The Semiotics of Discourse - Jacques Fontanille 2006

Original Scholarly Monograph

Hypercapitalism - Phil Graham 2006

Every day trillions of dollars circulate the globe in a digital data space and new forms of property and ownership emerge. Massive corporate entities with a global reach are formed and disappear with breathtaking speed, making and breaking personal fortunes the size of which defy imagination. Fictitious commodities abound. The genomes of entire nations have become corporately owned. Relationships have become the overt basis of economic wealth and political power. Hypercapitalism explores the problems of understanding this emergent form of global political economic organization by focusing on the internal relations between language, new media networks, and social perceptions of value. Taking an historical approach informed by Marx, Phil Graham draws upon writings in political economy, media studies, sociolinguistics, anthropology, and critical social science to understand the development, roots, and trajectory of the global system in which every possible aspect of human existence, including imagined futures, has become a commodity form.

Africa and the Second World War - David Killingray 1986-07-02

As He Saw it - Elliott Roosevelt 1974

The Planets - Sergio Chejfec 2012

When he reads about a mysterious explosion in the distant countryside, the narrator's thoughts turn to his disappeared childhood friend, M, who

was abducted from his home years ago during a spasm of political violence in Buenos Aires in the early 1970s. He convinces himself that M must have died in the explosion and he begins to tell their story hoping to reanimate his lost friend and relive the time they spent together. Sergio Chejfec's *The Planets* is an affecting and innovative exploration of mourning, remembrance and friendship by one of Argentina's modern masters.

Language in Late Capitalism - Alexandre Duchêne 2012

This book examines the ways in which our ideas about language and identity which used to be framed in national and political terms as a matter of rights and citizenship are increasingly recast in economic terms as a matter of added value. It argues that this discursive shift is connected to specific characteristics of the globalized new economy in what can be thought of as "late capitalism". Through ten ethnographic case studies, it demonstrates the complex ways in which older nationalist ideologies which invest language with value as a source of pride get bound up with newer neoliberal ideologies which invest language with value as a source of profit. The complex interaction between these modes of mobilizing linguistic resources challenges some of our ideas about globalization, hinting that we are in a period of intensification of modernity, in which the limits of the nation-State are stretched, but not (yet) undone. At the same time, this book argues, this intensification also calls into question modernist ways of looking at language and identity, requiring a more serious engagement with capitalism and how it constitutes symbolic (including linguistic) as well as material markets.
