**Unshaved** Breanne Fahs 2022 Body hair, especially on women, provokes, disrupts, and, at times, offends. It is tangled up with culture itself?in art, families, workplaces, relationships, sex, the beauty industry, governments, and capitalism. From Chinese activists challenging the Communist Party, to students in Arizona rejecting their family and workplace ideas about grooming, to high-art feminist photographers boldly featuring hairy women, Fahs deftly explores the volatile and ever-changing landscape of women?s body hair politics. She showcases an underground movement of artists, zine-makers, rebels, and activists who have used women?s visible body hair as a declaration of freedom from patriarchal norms. Fahs presents body hair not just as a personal grooming choice but as a connection to broader cultural stories about women?s reproductive rights, feminist battlegrounds about autonomy, neoliberal intrusions into beauty regimens, and even global tensions around women?s place in society. Ultimately, *Unshaved* shows the collision between the mundane and the extraordinary, the everyday and the revolutionary.

**Global Guidelines for the Prevention of Surgical Site Infection** World Health Organization 2017-01-27 Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

**Hair Tells a Story** Margo Maine 2023-01-16 The body is the canvas upon which women paint their secrets, their hopes and dreams, pain and disappointments. Hair has long played a role in the struggles for power, self-determination and autonomy--serving as a nonverbal language that represents women's lives. However, pain, anxiety, racism, sexism and rigid beauty standards can too often underlie these stories. Modern events like the Black Lives Matter movement and the COVID-19 pandemic have exposed societal barriers that prevent the free and equitable expression of hair. Although countless books and articles address body image, the personal psychology and the meaning of hair have been missing. This work empowers women to understand complex hair-head-heart connections, and pressures. Above all, the text emphasizes that hair is never just hair.

**Mrs. Paddington and the Silver Mousetraps** Gail Skroback Hennessey 2020-01-01 History is full of fascinating stories of colorful characters, but some of the most interesting parts of history are really odd. You have probably seen scenes of government officials with their powdered white wigs, but in 1700s England and high-society in the American colonies, women created towering hairstyles. Decorations such as ships and flowers were sometimes added to their hairdos, especially if attending a big party. Taking hours to create, women used beef tallow and sugar-water to keep their hairdos in place. This fictional account explains a very real fashion trend and the problems it created for women trying to look stylish!

**Matting of Hair Among Women in Southwestern India** Govind Dhaske 2018-07-24 The Matting of hair is an age-old health and human rights problems in southwestern India that qualifies as a harmful cultural practice. When a female of any age shows the emergence of matted hair, the family, and community tags it as a deific phenomenon. The religious-based coloring prohibits the removal of matted hair and leads to either secretly done devadasi dedication or ritual obligation for the whole life. The underlying health and human rights violations due to the matting of hair have remained implicit and underreported due to the deification of matted hair as a religious-based symbol. Across the globe, there are distinct cultural interpretations of the matting of hair. One of the most oppressive cultural practices the devadasi custom carries matted hair as its integral religious based symbol. There have been many devadasi dedications due to matted hair. Due to its religious-based coloring and superstitious beliefs, the health and mental health as well as development related problems of affected women and their families have not been visible. While devadasi custom has been legally banned, some of its major sub-practices such as the matting of hair as still seen. In this book, a review of the global literature has been presented to outline the historic status of the problem of matting of hair, allied beliefs and superstitions, and the treatment options that are being followed. This book is a primer of the problem of matting of hair in southwestern India, Karnataka and Maharashtra. Relied on a comprehensive case study, ethnography, and phenomenological research on the matting of hair, this book is useful for gender and cultural researchers, anthropologists, health and human rights researchers and activists, medical practitioners and students, nonprofit and CSR professionals, academicians, gender researchers and activists, students of religion studies, women's health advocates, career bureaucrats, elected representatives,
