*Global LGBTQ Activism* - Paromita Pain 2023-09-29

Focused on understanding and analyzing LGBTQ activism and protest globally, this edited collection brings together voices from different parts of the world to examine LGBTQ protests and their impact. Through the lens of media, culture, and sociopolitical structures, this collection highlights how cultural and technical factors like the emergence of social media and other digital platforms have impacted LGBTQ activism. This book draws on studies from countries as varied as Zimbabwe, Bangladesh, Sri Lanka, Hungary, Morocco, China, and the US. The contributions provide important insight into how social media and digital platforms have provided space for self-expression and protest and encouraged advocacy and empowerment for LGBTQ movements. It also examines the diversity and similarities between different national contexts and the various obstacles faced, while spotlighting countries that are traditionally understudied in Western academia, in an important step toward decolonizing research. Each chapter, through the voices of activists and media scholars, moves beyond an oversimplified examination of queer protests to show, in rich detail, the exciting yet complicated terrain of queer protests throughout the globe. This book is suitable for media, communication, and cultural studies students; researchers; academics; and LGBTQ activists, as well as students and scholars from related academic disciplines.

Love, Passion and Patriotism - Raquel A. G. Reyes 2008

Love, Passion and Patriotism is an intimate account of the lives and experiences of a renowned group of young Filipino patriots, the men whose propaganda campaign was a catalyst for the country's revolt against Spain. As writers, artists, and scientists who resided in Europe, they were exposed to new ideas. Reyes uses their paintings, photographs, political writings, novels, and letters to show the moral contradictions inherent in their passionate patriotism and their struggle to come to terms with the relative sexual freedom of European women, which they found both alluring and sordid.

**White Love and Other Events in Filipino History** - Vicente L. Rafael 2014-06-18

In this wide-ranging cultural and political history of Filipinos and the Philippines, Vicente L. Rafael examines the period from the onset of U.S. colonialism in 1898 to the emergence of a Filipino diaspora in the 1990s. Self-consciously adopting the essay form as a method with which to disrupt epic conceptions of Filipino history, Rafael treats in a condensed and concise manner clusters of historical detail and reflections that do not easily fit into a larger whole. *White Love and Other Events in Filipino History* is thus a view of nationalism as an unstable production, as Rafael reveals how, under what circumstances, and with what effects the concept of the nation has been produced and deployed in the Philippines. With a focus on the contradictions and ironies that suffuse Filipino history, Rafael delineates the multiple ways that colonialism has both inhabited and enabled the nationalist discourse of the present. His topics range from the colonial census of 1903-1905, in which a racialized imperial order imposed by the United States came into contact with an emergent revolutionary nationalism, to the pleasures and anxieties of nationalist identification as evinced in the rise of the Marcos regime. Other essays examine aspects of colonial domesticity through the writings of white women during the first decade of U.S. rule; the uses of photography in ethnology, war, and portraiture; the circulation of rumor during the Japanese occupation of Manila; the reproduction of a hierarchy of languages in popular culture; and the spectral presence of diasporic Filipino communities within the nation-state. A critique of both U.S. imperialism and Filipino nationalism, *White Love and Other Events in Filipino History* creates a sense of epistemological vertigo in the face of former attempts to comprehend and master Filipino identity. This volume should become a valuable work for those interested

in Southeast Asian studies, Asian-American studies, postcolonial studies, and cultural studies.

**Filipino American Psychology** - Kevin L. Nadal Ph. D. 2010

Filipino Americans are projected to become the largest Asian American population by 2010. As the second largest immigrant group in the country, there are approximately 3 million documented and undocumented Filipino Americans in the US. Filipino Americans are unique in many ways. They are descendants of the Philippines, a country that was colonized by Spain for over three centuries and by the US for almost 50 years. They are the only ethnic group that has been categorized as Asian American, Pacific Islander, Hispanic, and even as their own separate ethnicity. Because of diverse phenotypes, they are often perceived as being Asian, Latino, multiracial, and others. And contrary to the Model Minority Myth, Filipino Americans have experienced several health, psychological, and educational disparities, including lower college graduation rates and higher levels of cardiovascular disease, diabetes, obesity, teen pregnancy, HIV/AIDS, substance abuse, depression, and suicide. Despite these disparaging statistics, Filipino Americans have made significant contributions to the US, ever since their first arrivals in October 1587- from their involvement in the United Farmworkers Movement to their roles in hip-hop culture and their presence in medicine, education, and the arts. However, Filipino Americans have also been referred to as the "Forgotten Asian Americans" because of their invisibility in mainstream media, academia, and politics. *Filipino American Psychology: A Collection of Personal Narratives* offers an intimate look at the lives of Filipino Americans through stories involving ethnic identity, colonial mentality, cultural conflicts, and experiences with gender, sexual orientation, and multiraciality. Writers courageously address how they cope with mental health issues- including depression, anxiety, post-traumatic stress, and suicide. Theories and concepts from the book's predecessor, *Filipino American Psychology: A Handbook of Theory, Research, and Clinical Practice* can be applied through the voices of a diverse collection of Filipino Americans.

*The Future of Teaching* - 2023-02-06

The 'future of teaching' represents a technological disruption of moral traditions of teaching and what teaching might become and is a serious concern for the current generation of philosophers in both China and the West.

**Beauty and Power** - Mark Johnson 1997-09

This compelling study of gender and sexual diversity in the Southern Philippines addresses general questions about the relationship between the making of gender and sexualities, the politics of national and ethnic identities and processes of cultural transformation in a world of contract labourers and transnational consumers. The book focuses, in particular, on the meaning and experience of local 'gays' -- transvestite/transgender-homosexual men -- who are at once celebrated as purveyors of beauty (defined in terms of a global American otherness) and valorized as impotent men and defiled women. In short, America functions both as a sign of their abjected status and as a space for imagining and reformulating various gendered identities. This innovative work -- one of the first ethnographic studies to be published in the aftermath of the region's civil unrest -- will be of interest to anyone working on gender, the body and sexuality. Not only does it extend the boundaries of cross-cultural studies of non-mainstream genders and sexualities by directly engaging the entanglement of local sensibilities with global images and discourse, but it also demonstrates that there is nothing ambiguous about ambiguity -- gendered, sexual or otherwise. Rather, this ambiguity is the specific product of different historical relations of power through which

various cultural subjects are created and re-create themselves.

**Filipino American Psychology** - Kevin L. Nadal 2009

Filipino Americans are the second largest Asian American/ Pacific Islander population in the United States and they are projected to become the largest Asian American population by 2010. With 1.37 million Filipino-born immigrants living in the US, Filipino Americans are the second largest immigrant population in the country. As descendants of the Philippines, a country that was colonized by Spain for over three centuries and by the US for nearly 50 years, Filipino Americans are an ethnic group with a sociocultural and historical experience that is unlike any other. First, they are the only ethnic group that has been categorized as Asian American, Pacific Islander, and Hispanic. However, California state laws require that all personnel surveys or statistical tabulations classify persons of Filipino ancestry as "Filipino" rather than part of any other racial or ethnic group. Additionally, Filipino Americans have often been referred to as the "Forgotten Asian Americans," because their presence has been invisible in psychology, education, humanities, and other social sciences. *Filipino American Psychology: A Handbook of Theory, Research, and Clinical Practice* offers a comprehensive look at the psyche of Filipino Americans. By examining history, cultural values, influences of colonialism, community dynamics, and intersections with other identities, the reader will have an opportunity to understand essential information about this population. Students will gain knowledge and awareness about Filipino American identity and personality development, while practitioners will learn culturally-competent techniques to become better counselors, clinicians, and educators. This book is the first of its kind and aims to promote visibility of this invisible group, so that 2.4 million Filipino Americans will have their voices heard.

**Translation Studies in the Philippines** - Riccardo Moratto 2023-12-01

The contributors to this book examine the state, development, issues, practices, and approaches to translation studies in the Philippines. The Philippines is a highly multilingual country, with many indigenous languages and regional dialects spoken alongside foreign imports, particularly English and Spanish. Professor Moratto, Professor Bacolod, and their contributors analyse the different roles that translation plays across an extensive range of areas, including disaster mitigation, crisis communication, gender bias, marginalization of Philippine languages, academe, and views on sex, gender, and sexuality. They look at a range of different types of translation, from the translation of biblical texts to audio-visual translation and machine translation. Emphasising the importance of translation as an interdisciplinary field, they use a variety of analytic lenses, including anthropological linguistics, language and culture studies, semantics, structural linguistics, and performance arts, among others. A comprehensive resource for scholars and practitioners of translation, as well as a valuable reference for scholars across a wider range of humanities and social science disciplines in examining the culture, language, and society of the Philippines.

**Philippine Studies** - Priscelina Patajo-Legasto 2008

These essays by Philippine and U.S.-based scholars illustrate the dynamism and complexities of the discursive field of Philippine studies as a critique of vestiges of "universalist" (Western/hegemonic) paradigms; as an affirmation of "traditional" and "emergent" cultural practices; as a site for new readings of "old" texts and "new" popular forms brought into the ambit of serious scholarship; and as a liberative space for new art and literary genres.

**Filipinx American Studies** - Rick Bonus 2022-06-07

This volume spotlights the unique suitability and situatedness of Filipinx American studies both as a site for reckoning with the work of historicizing U.S. empire in all of its entanglements, as well as a location for reclaiming and theorizing the interlocking histories and contemporary trajectories of global capitalism, racism, sexism, and heteronormativity. It encompasses an interrogation of the foundational status of empire in the interdiscipline; modes of labor analysis and other forms of knowledge production; meaning-making in relation to language, identities, time, and space; the critical contours of Filipinx American schooling and political activism; the indispensability of relational thinking in Filipinx American studies; and the disruptive possibilities of Filipinx American formations. A catalogue of key resources and a selected list of scholarship are also provided. Filipinx American Studies constitutes a coming-to-terms with not only the potentials and possibilities but also the disavowals, silences, and omissions that mark Filipinx American studies. It provides a reflective and critical space for thinking through the ways Filipinx American studies is uniquely and especially suited to the interrogation of the ongoing legacies of U.S. imperialism and the urgencies of the current period. **Grammatical gender and linguistic complexity I** - Francesca Di Garbo

The many facets of grammatical gender remain one of the most fruitful areas of linguistic research, and pose fascinating questions about the origins and development of complexity in language. The present work is a two-volume collection of 13 chapters on the topic of grammatical gender seen through the prism of linguistic complexity. The contributions discuss what counts as complex and/or simple in grammatical gender systems, whether the distribution of gender systems across the world's languages relates to the language ecology and social history of speech communities. Contributors demonstrate how the complexity of gender systems can be studied synchronically, both in individual languages and over large cross-linguistic samples, and diachronically, by exploring how gender systems change over time. In addition to three chapters on the theoretical foundations of gender complexity, volume one contains six chapters on grammatical gender and complexity in individual languages and language families of Africa, New Guinea, and South Asia. This volume is complemented by volume two, which consists of three chapters providing diachronic and typological case studies, followed by a final chapter discussing old and new theoretical and empirical challenges in the study of the dynamics of gender complexity.

**Susceptibility vs. Resistance** - Nataliya Levkovych 2022-04-19

The topic of the volume is the contrast between borrowable categories and those which resist transfer. Resistance is illustrated for the unattested emergence of grammatical gender, the negligible impact of English and Spanish on the number category in Patagonian Welsh, the reluctance of replicas to borrow English but. MAT-borrowing does not imply the copying of rules as the Spanish function-words in the Chamorro irrealis show. Chamorro and Tetun Dili look similar on account of their contact-induced parallels. The languages of the former USSR have borrowed largely identical sets of conjunctions from Russian, Arabic, and Persian to converge in the domain of clause linkage. Resistance against and susceptibility to transfer call for further investigations to the benefit of language-contact theory.
