows. Accompanied by more than 225 full-color illustrations and photographs showing the similarities between domestic and wild cats, this is an entertaining and

**Friends, Patriots, and Scoundrels** Elvin C. Bell 2014-12-08 Senator Robert F. "Bobby" Kennedy had just lost the 1968 presidential primary election in Oregon to Senator Eugene McCarthy when Elvin Bell, Fresno, California's Mayor Pro Tem, hosted him for a breakfast meeting. As an exhausted Kennedy approached the podium to speak, Bell watched in amazement as Kennedy transformed from a frail man into a powerful speaker. Moments later as Bell rose to his feet with other audience members in a rousing standing ovation, he had no idea that he would never see his friend Bobby again. Bobby was shot the next day in Los Angeles and died within hours. Bell, a retired public official and USAF colonel, shares a compelling compilation of anecdotes that highlight the iconic personalities he has known and worked with during his assignments in the White House and the Pentagon, as well as during official foreign travels and various activities throughout America. In addition to the everyday characters and scoundrels he has encountered in his lifetime, he features nearly eighty personalities that include Gregory Peck, John Wayne, John Lennon, Eleanor Roosevelt, General Alexander Haig, Frank Sinatra, and Presidents John F. Kennedy, Lyndon B. Johnson, Richard Nixon, and Ronald Reagan. In this fascinating memoir, a former political figure takes a look back at the true-life characters he has encountered and how they made a difference in his life and the world.

## **Mo>b> - A Personal Journey Through Life's Little Problems**

**Four Kittens in the Bathroom** DL Sevic 2019-08-23 Four Kittens in the Bathroom is a story about a feral cat that came to our backyard for a free meal and stayed to have three litters of kittens. The little calico cat, we named Mama, proved to be a great mother, very loving and caring. Her first litter had three kittens that spent the nights in our neighbor's garage, and during the day, they came into our yard to eat and play. We enjoyed the many hours that summer watching them run and play. Mama and her kittens were still feral cats, and we could not get closer than ten feet, and they would run away. When Mama had a second litter, we realized we had never given any thought about having more kittens to deal with. There was only one kitten in this litter, but it made us aware of the possibilities. We did not know the gender of any of Mama's kittens, and if they were all females, things could multiply fast. It did not take long before our fears were realized.

After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

As a pet owner, animal lover and director of a humane organization that deals with stray cats every day, this book gives us one more tool to offer to people who want to help the thousands of strays that wander our streets. Bravo!" Joseph J. Sprague, Jr., Executive Director, Tree House Animal Foundation "Tamara Kreuz cares about the plight of stray and feral cats and gives practical ways to help them. Individuals and shelters can benefit from this book. If those who find stray animals can themselves set about to help by finding homes for domestic strays, or by creating safe havens for feral cats, this will make life a lot easier for shelter personnel, who are all too often overburdened by the number of animals they receive. We highly recommend *The Stray Cat Handbook*." Although cats are often misunderstood as natural loners, Johnson-Bennett shows how to plan, set up, and maintain a home environment that will help multiple cats—and their owners—live in peace. *Cat vs. Cat* will help readers understand the importance of territory, the specialized communication cats use to establish relationships and hierarchies, and how to interpret the so-called “bad behavior” that leads so many owners to needless frustration. Offering a wealth of information on how to diffuse tension, prevent squabbles and ambushes, blend two families, or help the elder kitty in your family, *Cat vs. Cat* is a welcome resource for both seasoned and prospective guardians of cat families large and small.

In *Animalkind*, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish “sing” underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. *Cat Wars* Peter P. Marra 2016-09-20 Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic *Toxoplasma* passing from cats to humans at rising rates. *Cat Wars* tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes how a small but vocal minority of cat advocates has campaigned successfully for no action
