[Sexual Offending - Amy Phenix 2015-12-07](#)
 This expert reference provides a broad, comprehensive review of the major domains of sexual offending. Beginning with an integrated etiological model of sexual offending, chapters follow addressing the primary predisposing conditions related to sexual offending (e.g. pedophilic, hebephilic, paraphilic rape and non-contact paraphilic disorders, hyper sexuality and personality factors). In addition, special subgroups of sexual offenders (females, youth and the intellectually disable) are considered. Both broad and specific perspectives on the assessment of sexual offenders are provided. Overviews are offered of clinical and forensic evaluations of such offenders and the utility of structured psychological assessment. A novel conceptual model of risk assessment is proposed. More specifically, each of the primary approaches or instruments related to risk assessment of sexual offending are addressed: the Static risk assessment measures, the Sex Offender Risk Appraisal Guide, structured professional judgment, and the varied measures of dynamic or criminogenic needs assessment. Finally, multiple aspects of management of sexual offenders are discussed including models of psychosocial treatment, the question of the effectiveness of such treatment, biological interventions, civil commitment, circles of support, and the containment approach to community management. Chapters are authored by both prominent experts and experienced

professionals for a breadth of perspective. Among the topics covered: Pedophilic, Hebephilic, Rape Paraphilic Disorders and the variety of Non Contact sexual offending conditions Personality, related conditions, & their association with sexual offending: motivators and disinhibition in context. Disorders of hyper sexuality. Assessments of sexual offenders, including the role of psychological testing, clinical & interview approaches, as well as forensic evaluations Conceptual models of risk assessment & discussion of specific static, dynamic & structured clinical risk assessment approaches Models of & reviews of treatment outcome with sexual offenders, including psychotherapy, psychopharmacology and castration, the containment approach, civil commitment & circles of support Overview of public policy issues & an evidence-based perspective on sex offender registration and residential restrictions. This breadth of material in Sexual Offenders will help practitioners gain multiple levels of clinical insight as well as giving them up-to-date practical tools and techniques for working with this problematic class of individuals.

Sex Panic and the Punitive State - Roger N. Lancaster 2011-03-15
 One evening, while watching the news, Roger N. Lancaster was startled by a report that a friend, a gay male school teacher, had been arrested for a sexually based crime. The resulting hysteria threatened to ruin the life of an innocent man. In

Downloaded from
legacy.opendemocracy.net on 2020-06-14

this passionate and provocative book, Lancaster blends astute analysis, robust polemic, ethnography, and personal narrative to delve into the complicated relationship between sexuality and punishment in our society. Drawing on classical social science, critical legal studies, and queer theory, he tracks the rise of a modern suburban culture of fear and develops new insights into the punitive logic that has put down deep roots in everyday American life.

Sex Offenders - J. V. Fenner 2008

This book deals with society's responses to sex offenders. This issue is of vital interest to law enforcement professionals and society at large. This subsection of the population generates as much or more fear than virtually any other segment in the community. The chapters in this book deal with recidivism, tracking and location, impulsivity, long-term care, and reunification.

Special Needs Offenders in Correctional Institutions - Lior Gideon 2012-09-14

Effective treatment and preparation for successful reintegration can be better achieved if the needs and risks of incarcerated offenders are taken into consideration by correctional practitioners and scholars. *Special Needs Offenders in Correctional Institutions* offers a unique opportunity to examine the different populations behind bars (e.g. chronically and mentally ill, homosexual, illegal immigrants, veterans, radicalized inmates, etc.), as well as their needs and the corresponding impediments for rehabilitation and reintegration. Author Lior Gideon takes a rehabilitative and reiterative approach to discuss and differentiate between the needs of these various categories of inmates, and provides in depth discussions-not available in other correctional texts-about the specific needs, risks and policy recommendations when working with present-day special needs offenders. Each chapter is followed by suggested readings and relevant websites that will enable readers to further enhance understanding of the issues and potential solutions discussed in the chapter. Further, each chapter has discussion questions specifically designed to promote class discussions. The text concludes with a theoretical framework for future policy implications and practices.

Maps and the Internet - M.P. Peterson 2005-12-17

This book examines a new trend affecting cartography and geographic information science. Presenting the work of over 30 authors from 16 different countries, the book provides an overview of current research in the new area of Internet Cartography. Chapters deal with the growth of this form of map distribution, uses in education, privacy issues, and technical aspects from the point of view of the map provider - including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium of paper and expensive large-format color print technology, maps had a limited distribution and use. The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display. Maps have also become timelier with some maps of traffic and weather being updated every few minutes. In addition, it is now possible to access maps from servers throughout the world. Finally, the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access. * Provides comprehensive coverage of maps and the internet * Delivers a global perspective * Combines theoretical and practical aspects

Sex Offenders - Arjan A. J. Blokland 2015-09-08

An authoritative and in-depth treatment of the latest research into the criminal careers of sex offenders, providing background and investigating the policies used to combat one of society's most intractable public issues. Features chapters based on original research from the most prominent scholars in the field of sex offender and criminal career research Deals with the entire criminal careers of sex offenders from youth to adulthood Illustrates the significance of the criminal career approach for theory, treatment, research, and policy regarding sex offenders Covers a wider breadth of topics than existing texts and uses data from various studies and countries, including the U.S., Canada, the U.K., and the Netherlands Features an introductory chapter charting the origins of the criminal career perspective as well as the history of sex offender research, pinpointing the most important research questions and current debates in both fields

Punishing the Poor - Loïc Wacquant 2009-05-01

Downloaded from
legacy.opendemocracy.net on 2020-06-14
by guest

The punitive turn of penal policy in the United States after the acme of the Civil Rights movement responds not to rising criminal insecurity but to the social insecurity spawned by the fragmentation of wage labor and the shakeup of the ethnoracial hierarchy. It partakes of a broader reconstruction of the state wedding restrictive “workfare” and expansive “prisonfare” under a philosophy of moral behaviorism. This paternalist program of penalization of poverty aims to curb the urban disorders wrought by economic deregulation and to impose precarious employment on the postindustrial proletariat. It also erects a garish theater of civic morality on whose stage political elites can orchestrate the public vituperation of deviant figures—the teenage “welfare mother,” the ghetto “street thug,” and the roaming “sex predator”—and close the legitimacy deficit they suffer when they discard the established government mission of social and economic protection. By bringing developments in welfare and criminal justice into a single analytic framework attentive to both the instrumental and communicative moments of public policy, *Punishing the Poor* shows that the prison is not a mere technical implement for law enforcement but a core political institution. And it reveals that the capitalist revolution from above called neoliberalism entails not the advent of “small government” but the building of an overgrown and intrusive penal state deeply injurious to the ideals of democratic citizenship. Visit the author’s website.

Sex Offender Registration and Notification - 1999

No Easy Answers - 2007

No Easy Answers is the first comprehensive study of US sex offender registration, community notification and residency restriction laws, their public safety impact, and the effect they have on former offenders and their families. It concludes the laws are poorly crafted and misguided, failing to protect children from sex crimes but making it nearly impossible for former offenders to rebuild their lives. In many

states, everyone convicted of a sex crime must register and the requirement can last for life. The requirements are overbroad in scope and overlong in duration. As a result, there are more than 600,000 registered sex offenders, including individuals convicted of sexual sex between teenagers, prostitution, and public urination, as well as those who committed their only offenses decades ago. Unfettered public access to online sex offender registries exposes registrants to harassment, ostracism, and even violence, with little evidence that this form of community notification protects anyone from sexual violence. Residency restrictions prohibit former offenders from living within a designated distance (anywhere from 500 to 2,500 feet) from places where children gather. The restrictions have the effect of banishing former offenders from entire towns, forcing them to live far from home, families, jobs, and treatment, and hindering law-enforcement supervision. The restrictions may have no impact on the likelihood of recidivism. Sex offender laws reflect public concern that children are at grave risk of sexual abuse by strangers who are repeat offenders. The real risks children face are quite different: statistics demonstrate that most sexual abuse of children is committed by family members or persons known and often trusted by the victim, and by someone who has not previously been convicted of a sex offense. The laws also reflect the widely shared but erroneous belief that sex offenders continually repeat their offenses. Authoritative studies, however, indicate that three out of four adult offenders do not reoffend.

Community-Based Operations Research - Michael P. Johnson 2011-09-18

This edited volume is an introduction to diverse methods and applications in operations research focused on local populations and community-based organizations that have the potential to improve the lives of individuals and communities in tangible ways. The book's themes include: space, place and community; disadvantaged, underrepresented or underserved populations; international and transnational applications; multimethod, cross-disciplinary and comparative approaches and appropriate technology; and analytics. The book is comprised of eleven original submissions, a re-print of a 2007 article

by Johnson and Smilowitz that introduces CBOR, and an introductory chapter that provides policy motivation, antecedents to CBOR in OR/MS, a theory of CBOR and a comprehensive review of the chapters. It is hoped that this book will provide a resource to academics and practitioners who seek to develop methods and applications that bridge the divide between traditional OR/MS rooted in mathematical models and newer streams in 'soft OR' that emphasize problem structuring methods, critical approaches to OR/MS and community engagement and capacity-building.

Assessment and Treatment of Sex Offenders

- Anthony R. Beech 2009-03-04

A comprehensive resource for practitioners working with sexual offenders. Discusses assessments and interventions, as well as providing a comprehensive literature review. There are around 10,000 convictions or cautions for sexual offences in the UK each year; early evidence suggests that treatment programmes can halve re-conviction rates. Edited by a University of Birmingham team who are world leaders in researching this area; the subject is of interest worldwide, with strong markets in Canada and New Zealand. Includes material on managing offenders with developmental disabilities and those with Dangerous and Severe Personality Disorder.

International Perspectives on the Assessment and Treatment of Sexual Offenders

- Douglas P. Boer 2015-06-22

International Perspectives on the Assessment and Treatment of Sexual Offenders: Theory, Practice and Research provides the first truly global perspective on the assessment and treatment of sex offenders. Presents a comprehensive overview of current theories and practices relating to the assessment and treatment of sex offenders throughout the world, including the US, Europe, and Australasia. Covers all the major developments in the areas of risk assessment, treatment, and management. Includes chapters written by internationally respected practitioners and researchers experienced in working with sexual offenders such as Bill Marshall, Ruth Mann, Karl Hanson and Jayson Ware.

Sex Offenders

- Fabian M. Saleh 2021

"In his annual lecture to second year medical

students, Dr. Fred Berlin describes an interview he had, early in his career, with a man whom he was evaluating following the man's arrest for child sexual abuse. Halfway through the interview, the arrested man interrupted Dr. Berlin's questions and said, You know, Doctor, your society takes a newborn baby boy; gathers family and friends, takes a knife and without any anesthesia cuts skin off the tip of his penis. This is accepted as a religious act. I bend over and kiss that same penis, and I am arrested as a child sexual abuser. Can you explain that to me? (Berlin, 2000)"--

Caught

- Marie Gottschalk 2016-02-16

A major reappraisal of crime and punishment in America. The huge prison buildup of the past four decades has few defenders, yet reforms to reduce the numbers of those incarcerated have been remarkably modest. Meanwhile, an ever-widening carceral state has sprouted in the shadows, extending its reach far beyond the prison gate. It sunders families and communities and reworks conceptions of democracy, rights, and citizenship—posing a formidable political and social challenge. In *Caught*, Marie Gottschalk examines why the carceral state remains so tenacious in the United States. She analyzes the shortcomings of the two dominant penal reform strategies—one focused on addressing racial disparities, the other on seeking bipartisan, race-neutral solutions centered on reentry, justice reinvestment, and reducing recidivism. With a new preface evaluating the effectiveness of recent proposals to reform mass incarceration, *Caught* offers a bracing appraisal of the politics of penal reform.

The Ethics of Total Confinement

- Bruce A. Arrigo 2011-06-29

In three parts, this volume in the AP-LS series explores the phenomena of captivity and risk management, guided and informed by the theory, method, and policy of psychological jurisprudence. The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent "conditions of control." These conditions impose barriers to justice and set limits on citizenship for one and all. Situated at the nexus of political/social theory, mental health law and jurisprudential ethics, the book examines and critiques

constructs such as offenders and victims; self and society; therapeutic and restorative; health; harm; and community. So, too, are three "total confinement" case law data sets on which this analysis is based. The volume stands alone in its efforts to systematically "diagnose" the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting: (1) the rights of juveniles found competent to stand criminal trial, the mentally ill placed in long-term disciplinary isolation, and sex offenders subjected to civil detention and community re-entry monitoring; (2) the often unmet needs of victims; and (3) the demands of an ordered society. Carefully balancing sophisticated insights with concrete and cutting-edge applications, the book concludes with a series of provocative, yet practical, recommendations for future research and meaningful reform within institutional practice, programming, and policy. *The Ethics of Total Confinement* is a thought-provoking and timely must-read for anyone interested in the ethical and legal issues regarding madness, citizenship, and social justice. "It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us. Instead, the path forward must run through a return to the ethical and psychological roots of security and justice. *The Ethics of Total Confinement* is a quantum step forward in defining and advancing that path."--Jonathan Simon, Adrian A. Kragen Professor of Law, Jurisprudence and Social Policy Program, UC Berkeley School of Law "This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness. It focuses on three outcast groups--juveniles tried as adults, people with mental illness subjected to hospitalization, and sex offenders committed as dangerous--and, based on an innovative analysis of the relevant caselaw and empirics, shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest, most uninformed fears. Relying on Aristotelian philosophy, therapeutic and restorative principles, and commonsense

justice, the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing."--Christopher Slobogin, Milton Underwood Professor of Law, Vanderbilt University Law School "The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines. By bridging gaps among relevant disciplines, the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological, ethical, or justice-based standards. The book's provocative conclusions and recommendations offer much food for thought and suggest potential directions for action."--Dennis Fox, Emeritus Associate Professor of Legal Studies and Psychology, University of Illinois at Springfield "The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept. It is a book that synthesises in creative new ways reformist visions of justice, virtue and the cultivation of habits of character. This is profound work that opens new paths to dignity, healing and social justice."--John Braithwaite, Australian Research Council Federation Fellow, Australian National University "The Ethics of Total Confinement offers a useful and wide-ranging perspective grounded in psychological jurisprudence. With its emphasis on the harm done to those most vulnerable to extremes of risk-management, this volume makes a welcome addition to the literature on confinement."--Lorna Rhodes, Professor, Department of Anthropology, University of Washington "The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices, aspiring to greater justice and human flourishing for all. A timely intervention of this kind is most welcome."--George Pavlich, Associate Vice-President (Research), Professor of Law and Sociology, University of Alberta

Spying with Maps - Mark Monmonier 2004-04
Maps, as we know, help us find our way around. But they're also powerful tools for someone hoping to find you. Widely available in electronic and paper formats, maps offer revealing insights

into our movements and activities, even our likes and dislikes. In *Spying with Maps*, the "mapmatician" Mark Monmonier looks at the increased use of geographic data, satellite imagery, and location tracking across a wide range of fields such as military intelligence, law enforcement, market research, and traffic engineering. Could these diverse forms of geographic monitoring, he asks, lead to grave consequences for society? To assess this very real threat, he explains how geospatial technology works, what it can reveal, who uses it, and to what effect. Despite our apprehension about surveillance technology, *Spying with Maps* is not a jeremiad, crammed with dire warnings about eyes in the sky and invasive tracking. Monmonier's approach encompasses both skepticism and the acknowledgment that geospatial technology brings with it unprecedented benefits to governments, institutions, and individuals, especially in an era of asymmetric warfare and bioterrorism. Monmonier frames his explanations of what this new technology is and how it works with the question of whether locational privacy is a fundamental right. Does the right to be left alone include not letting Big Brother (or a legion of Little Brothers) know where we are or where we've been? What sacrifices must we make for homeland security and open government? With his usual wit and clarity, Monmonier offers readers an engaging, even-handed introduction to the dark side of the new technology that surrounds us—from traffic cameras and weather satellites to personal GPS devices and wireless communications.

[Sex Offenders, Stigma, and Social Control](#) - Diana Rickard 2016-07-12

The 1990s witnessed a flurry of legislative initiatives—most notably, "Megan's Law"—designed to control a population of sex offenders (child abusers) widely reviled as sick, evil, and incurable. In *Sex Offenders, Stigma, and Social Control*, Diana Rickard provides the reader with an in-depth view of six such men, exploring how they manage to cope with their highly stigmatized role as social outcasts. The six men discussed in the book are typical convicted sex offenders—neither serial pedophiles nor individuals convicted of the type of brutal act that looms large in public

perceptions about sex crimes. *Sex Offenders, Stigma, and Social Control* explores how these individuals, who have been cast as social pariahs, construct their sense of self. How does being labeled in this way and controlled by measures such as Megan's Law affect one's identity and sense of social being? Unlike traditional criminological and psychological studies of this population, this book frames their experiences in concepts of both deviance and identity, asking how men so highly stigmatized cope with the most extreme form of social marginality. Placing their stories within the context of the current culture of mass incarceration and zero-tolerance, Rickard provides a deeper understanding of the complex relationship between public policy and lived experience, as well as an understanding of the social challenges faced by this population, whose re-integration into society is far from simple or assured. *Sex Offenders, Stigma, and Social Control* makes a significant contribution to our understanding of sex offenders, offering a unique window into how individuals make meaning out of their experiences and present a viable—not monstrous—social self to themselves and others.

Laws of the State of New York - New York (State)

Forensic GIS - Gregory A. Elmes 2014-07-08
A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technologies vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.
