**Get A Life** - Rosie Bray 2015-07-02

Richard and Rosie started trying to conceive after five years of being together but, two and a half years and countless prenatal vitamins and ovulation kits later, there hadn't been even a phantom pregnancy. So began their adventure into IVF, via blood tests, sperm tests, injections and probes, becoming involuntary experts on embryology through failure, despair, persistence and success. After 4 years, 3 different clinics, 2 positive pregnancy tests and 1 miscarriage, they finally had a successful pregnancy. GET A LIFE is the perfect down-to-earth guide for anyone thinking of embarking on fertility treatment. It's two books in one, a book of advice for women and a survival guide for men, each chapter mirrored but with very different experience and advice. IVF is terrifying, awful and extraordinary in equal measures for both partners. GET A LIFE shares Richard and Rosie's ride on the fertility roller coaster, bringing you the funny, emotional and physical sides of IVF. It is an

invaluable guide from both perspectives on how to get through the process in one piece.

**Infertility and Intimacy in an Online Community** - Paulina Billett 2018-09-29

This book explores an online support group for women who are infertile. Offering a close-up view of the women's identities and emotions as they navigate the "roller-coaster" world of infertility, a range of questions are addressed: How do the women seek support? How do they offer support to one another? How are intimacies produced in the online space? Through narrative analysis of online journals and posts, the authors examine the impact of infertility on women's perceptions of their bodies, their struggles with medical professionals, on their relationships with family and friends, and the challenges that a diagnosis of infertility presents to couples. *Infertility and Intimacy in an Online Community* will appeal to social scientists, students from a range of health science disciplines, counsellors and health professionals, and women and men who are dealing with infertility.

**Big Fat Negative** - Emma Haslett 2022-01-20

'This book is totally brilliant - informative, sensitive, funny and wise. Reading it is like talking to a fairy godmother who also happens to be a gynaecologist and expert on all things fertility' Sophia Money-Coutts *Big Fat Negative (BFN)* - a term commonly used on internet forums to refer to a negative pregnancy test. Infertility can be a lonely journey. One in every six couples will struggle to conceive but, despite this, many don't feel comfortable talking openly about their experiences and sharing what they are going through. As a result, they feel isolated and alone. It doesn't have to be this way. By talking, laughing and shouting about our experiences we can start to lift the cloak of shame that so often engulfs those going through it. *Big Fat Negative* does just that. This no-nonsense, honest guide to infertility from the hosts of the *Big Fat Negative* podcast smashes the taboo around this isolating and heartbreaking illness, offering first-hand experience, an understanding voice when friends don't get it, expert advice, reassurance for when you feel alone and - most importantly - humour when it you need it the most.

Using first-hand accounts of the various hurdles of infertility, from work to diagnoses and IVF, coupled with advice from leading experts, Big Fat Negative will hold your hand on the not-so simple journey to motherhood - helping you to face and defeat the trials of trying for a baby.

**The Pursuit of Motherhood** - Jessica Hepburn 2014-02-01

If you've ever felt a crumpling in your chest when another friend tells you they're pregnant... If you've ever wondered why everyone else seems to find it so easy... If you've ever experienced The Pursuit of Motherhood... This book is for you. "I was 34 and running a London theatre when I decided to start a family. I thought that making the decision to fit a baby into my busy life was the hard part. I was wrong." After a year of having sex to schedule, Jessica and her partner were diagnosed with "unexplained infertility", and soon discovered they were not alone. Infertility is a silent epidemic of the modern world. It is currently estimated that one in five couples in the UK have difficulty conceiving and that over 50,000 women a year undergo IVF. Some of them will achieve the miracle baby they are hoping for. Many will not. All of them face a barrage of intrusive tests and treatment, exhilarating highs and devastating lows. The Pursuit of Motherhood takes the reader on a seven year journey, as Jessica makes her way through various different clinics and multiple rounds of IVF. During this time she also goes to many alternative and sometimes absurd lengths to understand her infertility, from visiting a psychic tarot card reader to attending an intense therapeutic process to discover whether her "inner child" has anything to do with it. She also faces the heartbreak of several miscarriages and a life-threatening ectopic pregnancy. Throughout her journey, Jessica records her day-to-day thoughts and feelings in blog-style entries called The Infertility Diaries, detailing everything from the effect that it starts to have on her friendships, to hearing for the first time that Beyoncé is about to have a baby. And gradually, over time, her attempt to create a life became in itself life-enhancing. This inspirational read will resonate with a wide range of women, offering them solace and the advice of someone who is their contemporary as well as a veteran of the fertility world. Think Eat Pray Love and Bridget Jones' Diary for the

infertile generation.

The Fertility Plan - Jill Blakeway 2009-08-06

Infertility medicine today is all about aggressive surgical, chemical and technological intervention. But making babies originally was - and is still best as - a natural process. In the UK it is estimated that approximately 1 in every 7 couples have difficulty conceiving and 1 in 80 babies is born as a result of IVF treatment. While 75% of people seeking help with their fertility try alternative treatment, few doctors are aware of how the disciplines of Western and Eastern fertility treatment can be used together to achieve the best results. This is a unique collaboration that combines the best of Dr David's and Jill Blakeway's expertise. In THE FERTILITY PLAN they show that half of women who use IVF could have got pregnant without it if the right knowledge and advice were available to them, and they share their proven 3-month plan that increases women's chances of conceiving naturally.
